NORTH

North 2: Enterprise AI without compromises

North 2 is Cohere's biggest upgrade yet — unifying enterprise-grade security, intelligence, cost governance, and full-stack control into a single agentic AI platform that runs wherever your data lives.

Unify security, intelligence, governance, and control in Cohere's agentic AI platform that runs where your data lives.

Organizations that trust us

RACLE DELL Technologies RBC LG CNS FUJITSU Bell

Agents

Empower agents with your organization's knowledge — wherever its stored.

Automations

Build automations with natural language and monitor with analytics.

Skills

Reusable capabilities agents can call on, so no employee wastes time rebuilding logic.

Libraries

Shared knowledge and assets the whole org can draw from.

Applications

Prototype and ship decks, dashboards, documents, and apps from chat.

Memory

Keep context, instead of starting cold every time.

Guardrails

Control where and how users interact with AI — and when flags need to be raised.

Admin

Your control panel for managing at a systems-level, down to users and agents.

cohere

ADVANCED SEARCH AND RETRIEVAL

Discover

From basic Q&A to complex decision making, North surfaces verifiable insights grounded in your company's unique knowledge graph.
