[Description](#)

Derek Higgins (derekh) reports:

puppetlabs-cinder / manifests / base.pp as used in OpenStack packstack uses unsafe file permissions (mode 0644) for various config files (cinder.conf and api-paste.ini) which can result in authorization credentials being exposed to local attackers.

External references:

<https://github.com/puppetlabs/puppetlabs-cinder/blob/master/manifests/base.pp#L31>
mode => '0644',

Kurt Seifried 2013-02-08 05:48:51 UTC

[Comment 3](#)

Fix for this issue:

<https://github.com/puppetlabs/puppetlabs-cinder/commit/7da792fbd40c0e6eae1ee093aa00e0b177bd2ebc>

Derek Higgins 2013-02-08 13:20:15 UTC

[Comment 4](#)

This covers cinder.conf but I think api-paste.ini should also be included. It contains the cinder auth credentials for keystone.

Murray McAllister 2013-02-24 21:49:35 UTC
