jQuery 3.5.0 Released!

Events

(<https://blog.jquery.com/category/events/>)

Posted on [April 10, 2020](https://blog.jquery.com/2020/04/10/jquery-3-5-0-released/) (<https://blog.jquery.com/2020/04/10/jquery-3-5-0-released/>), by [Timmy Willison](https://blog.jquery.com/author/timmywil/) (<https://blog.jquery.com/author/timmywil/>)

Foundation

(<https://blog.jquery.com/category/foundation/>)

jQuery 3.5.0 has been released! As usual, the release is available on [our cdn](https://code.jquery.com/jquery-3.5.0.js) (<https://code.jquery.com/jquery-3.5.0.js>) and the npm package manager. Other third party CDNs will probably have it soon as well, but remember that we don't control their release schedules and they will need some time.

jQuery

jQuery UI

(<https://blog.jquery.com/category/jquery-ui/>)

We hope you're staying healthy and safe while so many of us are stuck at home. With [COVID-19](https://www.cdc.gov/coronavirus/2019-nCoV/) ravaging the planet, we realize that jQuery may not be a high priority for you or the sites you manage. When you do have a moment, we recommend that you review this new version and upgrade.

Projects

Security Fix

Weekly News

(<https://blog.jquery.com/category/weekly-news/>)

The main change in this release is a security fix, and it's possible you will need to change your own code to adapt. Here's why: jQuery used a regex in its `jQuery.htmlPrefilter` (<https://api.jquery.com/jQuery.htmlPrefilter/>) method to ensure that all closing tags were XHTML-compliant when passed to methods. For example, this prefilter ensured that a call like `jQuery("<div class='hot' />")` is actually converted to `jQuery("<div class='hot'></div>")`. Recently, an issue was reported that demonstrated the regex could introduce a cross-site scripting (XSS) vulnerability.

Recent Posts

jQuery 4.0.0

(<https://blog.jquery.com/2026/01/17/jquery-4-0-0/>)

The HTML parser in jQuery `<=3.4.1` usually did the right thing, but there were edge cases where parsing would have unintended consequences. The jQuery team agreed it was necessary to fix this in a minor release, even though some code relies on the previous behavior and may break. The `jQuery.htmlPrefilter` function does not use a regex in 3.5.0 and passes the string through unchanged.

jQuery 4.0.0 Release

Candidate 1

(<https://blog.jquery.com/2025/08/17/jquery-4-0-0-release-candidate-1/>)

If you absolutely need the old behavior, using the latest version of the [jQuery migrate plugin](https://github.com/jquery/jquery-migrate) (<https://github.com/jquery/jquery-migrate>) provides a function to restore the old `jQuery.htmlPrefilter`. After including the plugin you can call

Second Beta of jQuery

4.0.0

(<https://blog.jquery.com/2024/07/17/second-unsafe-restore-legacy-html-prefilter/>) and jQuery will again ensure beta-of-jquery-4-0-0/) XHTML-compliant closing tags.

Upgrading jQuery:
Working Towards a
Healthy Web
(<https://blog.jquery.com/2024/04/17/upgrading-jquery-working-towards-a-healthy-web/>)

However, to sanitize user input properly, we also recommend using `dompurify` (<https://github.com/cure53/dompurify>) with the `SAFE_FOR_JQUERY` option to sanitize HTML from a user. If you don't need the old behavior, but would still like to sanitize HTML from a user, `dompurify` (<https://github.com/cure53/dompurify>) should be used **without** the `SAFE_FOR_JQUERY` option, starting in jQuery 3.5.0. For more details, please see the [3.5 Upgrade Guide \(https://jquery.com/upgrade-guide/3.5/\)](https://jquery.com/upgrade-guide/3.5/).

jQuery 4.0.0 BETA!
(<https://blog.jquery.com/2024/02/06/jquery-4-0-0-beta/>)

Features

jQuery 3.7.1 Released:
Reliable Table Row
Dimensions
(<https://blog.jquery.com/2023/08/28/jquery-3-7-1-released-reliable-table-row-dimensions/>)

With what we call “positional selectors” being deprecated and [slated for removal in jQuery 4.0 \(https://github.com/jquery/sizzle/issues/293\)](https://github.com/jquery/sizzle/issues/293), we've added the last two necessary replacement methods. Specifically, we've added the `.even()` and `.odd()` methods to replace the `:even` and `:odd` selectors. With these methods in place, we can safely remove these overly complicated selectors in jQuery 4.0.

jQuery 3.7.0 Released:
Staying in Order
(<https://blog.jquery.com/2023/05/11/jquery-3-7-0-released-staying-in-order/>)

Another small feature that we've added to this release is the ability to add a context to `jQuery.globalEval`. This was done as part of fixing [a bug with script execution in iframes \(https://github.com/jquery/jquery/issues/4518\)](https://github.com/jquery/jquery/issues/4518).

jQuery 3.6.4 Released:
Selector Forgiveness
(<https://blog.jquery.com/2023/03/08/jquery-3-6-4-released-selector-forgiveness/>)

Fixes

One bug worth highlighting is [a bug we fixed in the Ajax script transport \(https://github.com/jquery/jquery/commit/da3dd85b63c4e3a6a768132c2a83a1a6eec24840\)](https://github.com/jquery/jquery/commit/da3dd85b63c4e3a6a768132c2a83a1a6eec24840). jQuery used to evaluate any response to a request for a script as a script, which is not always the desired behavior. This is different than other data types where such a convention was fine (e.g. in the case of JSON). jQuery 3.5.0 will now only evaluate successful HTTP responses.

jQuery 3.6.3 Released: A
Quick Selector Fix
(<https://blog.jquery.com/2022/12/20/jquery-3-6-3-released-a-quick-selector-fix/>)

Other bug fixes and improvements include [performance \(https://github.com/jquery/sizzle/pull/453\)](https://github.com/jquery/sizzle/pull/453) improvements (<https://github.com/jquery/sizzle/pull/460>) in Sizzle, support for massive arrays in `jQuery.map` (<https://github.com/jquery/jquery/issues/4320>), [using the native `.flat\(\)` method where supported \(https://github.com/jquery/jquery/commit/2f666c1daba43d26d77d9500db09d528bf66fac8\)](https://github.com/jquery/jquery/commit/2f666c1daba43d26d77d9500db09d528bf66fac8), [a fix for syntax errors in the AMD modules \(https://github.com/jquery/jquery/commit/36b59c9661b7c24bb0271f813d2a02cac44de81a\)](https://github.com/jquery/jquery/commit/36b59c9661b7c24bb0271f813d2a02cac44de81a),

jQuery 3.6.2 Released!
(<https://blog.jquery.com/2022/12/13/jquery-3-6-2-released/>)

several improvements to our testing infrastructure, and more. You'll find the full changelog below.

Deprecations

It wouldn't be a jQuery release without some deprecations. In jQuery 3.5.0, we've put `jQuery.trim` (<https://github.com/jquery/jquery/pull/4461>) on the list. JavaScript's own `String.prototype.trim()` (https://developer.mozilla.org/en-US/docs/Web/JavaScript/Reference/Global_Objects/String/trim) is an easy

replacement for it.

We've also put `AJAX` event aliases (<https://github.com/jquery/jquery/pull/4572>) on the list, they can be replaced by `.on("ajaxStart", ...)` and the like. jQuery Migrate will warn about these now-deprecated methods, but they'll stick around until jQuery 4.0.

February 2024

Upgrading

(<https://blog.jquery.com/2024/02/>) Aside from the change to no longer ensure XHTML-compliant tags for you, we do not expect other compatibility issues when upgrading from a jQuery 3.0+ version. To upgrade, have a look at the new [3.5 Upgrade Guide \(https://jquery.com/upgrade-guide/3.5/\)](https://jquery.com/upgrade-guide/3.5/). If you haven't yet upgraded to jQuery 3+, first have a look at the [3.0 Upgrade Guide \(https://jquery.com/upgrade-guide/3.0/\)](https://jquery.com/upgrade-guide/3.0/).

March 2023

(<https://blog.jquery.com/2023/03/>) The [jQuery Migrate plugin \(https://github.com/jquery/jquery-migrate#migrate-older-jquery-code-to-jquery-30\)](https://github.com/jquery/jquery-migrate#migrate-older-jquery-code-to-jquery-30) will help you to identify compatibility issues in your code. Please try out this new release and [let us know about any issues you experienced \(https://github.com/jquery/jquery/issues\)](https://github.com/jquery/jquery/issues).

December 2022

(<https://blog.jquery.com/2022/12/>) If you can't yet upgrade to 3.5+, Daniel Ruf has kindly provided [patches for previous jQuery versions \(https://github.com/DanielRuf/snyk-js-jquery-565129\)](https://github.com/DanielRuf/snyk-js-jquery-565129).

August 2022

(<https://blog.jquery.com/2022/08/>)

October 2021

Download

(<https://blog.jquery.com/2021/10/>) You can get the files from the jQuery CDN, or link to them directly:

June 2021

March 2021

(<https://blog.jquery.com/2021/03/>) [https://code.jquery.com/jquery-3.5.0.min.js \(https://code.jquery.com/jquery-3.5.0.min.js\)](https://code.jquery.com/jquery-3.5.0.min.js) You can also get this release from npm:

May 2020

(<https://blog.jquery.com/2020/05/>) `npm install jquery@3.5.0`

April 2020

Slim build

(<https://blog.jquery.com/2020/04/>) Sometimes you don't need ajax, or you prefer to use one of the many standalone libraries that focus on ajax requests. And often it is simpler to use a combination of CSS and class manipulation for web animations. Along with the regular version of jQuery that includes the ajax and effects modules, we've released a "slim" version that excludes these modules. The size of jQuery is very rarely a load performance concern these days, but the slim build is about 6k gzipped bytes smaller than the regular version. These files are also available in the npm package and on the CDN:

August 2018

(<https://blog.jquery.com/2018/08/>) [https://code.jquery.com/jquery-3.5.0.slim.js \(https://code.jquery.com/jquery-3.5.0.slim.js\)](https://code.jquery.com/jquery-3.5.0.slim.js)

December 2015

(<https://blog.jquery.com/2015/12/>) **Full changelog:** [3.5.0 \(https://github.com/jquery/jquery/compare/3.4.1...3.5.0\)](https://github.com/jquery/jquery/compare/3.4.1...3.5.0)
Ajax

November 2015

(<https://blog.jquery.com/2015/11/>)

Do not execute scripts for unsuccessful HTTP responses ([#4250](#) (<https://github.com/jquery/jquery/issues/4250>), [#4655](#) (<https://github.com/jquery/jquery/issues/4655>), [da3dd85b](https://github.com/jquery/jquery/commit/da3dd85b) (<https://github.com/jquery/jquery/commit/da3dd85b63c4e3a6a768132c2a83a1a6eec248>))

September 2015

(<https://blog.jquery.com/2015/09/>)

Overwrite s.contentType with content-type header value, if any ([#4119](#) (<https://github.com/jquery/jquery/issues/4119>), [065143c2](https://github.com/jquery/jquery/commit/065143c2) (<https://github.com/jquery/jquery/commit/065143c2e93512eb0c82d1b344b71d06eb7cf0>))

July 2015

(<https://blog.jquery.com/2015/07/>)

Deprecate AJAX event aliases, inline event/alias into deprecated ([7a3cf9c0](#) (<https://github.com/jquery/jquery/commit/7a3cf9c03cc34d5493383852f94d96fe4a3486ef>))

April 2015

(<https://blog.jquery.com/2015/04/>)

March 2015

(<https://blog.jquery.com/2015/03/>) **Build**

February 2015

(<https://blog.jquery.com/2015/02/>)

Resolve Travis config warnings ([7506c9ca](#) (<https://github.com/jquery/jquery/commit/7506c9ca62a2f3ef773e19385918c31e9d62d41>))

January 2015

(<https://blog.jquery.com/2015/01/>)

Enable ESLint one-var rule for var declarations in browser code ([0fdffd82](#) (<https://github.com/jquery/jquery/commit/0fdffd829000bffc37e4d32683a8881121faa767>))

December 2014

(<https://blog.jquery.com/2014/12/>)

Test the no-Sizzle build on Travis ([362075ae](#) (<https://github.com/jquery/jquery/commit/362075aeaa269f27ba2c2832026f211c2767d01>))

October 2014

(<https://blog.jquery.com/2014/10/>)

Update .mailmap & AUTHORS.txt ([19f2dcba](#) (<https://github.com/jquery/jquery/commit/19f2dcbaa352e2607ea300a5f49f2dbbcb7986b1>))

September 2014

(<https://blog.jquery.com/2014/09/>)

Tests: Fix custom build tests, verify on Travis; name Travis jobs ([d525ae34](#) (<https://github.com/jquery/jquery/commit/d525ae3416417186330bb3d14133df84509803>))

August 2014

(<https://blog.jquery.com/2014/08/>)

Lint the minified jQuery file as well ([#3075](#) (<https://github.com/jquery/jquery/issues/3075>), [37df5cdf](https://github.com/jquery/jquery/commit/37df5cdf) (<https://github.com/jquery/jquery/commit/37df5cdf4e79d81448706c6e7d85d1fdaff48a1e>))

July 2014

(<https://blog.jquery.com/2014/07/>)

Make Karma work in AMD mode ([46c284b1](#) (<https://github.com/jquery/jquery/commit/46c284b12b4ac89727b1b7a0d5497bc9149cc2>))

May 2014

(<https://blog.jquery.com/2014/05/>)

Create a `grunt custom:slim` alias for the Slim build ([4cbdc745](#) (<https://github.com/jquery/jquery/commit/4cbdc745cc32f0fb8865139df7caad075b05d2bfc>))

April 2014

(<https://blog.jquery.com/2014/04/>)

Run tests on Travis only on browsers defined in the config ([471b0043](#) (<https://github.com/jquery/jquery/commit/471b004326bec0ee9ed8dd9ca1d3d58510d280>))

March 2014

(<https://blog.jquery.com/2014/03/>)

Run tests on Firefox ESR as well ([0a73b94a](#) (<https://github.com/jquery/jquery/commit/0a73b94a21d4c30b5598b95923dc73d640e07b>))

January 2014

(<https://blog.jquery.com/2014/01/>)

Run tests on Node.js 13 in addition to 8, 10 & 12 ([64c1fcc1](#) (<https://github.com/jquery/jquery/commit/64c1fcc1cda975e18679e74368347854d475bef>))

December 2013

(<https://blog.jquery.com/2013/12/>)

Drop workarounds for Node.js 6 in Gruntfile.js ([9f4204ec](#) (<https://github.com/jquery/jquery/commit/9f4204ecad9daffbc952cc2e52f8978f0dead39c>))

Run tests on Travis on FirefoxHeadless as well ([ad3c2efa](#) (<https://github.com/jquery/jquery/commit/ad3c2efa10a9d89506f86ef22fe477fd7efad6d5>))

said:

I had to move from 3.5 back to 3.4.1 because my Bootstrap 4 navbar would not work. I am using Rails 6, Ruby 2.7.1. Is this an issue you will be fixing soon? Interested because I'm getting a notice of a security vulnerability in 3.4.1.

Thank you.
