

Kalium Changelog

Last modified December 18, 2025

Kalium is constantly being updated with new features, bug fixes, and adjustments. We recommend you to read this changelog for every update release. Also please consider deactivating [caching plugins](#) temporarily to avoid the caching of old markup when you [update the theme](#).

We are always proactive in preventing security issues, however nobody can assume they will never come up.

This is why we highly recommend to stay up to date with each new theme version and plugins.

NOTE:

The changelog for Kalium 4 can be found here: [Kalium Changelog](#).

Version 3.30 DEC 18, 2025

FIX:

– Addressed a security issue reported by Wordfence

Laborator Recommends

- General bug fixes and performance improvements

Version 2.6.2 OCT 05, 2018

UPDATE:

- Advanced Custom Fields PRO plugin updated to latest version – 5.7.7
- WooCommerce Product Filter updated to latest version – 6.6.1
- Google fonts list updated to latest version on TypoLab
- Reorganised theme package files
- WooCommerce 3.4.7 compatibility added

FIX:

- Advanced Custom Fields PRO failed to update automatically
- Parameters and Options not working with ACF 5.7.7

- Hotel demo slider not importing
- Minor bug fixes and improvements

NOTE:

— The only way to update Advanced Custom Fields PRO to version 5.7.7 is if you update Kalium theme first by going to Appearance > Install Plugins. This step is required so your Parameters and Options will appear as it should.

Version 2.6 / 2.6.1

SEP 25, 2018**NEW:**

- Remote updates for bundled plugins. No need to wait for theme update to get the latest version of bundled plugins, you'll get premium plugin updates right after their release.
- Reduced the installable package (kalium.zip) from 26MB to 3MB in order to minimize server requirements and save your disk space.
- Added Advanced Custom Fields PRO plugin to our set of bundled premium plugins, now with much faster and better organization of custom fields.

NOTE:

When you install this update you will see a prompt that guides you to activate Advanced Custom Fields PRO and deactivate the free version of Advanced Custom Fields and their addons Flexible Content Field, Gallery Field and Repeater Field". When those ACF plugins are deactivated you can freely delete them too ([🔗 see screenshot](#)).
