Watch on

OVERVIEW

Boost your company's productivity by providing automated service experiences for your employees

SERVICE MANAGEMENT CAPABILITIES

ITIL 4 Best Practices, Certified from Day One

Our ITIL-aligned tool is PeopleCert ATV-certified for 15 ITIL® 4 practices and PinkVerify™-certified for 11 ITSM practices.

Aranda Service Management Aranda Software

User Portal and Self-Service

Offer your customers a platform (web and mobile) for automatically submitting requests, tracking the status of their cases, and accessing self-service resources through the knowledge base.

Knowledge Base

Provide users and agents with a centralized knowledge base containing technical information to help them effectively manage their cases 24/7.

Advanced features

Priority Matrix, Financial Management, Models, Approvals, Import, Export, Satisfaction Surveys.

Artificial Intelligence

Deliver top-notch self-service experiences while reducing your support costs, thanks to generative AI and machine learning capabilities.

ESM Category Multi-Project Support

Expand your ITSM approach by delivering value across your entire organization through the management of multiple projects for service areas outside of IT, without additional costs or infrastructure.

Asset management with built-in CMDB

Consolidate all your assets into a single data repository for the analysis, monitoring, and management of resources throughout their entire lifecycle, thereby optimizing costs and efficiency.

WhatsApp-integrated bot

So that users can report and view cases.

Integrated dashboards and reports

The built-in data reporting and analysis tool allows you to view real-time dashboards of your processes and generate reports to support your business management.

Virtual agent in Microsoft Teams

A chatbot integrated into Microsoft Teams so that users can create and view cases in the Service Desk without leaving Microsoft Teams.

Advanced customization

Tailor the tool to your business needs by adding and editing custom fields on the application form, and apply your branding to the user portal.

**Effective ticket management**

Track all service requests received by your support and customer service departments through an omnichannel service desk, which facilitates centralized ticket management.

**Process automation**

Automate ticket assignment, incident management, problem management, change management, request management, and SLAs using configurable business rules, notifications, and workflows.

**Built-in password recovery**

An integrated solution in ASM for end-user self-management, reset, and administration of passwords.

NATIVE INTEGRATIONS

To further enhance its capabilities, our IT asset management solution integrates natively with our CMDB and advanced reporting solutions.

Aranda CMDB Device Management

Aranda Field Service

Aranda Query Manager

External systems

The Link Between IT and the Business

Automatically keep CMDB configuration items up to date using discovery or changes detected in device inventories from ADM, thereby facilitating the detailed mapping of CI information to the service management processes involving these assets (incidents, requests, problems, changes).

ADVANTAGES**Why Aranda Service Management?**

Unified Web Console

An integrated, centralized suite on a 100% web-based platform, with no need to install a console on the computer.

On-Premise/Cloud Deployment

Implementation tailored to the organization's infrastructure needs and the benefits of each approach.

Quick Implementation

The platform offers default settings, templates, and models to speed up the setup process. It is also possible to bulk upload detailed user and asset information.

Design and Usability

A 100% intuitive interface that's easy to set up, loads quickly, and is user-friendly for everyone.

Local support in Spanish

Specialized support team and certified in the tool with a presence in Latin America.

Aranda Query Manager

Advanced reporting solution and customizable dashboard, included with the ASMS license.

OUR EXPERIENCE

Major companies in the region rely on our solutions:

"Aranda Software has been particularly helpful in centralizing multichannel, enabling new channels of communication between users and the University Department."
