**RHSA**

**Advis**

When you use this site, Red Hat uses cookies and other technologies which are necessary to enable the basic features of the site to function (Required cookies). Subject to your preferences, Red Hat and its authorized partners may also use cookies to analyze your use of the website to evaluate and improve our performance, to improve our service to you and to personalize your experience (Functional cookies) as well as advertising cookies to show you ads that are more relevant to you (Advertising cookies). We honor the preferences you select.

Overview

Updated In

**Synop**

In addition to the services they provide to Red Hat, certain Red Hat authorized partners may also use this data for their own purposes or for targeted advertising. This activity may qualify as a "sale" or "targeted advertising" under certain data protection laws. You can make choices using the buttons below to allow or prevent such uses.

Moderat

**Type/**

**Accept default** will keep your preferences set to accept all cookies (Required, Functional and Advertising), which enables us to provide you a personalized web experience and more relevant ads on third party websites. This means that you allow our partners to collect and use this data.

Security

**Topic**

**Required Cookies only** will set your cookie preferences to "Required Cookies" only. This will prevent our partners from collecting and using this data but may also prevent us from providing you a personalized web experience and more relevant ads on third party websites. Cookie preferences will provide further information and allow you to customize your cookie settings. Setting your cookie preferences to "Required Cookies only" will opt you out of "sales" and "targeted advertising".

manage

Red Hat build of Keycloak Operator for OpenShift simplifies deployment and management of Keycloak 26.2.6 clusters.

This erratum releases new images for Red Hat build of Keycloak 26.2.6 for use within the OpenShift Container Platform cloud computing Platform-as-a-Service (PaaS) for on-premise or private cloud deployments, aligning with the standalone product release.

## Security fixes:

- Phishing attack via email verification step in first login flow (CVE-2025-7365)
- Privilege Escalation in Keycloak Admin Console (FGAPv2 Enabled) (CVE-2025-7784)

## Solution

Before applying the update, back up your existing installation, including all applications, configuration files, databases and database settings, and so on.

## Affected Products

- Red Hat build of Keycloak Text-only Advisories x86\_64

## Fixes
