[Comment 1](#)

Please remove the Embargoed keyword in the title.

This issue is already open by upstream, so it doesn't make sense to have it embargoed here.

Dhananjay Arunesh 2023-09-25 08:54:06 UTC

[Comment 11](#)

Please reconsider the Fedora open bugs.

I've just checked the version we have in Fedora (10.5.21, 10.6.14, 10.7.7, 10.8.6 and 10.9.4). Upstream claims the CVE is fixed in the versions (10.5.17, 10.6.9, 10.7.5, 10.8.4). They don't even mention the 10.9 version is affected.

This means we have had our Fedora packages fixed for a long time and that these bugs didn't even have to be reported. If there isn't another source proving otherwise, please close these bugs so they don't confuse us.
