Jan Lieskovsky	2009-10-17 13:25:40 UTC	Description
<p>It was found that Red Hat Network (RHN) Satellite and Spacewalk services did not protect against Cross-Site Request Forgery (CSRF) attacks. If an authenticated RHN Satellite or Spacewalk service user visited a specially-crafted web page, it could lead to unauthorized command execution with the privileges of that user, for example, creating a new user account, granting administrator privileges to user accounts, disabling the account of the current user, and so on.</p> <p>Acknowledgements:</p> <p>Red Hat would like to thank Christian Johansson of Bitsec AB and Thomas Biege of the SUSE Security Team for independently reporting this issue.</p>		

Jan Lieskovsky	2011-06-16 12:52:08 UTC	Comment 47
<p>This issue affects the versions of the spacewalk-java package, as shipped with Red Hat Network Satellite Server version 5.3.0, and 5.4.0.</p>		

Jan Lieskovsky	2011-06-16 12:54:49 UTC	Comment 48
<p>Statement:</p> <p>Vulnerable. This issue has been addressed in Red Hat Network Satellite Server v 5.4.1 via RHSA-2011:0879 https://rhn.redhat.com/errata/RHSA-2011-0879.html. This issue is not planned to be fixed in Red Hat Network Satellite Server version 5.3.0.</p>		

errata-xmlrpc	2011-06-16 19:01:15 UTC	Comment 50
<p>This issue has been addressed in following products:</p>		
<p>Red Hat Network Satellite Server v 5.4</p>		

Via RHSA-2011:0879 <https://rhn.redhat.com/errata/RHSA-2011-0879.html>
