WAGO: Multiple Vulnerabilities in WAGO Solution Builder and WAGO Device Sphere

VDE-2026-010

Last update	30.03.2026 09:00
Published at	30.03.2026 09:00
Vendor(s)	WAGO GmbH & Co. KG
External ID	VDE-2026-010
CSAF Document	Download ↗

Summary

Multiple vulnerabilities have been identified in WAGO Solution Builder and WAGO Device Sphere that affect components responsible for authentication and system communication.

Impact

The identified vulnerabilities could enable unauthorized parties to gain access to protected system areas or bypass intended security controls. This may expose sensitive data and reduce overall system trustworthiness if not promptly addressed.

Affected Product(s)

Model no.	Product name	Affected versions
	Device Sphere	1.2.1, vers:generic/<1.2.2
	Solution Builder	vers:generic/<2.4.2, 2.4.1

Vulnerabilities

[Expand / Collapse all](#)

CVE-2025-55315

9.9

CVE-2026-2328

7.5

Remediation

Update to WAGO Device Sphere version 1.2.2. and WAGO Solution Builder version 2.4.2

Acknowledgments

WAGO GmbH & Co. KG thanks the following parties for their efforts:

- CERTVDE for coordination (see <https://certvde.com> ↗)
- Marvin Ramsperger from SySS GmbH for reporting

Revision History

Version	Date	Summary
1.0.0	30.03.2026 09:00	Initial release.
