A security update is now available for Red Hat JBoss Enterprise Application Platform 8.0. Red Hat Product Security has rated this update as having a security impact of Moderate. A Common Vulnerability Scoring System (CVSS) base score, which gives a detailed severity rating, is available for each vulnerability from the CVE link(s) in the References section.

描述

Red Hat JBoss Enterprise Application Platform 8 is a platform for Java applications based on the WildFly application runtime. This release of Red Hat JBoss Enterprise Application Platform 8.0.7 serves as a replacement for Red Hat JBoss Enterprise Application Platform 8.0.6, and includes bug fixes and enhancements. See the Red Hat JBoss Enterprise Application Platform 8.0.7 Release Notes for information about the most significant bug fixes and enhancements included in this release.

Security Fix(es):

- org.wildfly/wildfly-elytron-oidc-client-subsystem: OIDC Authorization Code Injection (CVE-2024-12369)
- org.wildfly.core/wildfly-server: Wildfly improper RBAC permission (CVE-2025-23367)

For more details about the security issue(s), including the impact, a CVSS score, acknowledgments, and other related information, refer to the CVE page(s) listed in the References section.

解决方案

Before applying the update, make sure all previously released errata relevant to your system have been applied. Also, back up your existing installation, including all applications, configuration files, databases and database settings. For details on how to apply this update, refer to:
