v2.9.9 - Oct 25, 2026

Fixes an authenticated privilege-escalation vulnerability in Ak Framework. We recommend updating promptly, particularly on sites allowing registration or access by non-administrator users.

- **[SECURITY]** Framework - Added more strict permission checks for framework AJAX operations.
- **[PLUGIN]** Elements - Tabbed mega menu category items clickable links now
- **[PLUGIN]** BuzzEditor - Added Viral List block "Items per page" pagination option. Example ↗
- **[PLUGIN]** Reaction - Vote bars now scale relative to the leading reaction instead of the total vote count.

v2.9.8 - Oct 16, 2026

- **[NEW]** Added a post gallery slider with thumbnail navigation and native gallery conversion (Theme Options > Post Page > Post Gallery Style). Example ↗
- **[NEW]** Added a post table of contents with per-post control (Theme Options > Post Page, overridable per post, or the [newsy_toc] block).

- **[NEW]** Added a BuddyPress notifications dropdown element to the Header Builder (in Theme Options > Header).
- **[NEW]** Added configurable link color and advanced base colors for headings, text, surfaces and borders (Theme Options > Colors).
- **[PLUGIN]** Elements - Added a rounded corners style option for post modules (Theme Options > Blocks > block Style options).
- **[PLUGIN]** BuzzEditor - Fixed TikTok and Threads embeds for non-admin user submissions.
- **[PLUGIN]** Elements - Improved video URL parsing.
- **[FIX]** Fixed subcategory bar missing on subcategory archive pages.
- **[FIX]** Fixed a number of minor issues.

v2.9.7 - Sep 1, 2026

- **[PLUGIN]** BuzzEditor - Fixed an issue with the tags field in the frontend editor on WordPress 7.1.
- **[PLUGIN]** BuzzEditor - Fixed an issue with the link dialog in the frontend text editor.
- **[PLUGIN]** Voting - Fixed issues with the voting average order filter.
- **[PLUGIN]** Framework - Fixed an issue with update sync logic.
- **[FIX]** Fixed inconsistencies in the theme's editor block typography styles.
- **[FIX]** Fixed a number of minor issues.

v2.9.6 - Aug 21, 2026

- **[NEW]** Added Enable/Disable option to Header and Footer Builder row settings to easily toggle row visibility without removing elements.
- **[NEW]** Added draggable reorder support for single post bottom sections in the Theme Panel.
- **[PLUGIN]** Elements — Added toggle to enable/disable module social share buttons independently from voting buttons.
- **[PLUGIN]** Framework — Added link target option to custom menu item options.
- **[FIX]** Fixed paragraph and text padding alignment for inner-boxed modules while preserving full-bleed images and embeds.

- **[FIX]** Fixed post content image rendering and formatting inside Module 9.
- **[FIX]** Resolved YouTube video embed Error 153 using privacy-enhanced domain and updated iframe permissions.
- **[FIX]** Fixed NSFW toggle cookie persistence, expiration, and server-side state detection.
- **[FIX]** Fixed a number of minor styling and layout issues.

v2.9.5 - Aug 6, 2026

- **[PLUGIN]** WPBakery Page Builder — Updated to version 9.0.1
- **[PLUGIN]** Framework — Fixed an issue where the theme update notification remained visible after the update was completed.
- **[PLUGIN]** BuzzEditor — Fixed an issue that caused the frontend editor to crash for non-admin users when Elementor AI was enabled
- **[PLUGIN]** BuzzEditor — Fixed issues with dragging and reordering quiz block items
- **[PLUGIN]** Elements — Fixed an error that occurred when the Newsy theme was disabled
- **[FIX]** Fixed a number of minor issues

v2.9.4 - Jul 31, 2026

- **[NEW]** Upgrade WPBakery Page Builder to version 9.0
- **[PLUGIN]** BuzzEditor block styles to ensure consistent styling between the editor and the frontend
- **[PLUGIN]** Fixed issue with BuddyPress Followers plugin hooks
- **[FIX]** Fixed an issue with sponsored post custom text
- **[FIX]** Fixed a number of minor issues.

v2.9.3 - May 29, 2026

- **[FIX]** Moved per-page CSS storage from transients to entity meta for better performance

v2.9.2 - May 27, 2026

- **[PLUGIN]** BuzzEditor - Migrated to iframe-safe blocks for better future WordPress stability ↗.
- **[IMPROVEMENT]** More WordPress 7.0 related compatibility.

v2.9.1 - May 24, 2026
