Chrome for Android Update

Monday, November 2, 2020

Hi, everyone! We've just released Chrome 86 (86.0.4240.185) for Android: it'll become [available on Google Play](#) over the next few weeks.

Security fixes in this release are listed in the corresponding [Desktop Release](#). In addition, this Android release contains:

[\$NA][[1144368](#)] **High** CVE-2020-16010: Heap buffer overflow in UI on Android.

Reported by Maddie Stone, Mark Brand, and Sergei Glazunov of Google Project Zero on 2020-10-31

Google is aware of reports that an exploit for CVE-2020-16010 exists in the wild.

This release also includes stability and performance improvements. You can see a full list of the changes in the [Git log](#). If you find a new issue, please let us know by [filing a bug](#).
