## RHSA-2026:2572 - Security Advisory

Issued: 2026-02-11    Updated: 2026-02-11

[Overview](#)[Updated Images](#)

### Synopsis

Important: Red Hat Advanced Cluster Management for Kubernetes v2.14.2 security update

### Type/Severity

Security Advisory: Important

### Topic

Red Hat Advanced Cluster Management for Kubernetes 2.14 General Availability release images, which add new features and enhancements, bug fixes, and updated container images.

### Description

Red Hat Advanced Cluster Management for Kubernetes 2.14 images

Red Hat Advanced Cluster Management for Kubernetes provides the capabilities to address common challenges that administrators and site reliability engineers face as they work across a range of public and private cloud environments. Clusters and applications are all visible and managed from a single console—with security policy built in.

This advisory contains the container images for Red Hat Advanced Cluster Management for Kubernetes, which add new features and enhancements, bug fixes, and updated container images. See the following Release Notes documentation, which will be updated shortly for this release, for additional details about this release:

[https://docs.redhat.com/en/documentation/red\\_hat\\_advanced\\_cluster\\_management\\_for\\_kubernetes/2.14/html-single/release\\_notes/index#acm-release-notes](https://docs.redhat.com/en/documentation/red_hat_advanced_cluster_management_for_kubernetes/2.14/html-single/release_notes/index#acm-release-notes) 

## Solution

Before you apply this update, make sure all previously released errata that are relevant to your system are applied.

For details on how to apply this update, refer to:

<https://access.redhat.com/articles/11258> 

## Fixes

- ACM-25039  - console-mce pod CrashLoopBackOff due to probe failure - improve performance [release-2.14]
- ACM-25222  - scale-in failed: admission webhook "clusterinstances.siteconfig.open-cluster-management.io" denied the request: detected unauthorized changes in immutable fields
- ACM-26057  - IBI install failing due to NTP servers in seed not getting updated
- ACM-26168  - Missing CRD status never recovers when disabling MCOA
- ACM-27633  - [2.14] observability=disabled label fails to remove all observability addon resources
- ACM-27834  - Observability tries to determine if a cluster is OCP too early in deployment
- ACM-29861  - [ACM 2.14] - ClusterInstance status incorrectly shows Provisioning in progress for already provisioned clusters
- ACM-25039  - console-mce pod CrashLoopBackOff due to probe failure - improve performance [release-2.14]
- ACM-25222  - scale-in failed: admission webhook "clusterinstances.siteconfig.open-cluster-management.io" denied the request: detected unauthorized changes in immutable fields
- ACM-26057  - IBI install failing due to NTP servers in seed not getting updated
- ACM-26168  - Missing CRD status never recovers when disabling MCOA
- ACM-27633  - [2.14] observability=disabled label fails to remove all observability addon resources
- ACM-27834  - Observability tries to determine if a cluster is OCP too early in deployment
- ACM-29861  - [ACM 2.14] - ClusterInstance status incorrectly shows Provisioning in progress for already provisioned clusters

## CVEs

- CVE-2025-47907 
- CVE-2025-53547 
- CVE-2025-58183 
- CVE-2025-61729 
- CVE-2025-68156 
- CVE-2025-7195 
- CVE-2026-22029
