Topic

An update for rhc-worker-script is now available for Red Hat Enterprise Linux 7 Extended Lifecycle Support.

Red Hat Product Security has rated this update as having a security impact of Moderate. A Common Vulnerability Scoring System (CVSS) base score, which gives a detailed severity rating, is available for each vulnerability from the CVE link(s) in the References section.

Description

Remote Host Configuration (rhc) worker for executing scripts on hosts managed by Red Hat Insights.

Security Fix(es):

- [net/http](#): Denial of service due to improper 100-continue handling in net/http (CVE-2024-24791)
- [golang-fips](#): Golang FIPS zeroed buffer (CVE-2024-9355)

For more details about the security issue(s), including the impact, a CVSS score, acknowledgments, and other related information, refer to the CVE page(s) listed in the References section.

Solution

For details on how to apply this update, which includes the changes described in this advisory, refer to:
