

Important: This website is now read only (except to admins) to comply with the UK Online Safety Act. Composr CMS is in the process of migrating to a new Constitutional governance model and Bazaar development model, with functionality of the old website (constructed by ocProducts Ltd, the prior copyright holder, a UK company) spread between [GitLab](#) and the [new website](#) (which has no connections to the UK).

Need a website? Tired of primitive systems that don't meet your requirements?

Composr is Open Source so our community download runs without limits. Our services will give you that critical 'pro edge'.

What is Composr CMS?

Composr is a very flexible CMS with advanced social, interactive and dynamic functionality.

Hundreds of features are available out of the box, as well as building blocks, and further addons (think multi-channel content delivery).

Composr is embraced by Fortune-100 companies, government agencies, and small startups. We make all the best ideas available to everyone.

Create smarter web properties; accelerate time to market

- ➔ Huge integrated feature-set
