Your Choices About Cookies on this Site

Red Hat Product Security (RHSA) - 2026-03-30
A cookie is a small amount of data that is sent to your browser from a web server and stored on your device. The cookie may be placed by Red Hat or by an authorized third party.

RHSA-2026-03-30
When you use this site, Red Hat uses cookies and other technologies which are necessary to enable the basic features of the site to function (Required cookies). Subject to your preferences, Red Hat and its authorized partners may also use cookies to analyze your use of the website to evaluate and improve our performance, to improve our service to you and to personalize your experience (Functional cookies) as well as advertising cookies to show you ads that are more relevant to you (Advertising cookies). We honor the preferences you select.

Overview
Updated Package
Synopsis
In addition to the services they provide to Red Hat, certain Red Hat authorized partners may also use this data for their own purposes or for targeted advertising. This activity may qualify as a "sale" or "targeted advertising" under certain data protection laws. You can make choices using the buttons below to allow or prevent such uses.

Critical: Recommended
Accept default will keep your preferences set to accept all cookies (Required, Functional and Advertising), which enables us to provide you a personalized web experience and more relevant ads on third party websites. This means that you allow our partners to collect and use this data.

Type/Severity
Security Advisory
Required Cookies only will set your cookie preferences to "Required Cookies" only. This will prevent our partners from collecting and using this data but may also prevent us from providing you a personalized web experience and more relevant ads on third party websites. Cookie preferences will provide further information and allow you to customize your cookie settings. Setting your cookie preferences to "Required Cookies only" will opt you out of "sales" and "targeted advertising".

Topic

An update is now available for Red Hat JBoss Enterprise Application Platform 7.3 for Red Hat Enterprise Linux 7. Red Hat Product Security has rated this update as having a security impact of Important. A Common Vulnerability Scoring System (CVSS) base score, which gives a detailed severity rating, is available for each vulnerability from the CVE link(s) in the References section.

Description

Red Hat JBoss Enterprise Application Platform 7 is a platform for Java applications based on the WildFly application runtime. This release of Red Hat JBoss Enterprise Application Platform 7.3.17 serves as a replacement for Red Hat JBoss Enterprise Application Platform 7.3.16, and includes bug fixes and enhancements. See the Red Hat JBoss Enterprise Application Platform 7.3.17 Release Notes for information about the most significant bug fixes and enhancements included in this release.

Security Fix(es):

- hibernate-core: Hibernate: Information disclosure and data deletion via second-order SQL injection (CVE-2026-0603)
- org.eclipse.jgit: XXE vulnerability in Eclipse JGit (CVE-2025-4949)
- undertow: OutOfMemory when parsing form data encoding with application/x-www-form-urlencoded (CVE-2024-3884)
- cxf: CXF JMS Code Execution Vulnerability (CVE-2025-48913)

For more details about the security issue(s), including the impact, a CVSS score, acknowledgments, and other related information, refer to the CVE page(s) listed in the References section.

Solution

Before applying this update, ensure all previously released errata relevant to your system have been applied. Also, back up your existing installation, including all applications, configuration files, databases and database settings. For details on how to apply this update, refer to: <https://access.redhat.com/articles/11258>
