

# RHSA-2025:21994 - Security Advisory

Issued: 2025-11-24

Updated: 2025-11-24

[Overview](#)[Updated Images](#)

## Synopsis

A Subscription Management tool for finding and reporting Red Hat product usage

## Type/Severity

Security Advisory: Important

## Topic

A Subscription Management tool for finding and reporting Red Hat product usage

## Description

Red Hat Discovery, also known as Discovery, is an inspection and reporting tool that finds, identifies, and reports environment data, or facts, such as the number of physical and virtual systems on a network, their operating systems, and relevant configuration data stored within them. Discovery also identifies and reports more detailed facts for some versions of key Red Hat packages and products that it finds in the network.

## Solution

The containers required to run Discovery can be installed through discovery-installer RPM. See the official documentation for more details.

## Fixes

(none)
