## RHSA-2026:0722 - Security Advisory

Issued: 2026-01-15    Updated: 2026-01-20

[Overview](#)[Updated Images](#)

### Synopsis

Important: multicluster engine for Kubernetes v2.8.4 security update

### Type/Severity

Security Advisory: Important

### Topic

The multicluster engine for Kubernetes 2.8 General Availability release images, which add new features and enhancements, bug fixes, and updated container images.

### Description

The multicluster engine for Kubernetes v2.8 images

The multicluster engine for Kubernetes provides the foundational components that are necessary for the centralized management of multiple Kubernetes-based clusters across data centers, public clouds, and private clouds.

You can use the engine to create new Red Hat OpenShift Container Platform clusters or to bring existing Kubernetes-based clusters under management by importing them. After the clusters are managed, you can use the APIs that are provided by the engine to distribute configuration based on placement policy.

## Solution

For multicluster engine for Kubernetes, see the following documentation for details on how to install the images:

[https://access.redhat.com/documentation/en-us/red\\_hat\\_advanced\\_cluster\\_management\\_for\\_kubernetes/2.13/html/clusters/cluster\\_mce\\_overview#mce-install-intro](https://access.redhat.com/documentation/en-us/red_hat_advanced_cluster_management_for_kubernetes/2.13/html/clusters/cluster_mce_overview#mce-install-intro)

## Fixes

- [ACM-22367](#) - [MCE 2.8] The Repository/Source Code link for the operator is missing from the operator installation/overview window.
- [ACM-24721](#) - console-mce pod CrashLoopBackOff due to probe failure [release-2.13]
- [ACM-24960](#) - Unable to set the attachDefaultNetwork: false while installing HCP cluster using GUI

## CVEs

- [CVE-2022-21698](#)
- [CVE-2023-44487](#)
- [CVE-2024-24786](#)
- [CVE-2025-30204](#)
- [CVE-2025-47907](#)
- [CVE-2025-7195](#)
- [CVE-2025-58183](#)
- [CVE-2025-9287](#)
- [CVE-2025-9288](#)
