Vulnerability Details

CVE-2026-6264

Severity: CVSS:3.1/AV:N/AC:L/PR:N/UI:N/S:U/C:H/I:H/A:H (9.8 Critical)

A critical vulnerability has been found in the Talend JobServer and Talend Runtime that allows unauthenticated remote code execution

The attack vector for this vulnerability is the JMX monitoring port of the Talend JobServer. The vulnerability can be mitigated for the Talend Jobserver by requiring TLS client authentication for the monitoring port. However, the patch will need to be applied to fully mitigate the vulnerability.

For Talend Runtime, the vulnerability can be mitigated by disabling the JobServer JMX monitoring port, which is disabled by default from the 8.0 R2024-07-RT patch.
