## Type/Severity

Security Advisory: Important

## Topic

Initial GA Release of Red Hat Insights proxy

## Description

The Insights proxy Container is used by the Insights proxy product RPM and serves as an intermediary between customer systems in disconnected networks, air-gapped systems or systems with no outside connections and Insights.

The Insights proxy routes all Red Hat Insights traffic through itself, providing a layer of privacy and security for disconnected customer systems.

## Solution

The Insights proxy container image provided here is downloaded by the Red Hat Insights proxy product RPM.

Before applying this update, make sure all previously released errata relevant to your system have been applied.
