OSIDB Bzimport  2025-10-09 06:46:27 UTC[Description](#)

Integer overflow vulnerability in the XkbSetCompatMap() function of the X.Org X server and Xwayland. The XkbCompatMap structure uses unsigned short values for some fields but fails to verify that input sums do not exceed the valid range. Crafted XkbSetCompatMap requests can trigger arithmetic overflow, potentially corrupting memory and causing the X server to crash.
