TEJ RATHI 2023-07-03 05:10:52 UTC

[Description](#)

Coredns mishandling of CI bit: CD bit response is cached and served later

What happened:

If CD bit is set in query, it disables validation at remote server

What you expected to happen:

CD queries may pass, but the same answer must not be served to queries without CD bit set

<https://github.com/coredns/coredns/issues/6186>
