About this Add-on

ImportExportTools NG adds import and export functions for messages, folders and profiles.

Features:

Menus:

- Tools (most import and export functions including profiles)
- Folders (most import and export functions)
- Search dialog (export search results)
- Selected messages (export or copy to clipboard)

Export:

- Individual folder(s), optionally including subfolders (mbox format)
- All folder messages in the following formats:
 - EML, HTML, PDF, CSV or plaintext
- Export as individual files or a single file
- Optionally include attachments
- Export indexes as plain text or CSV
- Extensive file naming convention options
- Export messages from search dialog

Import:

- Mbox files (including structure)
- EML & EMLX files
- Individual or all directory files

Congratulations on your decision to focus on ESR release. Your addon is priceless and mentioned frequently every day on the Thunderbird support forum. Quality is paramount, and I respect your decision. Thank you for making this addon available.

The module is well-designed, but I don't understand how to export/import just the accounts. It would be very useful for exporting IMAP accounts from one PC and importing the configuration to another PC without having to move all the emails.

by Jiminy1 on Oct. 18, 2025 · [permalink](#)

Nice Job thank you ! this Addon does exactly what i need: Import/Export/Backup and I'm using this extension and the printing one for a long time.
