Why Aimeos?

Aimeos is the ultra-fast, cloud-native eCommerce framework engineered for high concurrency, complex business logic, and uncompromising scalability. Built from the ground up for Laravel and TYPO3, Aimeos powers everything from high-volume direct-to-consumer retail to international wholesale and B2B platforms.

Unlike monolithic legacy platforms burdened by technical debt and prohibitive licensing fees, Aimeos combines a lightweight, modular architecture with enterprise-grade extensibility. Whether you deploy it as a complete turnkey shop, embed eCommerce into an existing CMS, or orchestrate a composable headless setup, Aimeos minimizes infrastructure costs while delivering industry-leading throughput under heavy loads.

What makes Aimeos exceptional?

- **Sub-20ms Render Times & Extreme Scale:** Handle catalogs scaling beyond 1,000,000,000+ products with minimal memory overhead, intelligent multi-
- **Enterprise B2B & Wholesale:** Support custom price lists, volume discounts, quote workflows, ERP/punchout integrations, and complex company
- **Multi-Vendor Marketplaces & Multi-Tenancy:** Launch independent vendor portals, distributed multi-warehouse fulfillment, and localized regional

level caching, and native Elasticsearch integration.

- **API-First & Headless Flexibility:** Decouple your frontend seamlessly via standards-compliant JSON:API and GraphQL endpoints using Next.js, Nuxt, Vue, React, or mobile PWAs.

hierarchy accounts out of the box.

- **100% Open Source & Free for Commercial Use:** Develop without arbitrary feature paywalls, seat fees, or vendor lock-in, backed by the freedom to run monolithic, microservices, or headless architectures.

storefronts within a single instance.

Key Capabilities

Whether building headless storefronts, composable architectures, or enterprise B2B portals, Aimeos provides the flexibility, speed, and scalability modern eCommerce demands:

Multi-vendor marketplaces, multi-channel & multi-warehouse

Launch multi-vendor marketplaces with hierarchical multi-tenancy out of the box using the Aimeos sites extension. Manage distinct vendor portals, regional channels, and decentralized warehouses in a single instance.

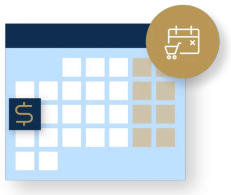

Complex product types, digital downloads & configurable goods

Support any catalog structure with advanced product management: configurable variants, bundles, digital downloads, event bookings, vouchers, and personalized products with flexible attribute pricing templates.

Scalable to 1,000,000,000+ items with sub-20ms rendering

Achieve extreme performance with multi-level caching and the #gigacommerce extension. Integrate Elasticsearch to power enterprise catalogs of over 1 billion items with sub-20ms response times. Read benchmark.

Subscription commerce & automated recurring billing

Monetize physical goods, digital services, or memberships with recurring billing intervals. Aimeos automatically manages subscription renewals and payment gateway captures.

100+ global payment gateways & flexible fulfillment

Integrate with Stripe, PayPal, Mollie, Adyen, and over 100 payment providers via the Omnipay PHP library, combined with flexible shipping and tax calculation rules.

Multi-tenant SaaS eCommerce & merchant networks

Launch multi-tenant SaaS eCommerce platforms hosting unlimited independent merchant stores on one infrastructure. Each tenant receives dedicated product management, inventory, orders, and localized payment options.

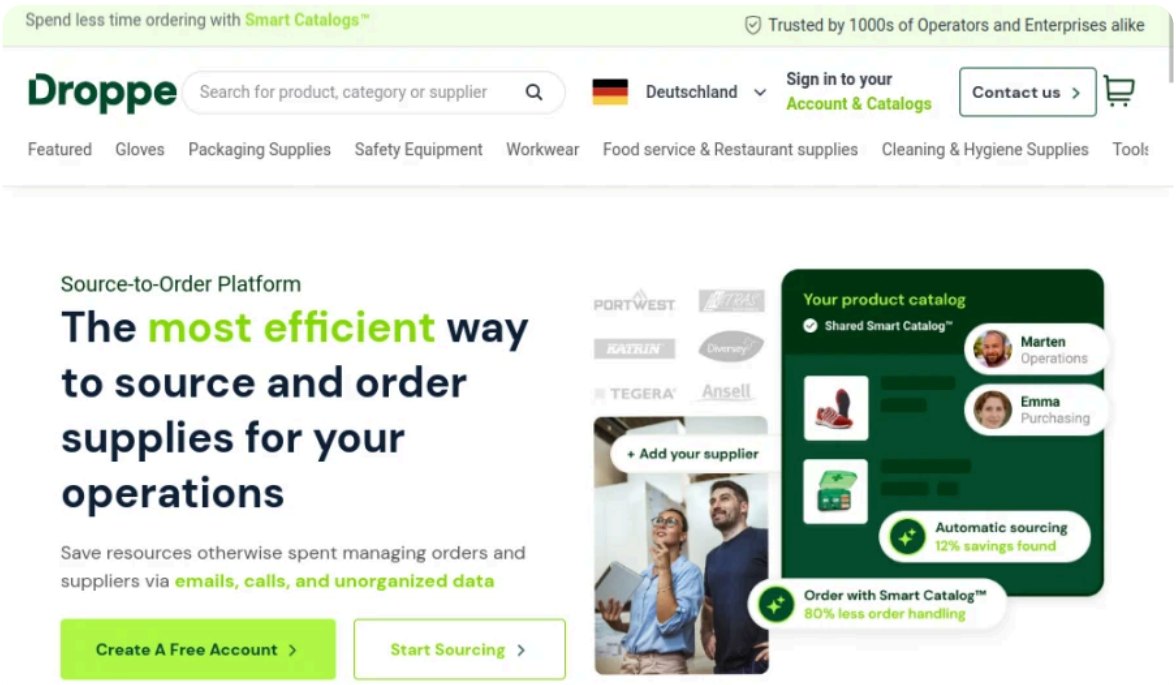

Headless commerce with GraphQL & JSON:API REST

Decouple your frontend with headless eCommerce using standard-compliant JSON:API and GraphQL endpoints. Build modern frontends with Next.js, Nuxt, Svelte, Vue, React, or Progressive Web Apps (PWAs).

Aimeos Showcases

Discover real-world Aimeos showcases featuring online stores, multi-vendor marketplaces, and enterprise B2B portals across diverse industries such as healthcare, industrial manufacturing, mobility, and retail.

What Developers & Businesses Say

“Our old Magento developers could not deliver a working solution in 3 months. Importing 10 million products took days. With two weeks left to our launch date, we decided to start from scratch with Aimeos—best decision ever. In two weeks we launched our platform, and we now import 10 million products in around 30 minutes.”

Ranko M.
CTO, Automotive

“Probably the most scalable eCommerce framework. Very robust and scalable with loading times below every eCommerce system we have seen in the market—super fast! We connected Aimeos with Vue Storefront, creating a PWA-ready eCommerce platform prepared for the future.”

Rubén A.
CEO & Co-Founder, Information Technology

“A robust solution for e-commerce: from simple shops to complex marketplaces, it has a host of features to accommodate every need. Multi-language, multi-currency, multi-site projects with hundreds of thousands of products are seamlessly supported across Laravel and modern PHP frameworks.”

Alessandro M.
Founder & CEO, Food & Beverages

Become an Aimeos Partner

Aimeos partners are first-class specialists in creating or hosting your Aimeos e-commerce project. They have proven their expertise by building top level e-commerce applications using Aimeos.
