OSIDB Bzimport  2024-11-14 13:12:54 UTC[Description](#)

A vulnerability was found in `podman build` and `buildah`. Container breakout by using `--jobs=2` and race condition when building a malicious Containerfile. It might be mitigated by SELinux, but even with SELinux on it still allows enumeration of files and directories on the host.

TEJ RATHI 2025-01-22 04:32:41 UTC
