

BackupBliss

Meet the best **Backup & Migration** plugin for WordPress

GET PREMIUM

TRY FREE DEMO

★★★★★ 4.9/5 stars on WordPress.org

WHY "THE BEST"

Easy to use and best UX of all backup & migration plugins. [See it for yourself!](#)

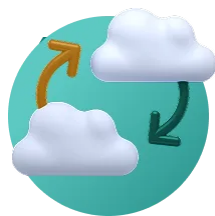

Free 1 GB of storage and [very affordable plans](#) for more

Extremely high backup speed despite being a very light plugin

Tons of features already in the free version

Super-fast migration from one host to another

Top support to tackle also the tricky cases

HOW DOES IT WORK?

GET THE PLUGIN

Get the [free](#) or [premium plugin](#) and then install and activate it like any other WordPress plugin.

2

CLICK ON **“CREATE BACKUP NOW”**

On the plugin's settings page, click on the big "Create backup now" button to create your first backup.

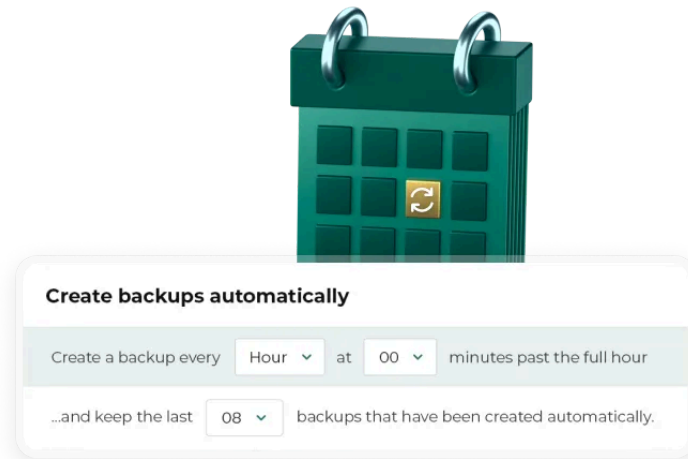

3

SET UP A BACKUP SCHEDULE

Most likely you'll want to have backups created automatically in the future.

For that, click on "Have backups created automatically" and then set your preferred backup schedule.

4 SET UP YOUR STORAGE

Automatically upload your backups to [BackupBliss storage](#), ensuring they're safe no matter what happens to your site or domain!

[Get started now](#) with 1 GB of free storage. If you need more, it's easy to upgrade and [very affordable](#).

That's it! And if you get stuck at any point, we're **happy to help**.

IS THE **PREMIUM VERSION** WORTH IT?

Yes, here's why:

- ✓ **Unlimited backup size:** Create backups without native WordPress limitations!

- ✓ **External storage:** Extra space on BackupBliss + save your backups on OneDrive, pCloud or SFTP (Coming soon: Google Cloud, Backblaze and many more!).
- ✓ **Browse through files:** Define which files/folders should (not) be included in the backup or restore.
- ✓ **Additional backup creation triggers:** Automatic backups before auto-updates or backups triggered by URI.
- ✓ **Additional zipping options:** Save your backups as tar or tar.gz files.
- ✓ **Smart exclusion rules:** Exclude unnecessary weight from backups like cache files, debug logs or post revisions.
- ✓ **Support:** Get prioritized, direct help from our team when you need it.
- ✓ (Coming soon) **Encrypt & password protect your backups** + many more features.

Give yourself a treat...
