## Synopsis

Moderate: multicluster engine for Kubernetes v2.7.7 security update

## Type/Severity

Security Advisory: Moderate

## Topic

The multicluster engine for Kubernetes 2.7 General Availability release images, which add new features and enhancements, bug fixes, and updated container images.

## Description

The multicluster engine for Kubernetes v2.7 images

The multicluster engine for Kubernetes provides the foundational components that are necessary for the centralized management of multiple Kubernetes-based clusters across data centers, public clouds, and private clouds.

You can use the engine to create new Red Hat OpenShift Container Platform clusters or to bring existing Kubernetes-based clusters under management by importing them. After the clusters are managed, you can use the APIs that are provided by the engine to distribute configuration based on placement policy.

## Solution

For multicluster engine for Kubernetes, see the following documentation for details on how to install the images:
