Type/Severity

Security Advisory: Important

Topic

Red Hat OpenShift Container Platform release 4.18.1 is now available with updates to packages and images that fix several bugs and add enhancements.

This release includes a security update for Red Hat OpenShift Container Platform 4.18.

Red Hat Product Security has rated this update as having a security impact of Important. A Common Vulnerability Scoring System (CVSS) base score, which gives a detailed severity rating, is available for each vulnerability from the CVE link(s) in the References section.

Description

Red Hat OpenShift Container Platform is Red Hat's cloud computing Kubernetes application platform solution designed for on-premise or private cloud deployments.

This advisory contains the container images for Red Hat OpenShift Container Platform 4.18.1. See the following advisory for the RPM packages for this release:

<https://access.redhat.com/errata/RHEA-2024:6126> [↗](#)

Space precludes documenting all of the container images in this advisory. See the following Release Notes documentation, which will be updated shortly for this release, for details about these changes:

https://docs.openshift.com/container-platform/4.18/release_notes/ocp-4-18-release-notes.html 

Security Fix(es):

- golang.org/x/net/html: Non-linear parsing of case-insensitive content in

golang.org/x/net/html (CVE-2024-45338)

- go-git: argument injection via the URL field (CVE-2025-21613)
- go-git: go-git clients vulnerable to DoS via maliciously crafted Git

server replies (CVE-2025-21614)

- containers/image: digest type does not guarantee valid type

(CVE-2024-3727)

- go-retryablehttp: [url](#) might write sensitive information to log file

(CVE-2024-6104)

- ose-olm-catalogd-container: incomplete fix for rapid reset (CVE-2024-12698)
- golang-protobuf: encoding/protojson, internal/encoding/json: infinite

loop in protojson.Unmarshal when unmarshaling certain forms of invalid JSON

(CVE-2024-24786)

- GraphQL: Denial of Service (DoS) vulnerability via GraphQL Batching

(CVE-2024-50311)

For more details about the security issue(s), including the impact, a CVSS score, acknowledgments, and other related information, refer to the CVE page(s) listed in the References section.

All OpenShift Container Platform 4.18 users are advised to upgrade to these updated packages and images when they are available in the appropriate release channel. To check for available updates, use the OpenShift CLI (oc) or web console. Instructions for upgrading a cluster are available at https://docs.openshift.com/container-platform/4.18/updating/updating_a_cluster/updating-cluster-cli.html 

Solution

For OpenShift Container Platform 4.18 see the following documentation, which will be updated shortly for this release, for important instructions on how to upgrade your cluster and fully apply this asynchronous errata update:

https://docs.openshift.com/container-platform/4.18/release_notes/ocp-4-18-release-notes.html 

You may download the oc tool and use it to inspect release image metadata for x86_64, s390x, ppc64le, and aarch64 architectures. The image digests may be found at

<https://quay.io/repository/openshift-release-dev/ocp-release?tab=tags>. 

The sha values for the release are as follows:

(For x86_64 architecture)

The image digest is

sha256:d9c985464c0315160971b3e79f5fbec628d403a572f7a6d893c04627c066c0bb

(For s390x architecture)

The image digest is

sha256:bd033a80f4586380ee46ac0ab9147e2157942e1f41ec92fdb6d3d32f839afcbd

(For ppc64le architecture)

The image digest is

sha256:4a690927d43044e2b42d6e64b04be8dcf164b2b95d0fde03163b88852ff0188d

(For aarch64 architecture)

The image digest is

sha256:d285ba31afa245c14f9354626b44abf833fe600774c1fd110ea5e712531bf914

All OpenShift Container Platform 4.18 users are advised to upgrade to these updated packages and images when they are available in the appropriate release channel. To check for available updates, use the OpenShift CLI (oc) or web console. Instructions for upgrading a cluster are available at https://docs.openshift.com/container-platform/4.18/updating/updating_a_cluster/updating-cluster-cli.html 

Affected Products

- Red Hat OpenShift Container Platform 4.18 for RHEL 9 x86_64
- Red Hat OpenShift Container Platform 4.18 for RHEL 8 x86_64
- Red Hat OpenShift Container Platform for Power 4.18 for RHEL 9 ppc64le
- Red Hat OpenShift Container Platform for Power 4.18 for RHEL 8 ppc64le
- Red Hat OpenShift Container Platform for IBM Z and LinuxONE 4.18 for RHEL 9 s390x
- Red Hat OpenShift Container Platform for IBM Z and LinuxONE 4.18 for RHEL 8 s390x

- Red Hat OpenShift Container Platform for ARM 64 4.18 for RHEL 9 aarch64
- Red Hat OpenShift Container Platform for ARM 64 4.18 for RHEL 8 aarch64

Fixes

- [BZ - 2268046](#) [↗](#) - CVE-2024-24786 golang-protobuf: encoding/protojson, internal/encoding/json: infinite loop in protojson.Unmarshal when unmarshaling certain forms of invalid JSON

- [OCPBUGS-48169](#) - Failed to create a disconnected cluster using HCP/HyperShift CLI
- [OCPBUGS-48199](#) - network-tools pod-run-netns-command failed due to "ERROR: Can't get netns pid"
- [OCPBUGS-48253](#) - error decoding policy json with ImagePolicy in different namespaces
- [OCPBUGS-48313](#) - Prometheus: segfault at exit
- [OCPBUGS-48407](#) - Snapshot webhook tests are failing
- [OCPBUGS-48409](#) - Operator conditions that check for snapshot webhook deployment are failing
- [OCPBUGS-48410](#) - The installation failed in the disconnected environment due to GetRegistryOverride() does not take SHA into account.
- [OCPBUGS-48429](#) - [release-4.18] TP cluster micro-upgrade fails, waiting on cluster-api
- [OCPBUGS-48430](#) - oc-mirror v2 automatically deleting the manifests which are generated under working-dir/cluster-resources while generating delete-images.yaml
- [OCPBUGS-48451](#) - Bootstrap kube-apiserver removal leaves only one endpoint in kubernetes service
- [OCPBUGS-48460](#) - [4.18] Backport all UDN tests to origin (dummy bug)
- [OCPBUGS-48504](#) - Concurrent Worker context deadline exceeded
- [OCPBUGS-48535](#) - e2e installs wrong lib versions
- [OCPBUGS-48539](#) - [release-4.18] OWNERS file update
- [OCPBUGS-48565](#) - Installation of OCP fails on disconnected cluster with 4.19/4.18 oc-mirror
- [OCPBUGS-48576](#) - Azure: installer sometimes fails to provision control plane
- [OCPBUGS-48579](#) - HyperShift CEL validation blocks ARM64 NodePool creation for None platform
- [OCPBUGS-48581](#) - Agent-based install using iSCSI fails when writing image to target
- [OCPBUGS-48611](#) - [GCP] destroying a private cluster doesn't delete the forwarding-rule/backend-service/health-check/firewall-rules created by ingress operator

- [OCPBUGS-48644](#)  - OLMv0: excessive catalog source snapshots cause severe performance regression [openshift-4.18.z]
- [OCPBUGS-48660](#)  - When installing an operator OLM locks the Subscription 3-15% of the times [release-4.18]
- [OCPBUGS-48682](#)  - [4.18] azure-disk-csi-driver: ARO HCP could not provision volume
- [OCPBUGS-48684](#)  - Cloud provider azure in 4.18 needs to be built against golang 1.22
- [OCPBUGS-48748](#)  - [control-plane-operator] azure-file-csi using nfs protocol provision volume failed of "vnetName or location is empty"
- [OCPBUGS-6869](#)  - Whereabouts kubeconfig known to expire
- [OCPBUGS-29201](#)  - [Custom DNS] API_URL and API_INT_URL are not resolvable
- [OCPBUGS-37193](#)  - [release-4.18] Pod running on a node on which egress IPv6 is assigned, not able to communicate with k8s service in a dual stack cluster.
- [OCPBUGS-44992](#)  - bump openshift/api in remaining csi driver operators
- [OCPBUGS-45637](#)  - [4.18] Ensure ironic caches node information after successful cleaning/servicing
- [OCPBUGS-46410](#)  - Upgrade failing because custom scc in version pod
- [OCPBUGS-46533](#)  - additional network ignored on SingleStackIPv6 IPI installation
- [OCPBUGS-48113](#)  - The cluster storage operator is in a degraded state because it is unable to find the UUID for the Windows node.
- [OCPBUGS-48240](#)  - [IBMCloud] remove the VM type which test failed from tested_instance_types
- [OCPBUGS-48246](#)  - Static pod node controller can overwrite nodestatuses with stale information
- [OCPBUGS-48329](#)  - machine-config-daemon pod not picking up on label and mcp change to push out new rendered- config
- [OCPBUGS-48344](#)  - Static pod revision controller can fail to observe its most recent write and try to decrease latest revision
- [OCPBUGS-48405](#)  - Volume group snapshot feature is disabled in snapshot operator
- [OCPBUGS-48412](#)  - [Pre-Merge-Testing] OVN pods crashed after restarting when configuring NADs
- [OCPBUGS-48502](#)  - Static pod operator API accepts invalid node statuses and node status transitions
- [OCPBUGS-48524](#)  - Etcd quorum lost during bootstrap because two static pod installers trigger concurrent rollouts
- [OCPBUGS-48609](#)  - ocp upgrade to 4.18 failing due to openstack-manila-csi-controllerplugin-pdb
- [OCPBUGS-48633](#)  - telco openshift-apiserver panic observed
- [OCPBUGS-48671](#)  - [GCP] "destroy cluster" stucks, where additional compute nodes added and without infra_id as their name prefix

- [OCPBUGS-48692](#) - ClusterResourceOverride operator fails to reconcile the clusterresourceoverride-configuration configMap
- [OCPBUGS-48703](#) - Edit route form displays incorrect label for "save"
- [OCPBUGS-48705](#) - Max attached disk number is missing some instance type.
- [OCPBUGS-48757](#) - Add new tested azure arm instances types in installer doc
- [OCPBUGS-48799](#) - Rebase openshift/ocp-release-operator-sdk to upstream operator-framework/operator-sdk v1.38.0
- [OCPBUGS-48802](#) - Spelling of NetworkAttachment Definition is wrong
- [OCPBUGS-48812](#) - [release-4.18] Rebase openshift/ansible-operator-plugins to upstream operator-framework/ansible-operator-plugins v1.36.1
- [OCPBUGS-48829](#) - MCO doesn't recover pool from degraded state
- [OCPBUGS-48837](#) - As an oc-mirror user, I'd like to have ClusterCatalog resource generated for operator catalogs
- [OCPBUGS-48846](#) - v2 unable to delete operator images from oci catalogs mirrored with v1 due to tag convention difference between v1 and v2
- [OCPBUGS-49148](#) - [Nutanix] Installation failed with timeout when uploading images to PC
- [OCPBUGS-49299](#) - OLMv1: Proxy CA mount does not wait until ca-bundle.crt is ready
- [OCPBUGS-49323](#) - openshift/ocp-release-operator-sdk release-4.18 ocpProductVersion does not match OCP version
- [OCPBUGS-49361](#) - The ansible-operator-plugins repo's Pipfile.lock in 4.18 branch is inconsistent with that of the 4.19 branch
- [OCPBUGS-49367](#) - Primary UDN does *not* report the MTU
- [OCPBUGS-49383](#) - Image based installer generating IDS list instead of IDMS manifest
- [OCPBUGS-49404](#) - [4.19] E2E: Add test cases to verify PerPodPowerManagement with PPC
- [OCPBUGS-49437](#) - [4.18] Portworx CSI migration broken without upstream patch
