Synopsis

Insights proxy Container Image

Type/Severity

Security Advisory: Important

Topic

Initial GA Release of Red Hat Insights proxy

Description

The Insights proxy Container is used by the Insights proxy product RPM and serves as an intermediary between customer systems in disconnected networks, air-gapped systems or systems with no outside connections and Insights.

The Insights proxy routes all Red Hat Insights traffic through itself, providing a layer of privacy and security for disconnected customer systems.

Solution

The Insights proxy container image provided here is downloaded by the Red Hat Insights proxy product RPM.

Before applying this update, make sure all previously released errata relevant to your system have

been applied.

The image shows the Red Hat logo and a navigation menu. The logo consists of a red fedora hat icon and the text "Red Hat" in white. To the right of the logo are four social media icons: LinkedIn, YouTube, Facebook, and X. Below the logo and icons is a navigation menu with four items: "Quick Links", "Help", "Site Info", and "Related Sites". Each item has a white downward-pointing chevron icon to its right. The entire navigation menu is set against a dark background.
