About us

We manage the complexity of our demanding clients' needs

Thales delivers cybersecurity products and services that keep people and assets safe, giving organisations confidence in the security of their digital journeys. Our portfolio protects identities and data, along with all the paths that lead to it, encompassing services that include compliance and governance audits, threat detection and penetration tests. Drawing on a team of 6,000 experts and developers, Thales is a global leader in cybersecurity – no.1 in data security - with solutions deployed in 148 countries, generating annual revenues in excess of €2 billion in the domain.

With over 40 years of cybersecurity expertise, along with cyber teams and infrastructure worldwide, we are here to closely support any of your cybersecurity needs.

Expert in mobile cybersecurity and secure collaborative solutions

For almost 40 years, Ercom has developed a leadership position in the markets of communications, data and devices security. This position is based on complementary technological expertise in telecom/cloud infrastructure, cryptography and software and on shared values: innovation, commitment and privacy. Thanks to its adaptability and its SaaS strategy, Ercom is able to meet the needs of large companies, SMEs or public sector, with certified security solutions.

Solutions

Best-in-class services and solutions covering a wide range of cyber security needs

Answering worldwide regulations and cyber security needs for critical domains, Thales provide a comprehensive range of cybersecurity solutions and services that address the evolving threats faced by businesses and critical infrastructure. From risk and threat evaluation, security by design, or cyber training to advanced threat detection and response capabilities, cyber integration, secure communications or network and data protection, Thales is at the forefront of the cybersecurity industry, ensuring that customers are highly protected from the latest cyber threats.
