Overview

When you use this site, Red Hat uses cookies and other technologies which are necessary to enable the basic features of the site to function (Required cookies). Subject to your preferences, Red Hat and its authorized partners may also use cookies to analyze your use of the website to evaluate and improve our performance, to improve our service to you and to personalize your experience (Functional cookies) as well as advertising cookies to show you ads that are more relevant to you (Advertising cookies). We honor the preferences you select.

Updated In

**Synop**

In addition to the services they provide to Red Hat, certain Red Hat authorized partners may also use this data for their own purposes or for targeted advertising. This activity may qualify as a "sale" or "targeted advertising" under certain data protection laws. You can make choices using the buttons below to allow or prevent such uses.

Importa

**Type/**

Security

**Accept default** will keep your preferences set to accept all cookies (Required, Functional and Advertising), which enables us to provide you a personalized web experience and more relevant ads on third party websites. This means that you allow our partners to collect and use this data.

**Topic**

Red Hat  
and ima

**Required Cookies only** will set your cookie preferences to "Required Cookies" only. This will prevent our partners from collecting and using this data but may also prevent us from providing you a personalized web experience and more relevant ads on third party websites. Cookie preferences will provide further information and allow you to customize your cookie settings. Setting your cookie preferences to "Required Cookies only" will opt you out of "sales" and "targeted advertising".

## Description

Red Hat OpenShift Container Platform is Red Hat's cloud computing Kubernetes application platform solution designed for on-premise or private cloud deployments.

This advisory contains the RPM packages for Red Hat OpenShift Container Platform 4.16.34. See the following advisory for the container images for this release:

<https://access.redhat.com/errata/RHBA-2025:1124>

## Security Fix(es):

- [golang.org/x/net/html](https://golang.org/x/net/html): Non-linear parsing of case-insensitive content in

[golang.org/x/net/html](https://golang.org/x/net/html) (CVE-2024-45338)

- jinja2: Jinja has a sandbox breakout through malicious filenames

(CVE-2024-56201)

- jinja2: Jinja has a sandbox breakout through indirect reference to format

method (CVE-2024-56326)

For more details about the security issue(s), including the impact, a CVSS score, acknowledgments, and other related information, refer to the CVE page(s) listed in the References section.

All OpenShift Container Platform 4.16 users are advised to upgrade to these updated packages and images when they are available in the appropriate release channel. To check for available updates, use the OpenShift CLI (oc) or web console. Instructions for upgrading a cluster are available at [https://docs.openshift.com/container-platform/4.16/updating/updating\\_a\\_cluster/updating-cluster-cli.html](https://docs.openshift.com/container-platform/4.16/updating/updating_a_cluster/updating-cluster-cli.html) [↗](#)

## Solution

For OpenShift Container Platform 4.16 see the following documentation, which will be updated shortly for this release, for important instructions on how to upgrade your cluster and fully apply this asynchronous errata update:

[https://docs.openshift.com/container-platform/4.16/release\\_notes/ocp-4-16-release-notes.html](https://docs.openshift.com/container-platform/4.16/release_notes/ocp-4-16-release-notes.html) [↗](#)

## Affected Products

- Red Hat OpenShift Container Platform 4.16 for RHEL 9 x86\_64
- Red Hat OpenShift Container Platform for Power 4.16 for RHEL 9 ppc64le
- Red Hat OpenShift Container Platform for IBM Z and LinuxONE 4.16 for RHEL 9 s390x
- Red Hat OpenShift Container Platform for ARM 64 4.16 for RHEL 9 aarch64

## Fixes

- [BZ - 2330539](#) [↗](#) - CVE-2024-12085 rsync: Info Leak via Uninitialized Stack Contents
- [BZ - 2333122](#) [↗](#) - CVE-2024-45338 [golang.org/x/net/html](https://golang.org/x/net/html): Non-linear parsing of case-insensitive content in [golang.org/x/net/html](https://golang.org/x/net/html)
- [BZ - 2333854](#) [↗](#) - CVE-2024-56201 jinja2: Jinja has a sandbox breakout through malicious filenames

- [BZ - 2333856](#) - CVE-2024-56326 jinja2: Jinja has a sandbox breakout through indirect reference to format method

The Red Hat security contact is [secalert@redhat.com](mailto:secalert@redhat.com). More contact details at <https://access.redhat.com/security/team/contact/>.

The image shows the Red Hat logo (a red hat) and the text "Red Hat" in white on a dark background. To the right of the logo are four social media icons: LinkedIn, YouTube, Facebook, and X. Below the logo and icons is a navigation menu with four items: "Quick Links", "Help", "Site Info", and "Related Sites". Each item has a white downward-pointing chevron icon to its right. The menu items are separated by thin white horizontal lines.
