RHSA-2025:10853 - Security Advisory

Issued: 2025-07-14 Updated: 2025-11-21

[Overview](#)[Updated Images](#)

Synopsis

Red Hat OpenShift Pipelines Release 1.19.0

Type/Severity

Security Advisory: Important

Topic

The 1.19.0 GA release of Red Hat OpenShift Pipelines Operator.. For more details see [product documentation](https://docs.redhat.com/en/documentation/red_hat_openshift_pipelines). [↗](#)

Description

The 1.19.0 release of Red Hat OpenShift Pipelines Operator.

Solution

Red Hat OpenShift Pipelines is a cloud-native, continuous integration and continuous delivery (CI/CD) solution based on Kubernetes resources. It uses Tekton building blocks to automate deployments across multiple platforms by abstracting away the underlying implementation details. Tekton introduces a number of standard custom resource definitions (CRDs) for defining CI/CD pipelines that are portable across Kubernetes distributions.

Fixes

- [SRVKP-5501](#) [↗](#) - implement "displayName" of tasks in webconsole - openshift pipelines

- [SRVKP-7456](#) - Running PipelineRun incorrectly cancelled on PR merge without cancel-in-progress annotation

CVEs

- [CVE-2024-21536](#)
- [CVE-2024-11831](#)
- [CVE-2024-48949](#)
