## Description

CERT Polska has received a report about vulnerability in YSoft SafeQ 6 software and participated in coordination of its disclosure.

The vulnerability [CVE-2025-13175](https://www.cve.org/CVERecord?id=CVE-2025-13175): Y Soft SafeQ 6 renders the Workflow Connector password field in a way that allows an administrator with UI access to reveal the value using browser developer/inspection tools. The affected customers are only those with a password-protected Workflow Connector. This issue affects Y Soft SafeQ 6 in versions before MU106.

# Credits

We thank Hubert Decyusz and Karol Mazurek from AFINE Team for the responsible vulnerability report.

More about the coordinated vulnerability disclosure process at CERT Polska can be found at <https://cert.pl/en/cvd/> (<https://cert.pl/en/cvd/>).

## Social media

CERT Polska is a team operating within the structures of NASK - National Research Institute, established in 1996 to respond to computer security incidents. It carries out the role of CSIRT NASK, one of three such teams operating at the national level within the Polish national cybersecurity system.
