> Vulnerability in Fudo Enterprise software

20 April 2026 | [CERT Polska](#) | [#vulnerability](#), [#warning](#), [#cve](#).

CVE ID	CVE-2025-13480
Publication date	20 April 2026
Vendor	Fudo Security
Product	Fudo Enterprise
Vulnerable versions	From 5.5.0 through 5.6.2
Vulnerability type (CWE)	Incorrect Authorization (CWE-863)
Report source	Report to CERT Polska

Description

CERT Polska has received a report about vulnerability in Fudo Enterprise software and participated in coordination of its disclosure.

The vulnerability [CVE-2025-13480](https://www.cve.org/CVERecord?id=CVE-2025-13480): Fudo Enterprise in versions from 5.5.0 through 5.6.2 allows low privileged users to access certain administrator-only resources via improperly protected API endpoints. This includes sensitive information such as system logs and parts of system configuration settings.

This vulnerability has been fixed in version 5.6.3

Credits

We thank Fudo Security company for reporting the vulnerability.

More about the coordinated vulnerability disclosure process at CERT Polska can be found at <https://cert.pl/en/cvd/> (<https://cert.pl/en/cvd/>).

Social media

CERT Polska is a team operating within the structures of NASK - National Research Institute, established in 1996 to respond to computer security incidents. It carries out the role of CSIRT NASK, one of three such teams operating at the national level within the Polish national cybersecurity system.
