Changelog (Free Version)

3.7.57

October 30, 2026

🛠 Fixes:

- Fixed an issue where shortcodes inside course reviews could be executed on render.
- Minor bug fixes.

3.7.56

October 27, 2026

🚀 New features:

- Added the Students limit setting to the Course Builder (Settings → Access) to cap the number of students who can enroll in a course [PRO]

🛠 Fixes:

- Fixed the main menu being hidden in an OceanWP header built with Elementor Pro.
- Fixed an error message for incomplete Drip Content items; it now reads "Drip Content N is incomplete" [PRO].
- Fixed a PHP Object Injection in the LearnPress migration tool.
- Fixed a Broken Access Control that allowed any logged-in user to view the content of paid lessons without purchasing the course.

3.7.55

October 19, 2026

⬆️ Enhancements:

- Shared certificate links, QR codes and certificate emails now use a unique certificate code instead of the student ID [PRO].
- Improved Matching, Image Matching and Keywords questions generated by AI Lab [PRO].

🛠 Fixes:

- Fixed quiz answers being overwritten when several questions were edited quickly in the Course Builder.
- Fixed duplicate subtitles in Vimeo video lessons.
- Fixed YouTube live stream links not working in video lessons in the Course Builder.
- Fixed an error during registration with some translations, for example Polish.
- Fixed the subscription free trial being available again to students who had already used it [PRO].
- Fixed the Take Note button not appearing after selecting lesson text in mobile browsers such as Chrome [PRO].
- Fixed a PHP warning after signing in with Google [PRO].
- Fixed an issue where adding an existing user as a student on the Manage Students page could change their first name, last name and display name.

3.7.54

October 7, 2026

🚀 New features:

- LMS Migration tool↗.

3.7.53

October 6, 2026

🛠 Fixes:

- Added Quizzes and AI Lab strings for translation.
- Fixed an error in User Account → Gradebook when an instructor has no available courses.
- Fixed an issue where the Take Note button appeared to the right of embedded videos in lessons [PRO].
- Fixed an issue where the "My Points" string was not translatable with WPML String Translation [PRO].
- Stripe cards that require 3D Secure (SCA) now work for one-time course purchases. Payments are processed via PaymentIntents instead of the legacy Charges API.
- Fixed an authenticated (Contributor+) Stored Cross-Site Scripting vulnerability in the admin Payouts list and payout edit screen.
- Restricted creating and editing Payouts to administrators and protected payout data from modification by lower-privileged users.

3.7.52

September 24, 2026

🛠 Fixes:

- Fixed LMS Form Builder custom fields not being available in Email Manager registration templates [PRO].
- Fixed the Group Course student limit setting not being applied correctly [PRO].
- Fixed formatted Quiz Builder answers being marked as incorrect in Fill in the Gap and Keywords questions.
- Fixed Course Builder notice dismissal interfering with other admin notices, including TranslatePress notices.

3.7.51

September 21, 2026

🚀 New features:

- Added Quick Links to the top admin bar for MasterStudy plugin pages.

🛠 Fixes:

- Fixed PDF Lesson rendering issues for Latin characters when Arabic (RTL) text is present.
- Fixed hover notification display for Instructors, Reviews, and Courses in the admin panel.
- Fixed an issue where multiple-choice questions marked correct answers as incorrect when an answer contained a comma.
- Fixed custom course status display in the user account.
- Fixed an issue where Unlimited Attempts in quizzes always displayed 0 attempts.
- Fixed student statistics not loading on public student profiles due to REST API authorization.
- Fixed Composer autoloader warnings caused by unavailable AI Lab files in the PRO package [PRO].
- Fixed the file upload instruction in account settings not being translatable.
- Fixed HTML entities appearing in Course, Lesson, Assignment, Quiz, and Question titles in the admin dashboard.
- Fixed the AI Lab quiz prompt placeholder not being translatable [PRO].
- Fixed translations for trial duration and localized dates on the checkout and Thank You pages [PRO].
- Fixed bulk orders not being deleted from the admin dashboard.
- Fixed quiz pagination disappearing after retaking a quiz.
- Fixed scrolling in the File Manager when selecting an image for a quiz question [PRO].
- Fixed MasterStudy registration incorrectly depending on the WordPress `Anyone can register` setting.
- Fixed Course Builder strings not being discoverable in WPML String Translation.

3.7.50

September 15, 2026

🛠 Fixes:

- Fixed instructor order status [PRO].
- Fixed an `_load_textdomain_just_in_time` notices.
- Fixed the Courses admin page not loading when the site language was set to Deutsch (Sie).
- Fixed pagination in the Events Grid widget.
- Fixed course statuses and levels not being applied or displayed correctly in Elementor widgets.
- Fixed the Upcoming Course card display for instructors in the user account [PRO].
- Fixed the Preview Video showing a “Video source is missing or invalid” error after changing the video source option.
- Fixed the `Allow Instructors to Create Course Subscriptions` setting not being applied correctly [PRO].
- Fixed course price information disappearing from the backend and frontend after updating a course.

🛠 Fixes:

- Resolved an issue where the Enrolled Students page content failed to load for some users.
- Month names were not translated in date filter calendars.
- Course progress was not reset after removing a student from a course.

3.7.15

February 11, 2026

🚀 New features:

- Added the ability to issue certificates based on the course purchase method, such as issuing certificates only for One-Time purchases (Pro).

⬆️ Enhancements:

- The UI of the "Pricing" tab in Course Builder has been improved. Course access types are now organized into separate tabs.
- The "Pricing Info" field has been added to all course purchase methods.

🛠 Fixes:

- When adding a student via "Manage Students" with the Subscriptions add-on enabled, the "Start Course" button was not displayed on the Single Course page for the student (Pro).

3.7.14

January 29, 2026

🛠 Fixes:

- Minor bug fixes

3.7.13

January 28, 2026

🚀 New features:

- Added alphabetical sorting for categories in the courses page filter
- Added a new "Ordering" question type for quizzes

⬆️ Enhancements:

- Improved the layout of email blocks in the Email Manager add-on (Pro)
- Prompt character limits in the AI Lab add-on are now determined by the selected model instead of a shared global limit (Pro)

🛠 Fixes:

- Importing a large number of students via Import/Export in Manage Students occasionally returned server errors and failed to complete
- Single Course pages returned 404 errors when using the Polylang plugin

- The course count filter in the Students section did not function correctly
- Question categories were reset on page reload when using the standalone question editor in the admin panel
- When purchasing LMS products using Japanese Yen with Stripe, extra zeros were added to the payment amount
- Stripe did not allow completing a purchase when a 100% discount coupon was applied (Pro)
- Calendar events were not created for students from Google Meet lessons (Pro)

3.7.12

January 9, 2026

🛠 Fixes:

- Minor bug fixes

3.7.11

January 6, 2026

🛠 Fixes:

- Answer options disappeared after retaking a quiz

3.7.10

December 26, 2025

🛠 Fixes:

- Minor bug fixes

3.7.9

December 25, 2025

🚀 **New features:**

- Built-in discount coupon system for courses, subscriptions, and bundles (Pro)

🛠 **Fixes:**

- Warning messages were displayed on the Course Category creation page
- Admin Commission and Instructor Earnings values were not saved in plugin settings (Pro)
- The "Subscription Only" filter did not display courses with an active subscription setting (Pro)
- An error occurred when students uploaded files in Assignments (Pro)

3.7.8

December 19, 2025

🛠 **Fixes:**

- Minor bug fixes

3.7.7

December 18, 2025

🛠 **Fixes:**

- Minor bug fixes

3.7.6

December 10, 2025

🛠 **Fixes:**

- Minor bug fixes

3.7.5

December 4, 2025

⬆️ **Enhancements:**

- Added a setting to enable or disable the Featured Courses functionality on the site
- Added the ability to create custom course statuses and edit existing ones (name and color) in LMS Settings
- Performance improvements applied to User Account pages
- Compatibility with WordPress 6.9

🛠 **Fixes**:

- Images for Single Choice questions with the Image Select type were not saved
- Video content fields in questions loaded with a delay
- Answer options were not displayed during quiz retake when using LaTeX formulas in questions
- Sale Period functionality did not work properly for Memberships & Subscriptions (Pro)

3.7.4

November 26, 2025

🛠 **Fixes:**

- Minor bug fixes

3.7.3

November 19, 2025

🚀 **New features:**

- Introduced a new Elementor widget — Courses Category with 6 layout styles

⬆️ **Enhancements:**

- Automatic HEX to RGBA color conversion added in Base Colors settings
- In the admin panel, the "View" button in the Courses Category section now links correctly to the corresponding front-end page
- Expanded the input area for Fill the Gap answers on mobile devices

🛠 **Fixes**:

- Setting a Sale Price of 0 in Course Builder did not make the course free
- Fill the Gap questions did not accept words containing special characters such as ě, š, č, ř, ž, ý, á, í, é
- The "Your Enrollment has Been Cancelled" email was incorrectly sent to the admin when a student was removed via the Students section

3.7.2

November 14, 2025

🛠 **Fixes**:

- Minor bug fixes.

3.7.1

November 12, 2025

🛠 **Fixes**:

- Minor bug fixes.

3.7.0

November 10, 2025

🚀 **New features:**

- Subscription Add-on [PRO]
- Tax functionality for course sales [PRO]

- "Personal Information" fields added to the checkout form [PRO]

🛠 **Fixes**:

- .dng files could not be uploaded via the Media File Manager add-on (Pro)
- User logo was not displayed in the Elementor Testimonials widget if only one testimonial was added
- Icon color could not be customized in the first style of the Elementor Testimonials widget

3.6.28

October 23, 2025

🛠 **Fixes**:

- Resolved an issue where answers disappeared during quiz retakes when the "Randomize Answers" option was enabled
- Minor bugfix

3.6.27

October 21, 2025

🛠 **Fixes**:

- Minor bug fixes

3.6.26

October 16, 2025

🚀 **New features:**

- Added an option to shuffle answer choices in quizzes

🛠 **Fixes**:

- Previously purchased courses via a membership plan were not accessible after repurchasing the same plan
- Explanations were not displayed for questions from the Question Bank during quiz attempts
- The "Access" menu item in Course Builder was hidden from instructors if the Trial Courses add-on was not enabled by the admin
- Images were not displayed in the Notice section of the Single Course page
- Bulgarian-language certificates contained unwanted spaces in the text (Pro)

3.6.25

October 8, 2025

⬆️ **Enhancements:**

- Zoom Conference Add-on now includes built-in Zoom settings and no longer depends on the eRoom plugin to create or manage meetings (PRO).

🛠 **Fixes**:

- On multilingual sites, the "Popular Courses" and "Related Courses" blocks displayed courses that did not match the user's selected language

3.6.24

September 29, 2025

⬆️ **Enhancements:**

- Courses can now be searched by pressing "Enter/Return" in the Elementor "Courses Searchbox" widget — previously, only the search icon triggered the search

🛠 **Fixes**:

- Resolved an issue with infinite page reloading in the Elementor editor
- Empty video blocks were displayed in video lessons, even when no video was inserted for YouTube or Vimeo source types

- Rating stars and checkboxes overlapped text in the course archive filter when using RTL layout
- The Elementor "Courses Searchbox" widget no longer suggests inserting an account password into the search field
- Exported course content was not being assigned to the course after importing via the WordPress Importer plugin

3.6.23

September 24, 2025

⬆️ **Enhancements:**

- Added an option to enable a site policy agreement checkbox at checkout
- Added a course rating option for students in the final screen of the Course Player, without requiring navigation to the Single Course page
- AI Lab add-on now includes new models — GPT-5, GPT-5 Mini, and GPT-5 Nano (Pro)

🛠 **Fixes**:

- Removed the blog property from lessons in the Course Player
- Resolved an issue with purchased courses not displaying correctly in different languages on the Enrolled Courses page when using WPML
- The “Points cut after retake (%)” setting was not applied during quiz retakes
- The Countdown widget did not pull time settings from WordPress settings

3.6.22

September 18, 2025

🛠 **Fixes**:

- The timer was not displayed on the Enrolled Courses page for courses with a time limit enabled

3.6.21

September 11, 2025

🛠 **Fixes**:

- Minor bug fixes

3.6.20

September 3, 2025

🚀 **New features:**

- Added the ability to change the status of multiple orders using Bulk Actions

🛠 **Fixes**:

- Child categories were not included in course counts for parent categories in the Courses Categories widget
- Instructors could access other users media files in the WordPress media library
- The Open Sans font did not display certain characters in the Czech language

3.6.19

August 20, 2025

🚀 **New features:**

- [DEV] Introduced new Custom Field types in Course Builder — Time and TinyMCE text editor

⬆️ **Enhancements:**

- Payment currency for Stripe and PayPal is now selected under eCommerce → Currency via a new “Transactions currency” setting

🛠 **Fixes**:

- “Back to Course” button always redirected to the default site language when using WPML
- Quiz answers containing only the number "0" were not displayed correctly
- Order statuses and payment system names were not translated on Orders, My Sales, My Orders, and Thank You page
- Courses with a "Time Limit" setting could not be purchased again via WooCommerce Checkout (Pro)
- Courses could not be purchased via WooCommerce Checkout if previously bought through Paid Memberships Pro and the subscription was scheduled to end or be canceled (Pro)

3.6.18

August 14, 2025

🚀 **New features:**

- Added functionality to send reminder emails to students who haven’t logged in for a prolonged period (Pro)
- Tooltips added to email templates within the Email Manager (Pro)
- Course rejection functionality added — administrators can reject submitted courses directly via Course Builder and the admin panel (Pro)
- A new email template “Course Rejection,” has been added to notify instructors when their course is rejected by an admin (Pro)

⬆️ **Enhancements:**

- Added WhatsApp sharing option to “Share Course” and “Share Public Profile” buttons
- Child categories now appear beneath their parent categories in the Questions Category section, visually separated for clarity
- The terms “words” and “characters” in Course Builder text editors are now translatable
- RTL support has been added to the Orders section in the admin panel
- The “View Course” button in the completion popup now redirects to the correct Single Course page.
- Settings for quiz attempt history and retake permissions can be configured individually per quiz

- Emails within the Email Manager add-on are organized by recipient type (Pro)

🛠 **Fixes**:

- Bundle counts in “Reports & Analytics” on the Enrolled Courses page were incorrect when using WooCommerce Checkout (Pro)
- Internal links and anchors within PDF files did not function correctly in PDF Lessons (Pro)Update: Added WhatsApp sharing option to “Share Course” and “Share Public Profile” buttons

3.6.17

August 7, 2025

🚀 **New features:**

- Added the ability to add custom notes to orders.
- Instructors can now add custom notes to orders on the "My Sales" page (Pro)
- Added the ability to filter orders by date.
- Added search functionality for orders by Order ID and user.

⬆️ **Enhancements:**

- Enhanced UI/UX of the "Orders" section in the admin dashboard
- Added eCommerce source selection for LMS in Settings → eCommerce → Checkout (Native or WooCommerce).

🛠 **Fixes**:

- Resolved an issue where course generation via AI Lab occasionally failed during content saving (Pro)

3.6.16

August 5, 2025

🛠 **Fixes**:

- Minor bug fixes.

3.6.15

July 30, 2025

⬆️ **Enhancements:**

- Added an option to change the hover color of course titles in the Elementor "Courses" widget
- Added email-based student search in the "Manage Students" section
- Added the ability to display courses by specific categories in the Elementor "Courses" widget (Grid layout)
- Implemented visual validation for incorrect answers in Keywords questions — incorrect input is highlighted in red with an animation
- Enabled copy and paste functionality in Course Builder text editors using the cursor only
- Support for creating "Image Matching" and "Image Choice" quiz questions added to the AI Lab add-on (Pro)

🛠 **Fixes**:

- Year input fields in Course Builder now restrict input to four digits
- Switching a question from Multiple Choice to Single Choice now clears multiple selected answers
- Removed automatic page scrolling when starting a quiz with a long description
- Corrected time display in Quiz Attempt History
- Fixed incorrect page navigation direction in PDF Lessons in RTL layout (Pro)

3.6.14

July 24, 2025

⬆️ **Enhancements:**

- Redesigned the Bundle creation page (Pro)

- Bundles can now be sold using Points (Pro)
- Bundle cards now show the price in Points (Pro)
- Added a new email template and trigger for Course Expiration Notification for Students (Pro)
- Added 5 new smart-tags to the Assignment Status Change email: {{assignment_result}}, {{assignment_comment}}, {{assignment_mark}}, {{assignment_url}}, {{instructor_name}} (Pro)
- Added a new email template and trigger for Lesson completion notification sent to instructors (Pro)

🛠 **Fixes**:

- The word "Curriculum" was not translated in the mobile version of the Course Player
- On multilingual sites, course enrollment triggered email notifications from all translated course copies
- The "Lost Password?" text on the login page caused layout issues when translated into longer phrases
- Video in video lessons was getting cropped on wide monitors
- Video Preview didn’t work on iOS devices on the Single Course page (Pro)
- The Assignment Status Changed email was sent to students even when the assignment wasn’t reviewed or the status hadn’t changed (Pro)

3.6.13

July 17, 2025

🛠 **Fixes**:

- Minor bug fixes.

3.6.12

July 16, 2025

🚀 **New features:**

- Added a new lesson type — PDF Lesson (Pro)

⬆️ **Enhancements:**

- Added “Required Question” option in quizzes — students won’t be able to finish an attempt without answering required questions
- You can now restrict student access to the WordPress Dashboard using the “Restrict WordPress Dashboard access for instructors and students” setting — previously, this only worked for instructors
- All course-selling related settings are now grouped into a single eCommerce section in LMS Settings
- Optimized Video Preview loading speed on the Single Course page — videos now load only on playback, reducing page load time (Pro)
- Added AI-based duration estimation for the Lesson Duration field via the AI Lab add-on (Pro)

🛠 **Fixes**:

- When re-purchasing an expired Paid Membership plan, access to previously purchased courses was not restored

3.6.11

July 9, 2025

⬆️ **Enhancements:**

- Added new smart-tags to all existing email templates (Pro)
- When adding multiple elements in Certificate Builder, each new element now shifts to the right for easier placement (Pro)

🛠 **Fixes**:

- The Price field no longer remains visible when using the "Affiliate this course" option if "One-time purchase" is disabled in Course Builder (Pro)
- Fixed a deprecated warning in Certificate Builder when using PHP 8.2 (Pro)
- Student registration dates now display correctly in the "Students" section and follow the date/time format from WordPress settings (Pro)

- When adding the same course multiple times to the cart using "WooCommerce Checkout," a checkout error occurred (Pro)
- Quiz attempt results were not showing when instructors viewed student attempt details (Pro)
- Fixed broken Quiz Details link on the Enrolled Quizzes page

3.6.10

July 2, 2025

⬆️ **Enhancements:**

- Added a new "Description" widget for Elementor in the MasterStudy Course widgets group
- Added a "Go to Public Account" button and a "Share Public Profile" button to student and instructor profiles
- Added two new editable email templates for course completion — one for the instructor and one for the student (Pro)
- Added new smart tags to the "Announcement from the Instructor" email for showing course name, student username, and instructor name (Pro)
- Added new smart tags to the "You made a Sale!" email to include the student's email and purchase date in the message body (Pro)
- Added a new editable "Student Enrolled in Course" email template sent to instructors (Pro)
- Added a new editable "Quiz Completed" email template sent to instructors upon quiz completion (Pro)
- You can now disable certificates for any selected course (Pro)
- Global certificates can now be selected in Course Builder — previously, only custom certificates were available (Pro)
- Added the ability to re-generate course content when creating a full course if generation was interrupted or incomplete due to unexpected errors (Pro)

🛠 **Fixes**:

- In Matching question type, identical answer texts now correctly display their respective Explanations — previously, explanations were duplicated for matching answers with the same text

3.6.9

June 25, 2025

🛠 **Fixes**:

- Minor bug fixes.

3.6.8

June 25, 2025

⬆️ **Enhancements:**

- You can now search for images and videos in the Course Builder File Manager with integrated Unsplash, Pexels, and Pixabay support (PRO)
- Subtitles can now be added to video lessons using the HTML or External link source types (PRO)
- Video files in the File Manager now display a preview thumbnail instead of an icon and are marked with a "Video" badge (PRO)
- When generating a full course using the AI Lab add-on, images can now be automatically generated for Text Lessons and Assignments during Curriculum creation (PRO)

3.6.7

June 24, 2025

🛠 **Fixes**:

- Minor bug fixes.

3.6.6

June 18, 2025

⬆️ Enhancements:

- Added editable email template for new user registration sent to the admin (PRO)
- Added editable email template sent to a student when they are removed from a course (PRO)
- Added editable password-reset email template for all users (PRO)
- Added 2 editable email templates for approving or rejecting Become Instructor requests (PRO)
- Added new Grade element to Certificate Builder to show grades for courses, quizzes, and assignments on certificates (PRO)
- Added editable email template for removing a user from a group in Group Courses Addon (PRO)
- AI Lab now generates more accurate content for Title, Content, and Full Article fields (PRO)
- Redesigned the variable insertion panel in email templates (PRO)
- Variables can now be added to email Subjects (PRO)
- Made quiz question overview more user-friendly by allowing questions to collapse
- Added collapse/expand buttons for questions inside quizzes
- Redesigned drag & drop and delete panel for questions in Course Builder
- Optimized question creation speed on the standalone Quiz page and within Course Builder

🔄 Updates:

- Added compatibility with subscription groups

🛠 Fixes:

- Passing Grade now shows the actual value in the Quiz Completed email (PRO)
- Quiz Completed email can now display grades in Points and Grades as well as percentages (PRO)

- Public videos inserted as external VideoPress links now display correctly in video lessons
- Fixed issue where course lessons could disappear after upgrading from version 2.x.x to 3.x.x if course status was Draft, Private, or Pending Review

3.6.5

June 12, 2025

⬆️ **Enhancements:**

- Added 3 new Elementor widgets: Countdown, - Instructors Grid, and Icon Box.
- Restyled the Single Course style selector in plugin settings and in the Courses Category section.
- Added 3 new Single Course styles built entirely with Elementor and fully customizable (PRO).
- Updated the style selection interface for courses in Course Builder.
- You can now assign any Elementor-built page as the Single Course page for a specific course (PRO).
- You can now create your own course page styles using Elementor (PRO).

🛠 **Fixes**:

- Questions disappearing from a Quiz when a co-instructor refreshed the Quiz page in the Course Builder.
- Quiz embedded via the “Online Testing” Add-on was showing the same attempt result to all guests; now each guest sees their own results (PRO).
- User answers in Quizzes not appearing under Manage Students when a student failed to reach the passing score.

3.6.4

June 5, 2025

🛠 **Fixes**:

- Minor bug fixes.

3.6.3

June 5, 2025

🛠 **Fixes**:

- Minor bug fixes.

3.6.2

June 4, 2025

⬆️ **Enhancements**:

- Added a font size control for text editors in Course Builder.
- Added an image resize preview when uploading images in the Course Builder text editor.
- Added a full-width text option in the Course Builder text editor.
- Upgraded the TinyMCE editor in Course Builder to version 6.
- Questions Library now marks questions already included in the quiz.
- Added collapse/expand all lessons button in the Curriculum section.
- Added a Load More button to the Questions Library list.
- Course Builder now supports RTL layouts.
- You can now choose a custom font for Course Builder in MasterStudy settings.
- Added settings to rename the Lesson Materials and Video Questions sections.
- Added an option to hide the Video Questions block in video lessons.
- Question cards in Questions Library now show category and type; spacing between cards improved.
- Added a page to view all current students in the Admin Dashboard and in the instructor’s profile.

🛠 **Fixes**:

- Fixed random lesson order changes after reordering lessons in the Curriculum section of Course Builder.

- Vimeo videos now display correctly in the Questions & Markers area of video lessons.

3.6.1

May 27, 2025

⬆️ **Enhancements:**

- The single-question creation and editing page has been restyled to match the Course Builder
- Added clear tooltips for the Lesson Preview and Points Price settings in the Course Builder
- The Course Builder now shows the total number of questions while you create or edit a quiz
- The Elementor Courses Carousel widget can now display courses from selected categories

🛠 **Fixes:**

- Co-instructors can no longer access Course Builder tabs other than Curriculum in courses they do not own
- Removed the animation that moved a lesson back to the materials section when creating Drip Content links
- Apostrophes now display correctly in the Course Builder instead of Unicode codes
- Renaming a file in Course Materials or Lesson Materials now shows a success or error notification in the Course Builder
- Icons for .docx .doc .mp3 .pptx and .xlsx files now appear in Course Materials and Lesson Materials
- The Pricing section in the Course Builder now accepts prices with more than two decimal places
- The current course is now excluded from the Prerequisites list in the Course Builder
- You can now clear the Level field in the Course Builder
- Resolved several issues when creating or editing questions in the Course Builder
- Math formulas now display correctly in Matching questions when using the MathJax LaTeX plugin
- Fixed a fatal error in the Courses Categories widget when Style 6 was selected

- Result emojis now display correctly when users switch between attempts in a quiz

3.6.0

May 21, 2025

⬆️ Enhancements:

- AI Lab add-on: a powerful AI tool for generating complete courses, lessons, quizzes, thumbnails, and more. (PRO)

🛠 Fixes:

- Graded Student Assignments now appear as completed in the "Curriculum" sidebar of the Course Player (PRO)

3.5.36

May 20, 2025

🛠 Fixes:

- Minor bug fixes.

3.5.34

May 14, 2025

⬆️ Enhancements:

- Added "Help Center" page for quick access to the plugin’s documentation and support resources.

3.5.33

May 8, 2025

🛠 Fixes:

- Minor bug fixes.

3.5.32

May 7, 2025

⬆️ **Enhancements:**

- Optimized database queries, so Single Course pages and the Course Player load faster
- Added the ability to embed knowledge-check quizzes directly into video lessons (PRO)

3.5.31

May 2, 2025

🛠 **Fixes:**

- Fixed the “Disable video seeking” option — viewers can no longer fast-forward or rewind the video. (PRO)
- Added support for translating individual strings and words in the custom Paid Memberships checkout.

3.5.30

April 29, 2025

⬆️ **Enhancements:**

- Added the option to retake a quiz after completion.

🛠 **Fixes:**

- Users can now view the history of quiz attempts in the course player.
- The "Quiz Completed" email subject is now customizable via the Email Manager.
- Resolved issue where courses were not being added to the cart using the LMS Guest Checkout.

3.5.29

April 16, 2025

🔄 **Updates:**

- Added compatibility with WordPress 6.8.

3.5.28

April 15, 2025

🛠 **Fixes:**

- Minor bug fixes.

3.5.27

April 14, 2025

🛠 **Fixes:**

- Minor bug fixes.

3.5.26

April 9, 2025

⬆️ **Enhancements:**

- Added support for instructor comments at specific video timestamps, visible to students as hoverable timeline markers. (Pro)

3.5.25

April 3, 2025

⬆️ **Enhancements:**

- Improved search within course subcategories within the Elementor course archive widget. Search will now give more specific results when both category and subcategory are selected.
- Paid Membership Pro Templates updated.

🛠 **Fixes:**

- Removed the slashes from question titles during creation through the Questions option in the admin dashboard, if the title contained quotes.

3.5.24

March 31, 2025

⬆️ **Enhancements:**

- Improved the quality of the Featured Image on single course page.
- Converted single course elements into widgets for easier custom design of the page.

3.5.23

March 25, 2025

⬆️ **Enhancements:**

- Added compatibility with the Polylang plugin.
- Instructors with admin access can now edit lessons in Elementor.
- Added an option to sort courses by "Coming Soon" in Archive and Grid Elementor widgets.

3.5.22

March 19, 2025

⬆️ **Enhancements:**

- Added a setting to display password strength and enable weak password registration.
- Introduced an option to show or hide the "Have a Question?" form in profile settings.
- Added Google Fonts integration for the Certificate Builder. (Pro)

3.5.21

March 17, 2025

🛠 Fixes:

- Fixed virtual WooCommerce products incorrectly displaying as free when WooCommerce checkout was enabled. (Pro)

3.5.20

March 13, 2025

🛠 Fixes:

- Resolved warnings in the Course Player when adding standalone questions to the question bank.
- The Thank You page now displays correctly for guest checkout in WooCommerce.
- Discounted course prices now always display correctly on the Shop page

3.5.19

March 8, 2025

🛠 Fixes:

- Minor bug fixes.

3.5.18

March 5, 2025

⬆️ Enhancements:

- Added compatibility with WooCommerce High-Performance Order Storage.

🛠 Fixes:

- Fixed an issue in the admin dashboard that happened when user avatars were disabled globally on site.

3.5.17

February 27, 2025

⬆️ Enhancements:

- Replaced the placeholder text in the Lesson Duration field in the course builder for audio, stream, text, video and Zoom lessons.
- Updated the "Become Instructor" email template.
- Updated the "Enterprise Request" email template.
- Improved the price display logic in courses and course cards.
- Added a setting to display popular courses on the single course page.

🛠 Fixes:

- Added the option to translate the word "Category" in the Course Search Box widget.
- Fixed an issue with the Gutenberg editor when adding the Masterstudy Adaptive Container widget.

3.5.16

February 18, 2025

🛠 Fixes:

- Small bug fixes.

3.5.15

February 13, 2025

🚀 New features:

- Added a new page in Analytics to display reports and details about Bundles. (Pro)

⬆️ Enhancements:

- Added a search bar to quickly find settings and options in the plugin settings.
- Updated the content in "Register on the Website" email template. (Pro)
- Updated the content in "Account Premoderation" email template. (Pro)
- Introduced a new email template for notifying users when they receive a certificate. (Pro)

🛠 Fixes:

- Resolved an issue where the header and footer of the Twenty Twenty-Four theme were not displayed on the Single Course Page.
- Corrected the ampersand (&) in Lesson Names in Course Builder, which was displaying as Unicode after reuploading the page.
- Improved compatibility between PMPro, WPML, and MasterStudy LMS for better translation support.
- Fixed an issue where the Login widget in the header did not apply a custom link correctly.

3.5.14

February 6, 2025

⬆️ Enhancements:

- Added support for the File Manager addon to upload WebP, GIF, and SVG file types in the Course Builder.

🛠 Fixes:

- Fixed an issue when selecting a certificate for SCORM courses was not possible.

3.5.13

February 3, 2025

🚀 New features:

- Added video and audio progression tracking to monitor watched time for video and audio lessons. (Pro)
- Added Strict Mode for video lessons, ensuring the 'Complete' button unlocks only after the video is fully watched. (Pro)
- Introduced the option to add timecodes to audio and video lessons for easy navigation: see ↗ (Pro)

🛠 Fixes:

- Fixed an issue where recorded audio in Assignments could not be played until a reply was sent. (Pro)

3.5.12

January 30, 2025

⬆️ Enhancements:

- Redesigned the LMS Checkout page for improved user experience.
- Improved the design of the Profile Menu for better navigation.

🛠 Fixes:

- Fixed minor bugs in the Profile Menu Elementor widget.
- Resolved an issue where True & False quiz questions appeared as False & False in Spanish.

3.5.11

January 23, 2025

🛠 Fixes:

- Fixed a conflict with the GDPR plugin from WebToffee.
- Fixed a conflict with the CookieYes plugin.

3.5.10

January 16, 2025

🚀 New features:

- Added an option in User Account Settings to set a public Display Name: see↗

⬆️ Enhancements:

- Redesigned the Course Page Style selection in the Wizard for easier customization.
- Centered the Show More button in Course Reviews for better alignment.
- Renamed the Announcement tab to Notice in the Single Course view.

🛠 Fixes:

- Removed the maximum width of the Submit Quiz button in Online Testing.
- Fixed pagination issues in Manage Students when student numbers exceed 10,000.
- Resolved an issue where students signed up for Coming Soon courses didn’t appear in Manage Students.
- Fixed a conflict with the GDPR Cookie Consent plugin from WebToffee.
- Corrected True/False quiz questions in the course player not translating.
- Added lazy loading for course images in Gutenberg blocks.
- Corrected an Italian translation issue in the Grades settings.

3.5.9

January 13, 2025

🛠 Fixes:

- Fixed a fatal error that occurred when adding a new question to a quiz without the Course Builder.
- Resolved an issue where purchasing a course with Stripe payment method wasn't working correctly.

3.5.8

January 10, 2025

🛠 Fixes:

- Small bug fixes.

3.5.7

January 8, 2025

🔄 Updates:

- Added compatibility of MasterStudy LMS Free plugin with PHP 8.3.

⬆️ Enhancements:

- Added support for translating strings within JS files.

🛠 Fixes:

- Added option to download e-books via WooCommerce checkout on Thank You and Order Details pages.
- Resolved issue where message text was mixed and sent in one line.
- Fixed issue with moving to a new line in LMS payment descriptions and on the page when selecting payment method.

- Notifications from private messages are now working correctly.
- Addressed issues in LMS settings where Course Card image sizes were not changing and Lazy Load didn't work without the theme and Post Type plugin.
- Fixed border issues and mobile video rendering in the Single Course video preview.
- Sorting functionality in Manage Students section now works correctly.
- Resolved issues with authorization shortcodes and registration for instructors when WPBakery is enabled.
- "Continue" button in Single Course now redirects students to the last viewed lesson.
- Fixed incorrect IDs of lessons and courses in the stm_lms_lesson_started action in the Course Player.
- Resolved issue where the Courses page for Elementor was not generated.
- Fixed duplication of "No Courses Found" when clicking "Show Result" multiple times.

3.5.6

December 26, 2024

🛠 Fixes:

- Small bug fixes.

3.5.5

December 25, 2024

⬆️ Enhancements:

- Added integration with VdoCipher for Video Lessons.
- Introduced Right-to-Left (RTL) support for Course Player components.
- Added Right-to-Left (RTL) support for Course Page Styles.
- Removed the Overall Rating button in Gutenberg widgets when Course Reviews are disabled in plugin settings.
- Added an option to sanitize the Reset Password email.

🛠 Fixes:

- Fixed conflict with the RankMath SEO plugin appearing on Public Profile pages.
- Small bug fixes.

3.5.4

December 19, 2024

🛠 Fixes:

- Small bug fixes.

3.5.3

December 19, 2024

🛠 Fixes:

- Small bug fixes.

3.5.2

December 18, 2024

⬆️ Enhancements:

- Added option to change logo when printing detailed order view in My Sales for LMS payments.
- Moved the Logo Upload option to the plugin’s settings.

🛠 Fixes:

- Corrected an issue where deleted reviews were still applied to the overall course grade.
- Resolved date and time translation issues in the course player’s countdown feature.
- Fixed a fatal error occurring when using widgets after an Elementor update.

3.5.1

December 13, 2024

⬆️ Enhancements:

- Introduced 'All Time' filter for Grades in the table view. (Pro)

🛠 Fixes:

- Small bug fixes.

3.5.0

December 12, 2024

🚀 New features:

- Added a new Grades addon. (Pro)

🛠 Fixes:

- Fixed load_textdomain_just_in_time issue.

3.4.17

December 9, 2024

🚀 New features:

- Added a new email order template in the Orders section for instructors.
- Redesigned Email Order templates for students and admins.

⬆️ Enhancements:

- Enabled sending messages to a student’s public account for direct communication.
- Added ability to translate hardcoded text in the plugin.

🛠 Fixes:

- Resolved a potential math calculation issue in PMPro when writing 'unlimited' instead of 'unlim.'
- Fixed an issue where student email addresses were exposed when uploading comments.
- Resolved an issue where the number of Course categories in admin panel redirected to the Posts page.
- Fixed missing Advanced Tab in Gutenberg editor when plugins are active.
- Fixed multiple issues in the Cart functionality.
- Fixed audio playback issues in audio lessons when lesson materials were present.
- Corrected display issues for single and multi-image choice questions in quiz attempts in Manage Students section.

3.4.16

December 7, 2024

🛠 Fixes:

- Small bug fixes.

3.4.15

November 28, 2024

🛠 Fixes:

- Fixed image versions of Single and Multi Choice questions not displaying in the Question Bank for quizzes.
- Fixed an error appearing below the title bar in quiz lessons for Image Match questions in the Question Bank.

3.4.14

November 25, 2024

⬆️ **Enhancements:**

- Integrated HTML editor for the question title bar in Course Builder for more flexibility.
- Added option to disable course rating globally on the site.

🛠 **Fixes:**

- Fixed an issue where page titles were not displaying correctly on public accounts for students and instructors.

3.4.13

November 20, 2024

🚀 **New features:**

- Introduced new Sales page for instructors to manage course sales. (Pro)

3.4.12

November 14, 2024

🛠 **Fixes:**

- Small bug fixes.

3.4.11

November 8, 2024

🛠 **Fixes:**

- Corrected style 4 for Courses Categories widget.

3.4.10

November 7, 2024

⬆️ **Enhancements:**

- Added public account for students with several display style options.
- Updated and improved the default style for instructor public account.
- Added new visual styles for instructor public account.
- The "Send Message" button in the public account is now visible to guest users, clicking it opens the authorization popup.
- Instructors can now upload a cover image for their public account in Profile settings.
- Added the option to disable both Instructor and Student public accounts.

3.4.9

October 30, 2024

⬆️ **Enhancements:**

- Added visual improvements for My Orders section. (Pro)

🛠 **Fixes:**

- Small bug fixes.

3.4.8

October 28, 2024

🛠 **Fixes:**

- Small bug fixes.

3.4.7

October 21, 2024

⬆️**Enhancements:**

- Introduced a new view for selecting certificates in the course builder. (Pro)

- Added a preview option for a more intuitive user experience. (Pro)

3.4.6

October 14, 2024

⬆️ **Enhancements:**

- Added the option to customize the message text in the Mailchimp widget.
- Added the option to remove stars in Testimonials widget for design flexibility.

🛠 **Fixes:**

- Resolved an issue with the Fill The Gap question type where some Portuguese characters weren’t working properly.
- Fixed the pagination issue in the first Testimonials style, where it was showing content from the wrong tab.
- Small bug fixes.

3.4.5

October 9, 2024

⬆️ **Enhancements**:

- Updated icons for course actions and assignments in Reports and Analytics to improve visual clarity and user experience.

🛠 **Fixes:**

- Corrected the time limit in Coming Soon courses, which previously showed more days than needed.
- Fixed an issue where default pricing settings for a course were not applied until the course author manually saved them.

3.4.4

October 7, 2024

🛠 Fixes:

- Small bug fixes.

3.4.3

October 3, 2024

🛠 Fixes:

- Small bug fixes.

3.4.2

October 2, 2024

🚀 New features:

- Added 2 new styles for the Testimonials Widget to enhance visuals.
- Introduced a Mailchimp widget for easier email marketing integration.
- Launched a new Blog widget featuring news cards with two available styles for dynamic content display.

3.4.1

September 11, 2024

🛠 Fixes:

- Small bug fixes.

3.4.0

August 29, 2024

⬆️ **Enhancements:**

- Added the option to select a specific course page style for each course and course category directly in the Course Builder.
- Introduced an Advanced Analytics feature for course reports, offering detailed insights into Revenue, Engagement, Users, and Reviews (Pro): see ↗

3.3.37

August 14, 2024

🛠 **Fixes:**

- Small bug fixes.

3.3.36

August 13, 2024

🛠 **Fixes:**

- Fixed an issue where the Elementor archive displayed "No Courses" even when courses were available.
- Resolved a problem with Stripe payment failures when purchasing a course.

3.3.35

August 9, 2024

🛠 **Fixes:**

- Small bug fixes.

3.3.34

August 8, 2024

⬆️ **Enhancements:**

- Added a new view for LMS Orders on the page for improved usability.

🛠 **Fixes:**

- Resolved an issue where a combination of special characters could misdisplay a correctly answered question.

3.3.33

August 7, 2024

🛠 **Fixes:**

- Resolved an issue where incorrect Question Bank results were displayed when Randomize was enabled.
- Fixed a bug in the Course Builder that prevented the selection of a course subcategory.
- Corrected an error that appeared after adding a True/False question created through the old editor.

3.3.32

July 31, 2024

🛠 **Fixes:**

- Small bug fixes.

3.3.31

July 31, 2024

⬆️ **Enhancements:**

- Added a setting to disable the registration of new users for better user management.
- Added a setting to allow only enrolled students to leave reviews for courses, enhancing feedback relevance.

🛠 **Fixes:**

- Corrected missing 'Resume' and 'Paused' lines in Loco Translate language settings to ensure proper translation capabilities.

3.3.30

July 26, 2024

🛠 **Fixes:**

- Resolved an issue where the block stretched to the full width of the screen had its border cropped due to scrolling not being accounted for.
- Fixed compression of quiz data when all output data was included, ensuring proper data handling.
- Small bug fixes.

3.3.29

July 19, 2024

🛠 **Fixes:**

- Small bug fixes.

3.3.28

July 17, 2024

⬆️ **Enhancements:**

- Added Social Login to the Sign-Up form for improved accessibility.

- Introduced a banner for one-click ecosystem updates required for MasterStudy upon updating.
- Added translations for plugin features in Italian, German, Portuguese, French, and Spanish (Pro).

🛠 Fixes:

- Resolved an issue where upcoming course timers displayed three-digit numbers as two-digit numbers.

3.3.27

July 9, 2024

⬆️ Enhancements:

- Increased the speed of Elementor layouts by removing global styles.
- Adjusted the position of the upcoming course timer in the Price button card styles for Elementor and Gutenberg.

🛠 Fixes:

- Resolved an issue where Co-Instructors could not be removed from courses.
- Ensured only global styles and scripts load on non-LMS pages.
- Fixed an issue in the Statistics dashboard where only LMS orders were displayed, excluding WooCommerce orders.
- Clarified steps when creating a quiz for better usability.
- Corrected sorting functionality in the Course Grid Gutenberg block to sort courses by search.
- Addressed style conflicts where Carousel styles in Gutenberg blocks overlapped with Elementor navigation styles.
- Made text using esc_html() translatable by adding appropriate text domains.

3.3.26

July 2, 2024

🚀 **New features:**

Added new Instructors Carousel and Courses Search blocks: see↗

⬆️ **Enhancements:**

- Improved child and parent data slot interaction.
- Added a "Free lessons offer" button that appears when a course has a trial or lessons with the "Preview Lesson" enabled.
- Implemented functionality to change or select a preset for fully or partially switching to another layout.
- Added a field for selecting specific bundles in the Course Bundles block, allowing admins to customize displayed bundles.
- Enhanced the Full-Size Image style in the Course Grid block by adding hover effects to display additional course information.
- Introduced a button with price visibility while hovering in the Price Button style.
- Included quiz attempts display in the Course Player.
- Added translations for strings within JS files.

🛠 **Fixes:**

- Resolved an error when the admin reviews a student's assignment.
- Fixed duplication of courses when expired courses are purchased via Paid Membership.
- Corrected the displayed number of questions in the Question Bank.
- Addressed an issue where messages were not sent to instructors, despite success being indicated in the response.
- Small bug fixes.

3.3.25

June 28, 2024

🛠 **Fixes:**

- Fixed an issue loading Single Quiz Edit settings.

3.3.24

June 25, 2024

🚀 New features:

- Added the ability to include a video preview for courses to give students a chance to learn about the course in a video (Pro).

🛠 Fixes:

- Small bug fixes.

3.3.23

June 24, 2024

🚀 New features:

- Added a stats dashboard for students to track their courses, progress, and achievements (Pro).
- Included a setting to enable or disable the stats dashboard for students (Pro).

⬆️ Enhancements:

- Added a setting to specify the number of attempts allowed to pass a quiz.
- Enhanced plugin usability by adding detailed descriptions for all settings.

🛠 Fixes:

- Resolved an issue where some strings were unavailable for translation due to the use of the esc_html() function.

3.3.22

June 18, 2024

⬆️ Enhancements:

- Added a "Pending for review" status for student reviews on courses.
- Enabled course sharing on social media with a pre-designed post template.
- Introduced a "More" button for extended Course preview descriptions.
- Added a setting to disable/enable the sticky sidebar in the admin panel for select course styles.
- Added a setting to choose the default tab on the Course Page.
- Ensured users remain on the same page after logging in via the registration popup, course player, or social login (Pro).
- Added tooltips for courses with multiple categories, providing better clarity (Pro).
- Enhanced course statuses ("New," "Hot," "Special") to display in Related and Popular Courses sections (Pro).

🛠 Fixes:

- Resolved an issue where the Price Info field in the Course Builder did not function or display correctly on the Course Page.
- Fixed visibility issues with Membership levels for guest users.
- Addressed missing lesson content boxes in quizzes, particularly for Fill in the Gap types.
- Corrected styling bugs across different Course page layouts.

3.3.21

June 14, 2024

🚀 New features:

Added new Gutenberg blocks: Courses Categories, Courses Grid, and Instructors Grid: see ↗

⬆️ Enhancements:

- Added a setting to disable the popup For all card styles in Gutenberg blocks that have a popup.

🛠 Fixes:

- Resolved an issue where the email string was hardcoded and not translatable in specific plugin files.

3.3.20

June 6, 2024

🚀 New features:

- Added an Audio lesson addon (Pro): see ↗
- Introduced options to add audio lessons by uploading files, embedding or with shortcodes (Pro).

3.3.19

June 5, 2024

🚀 New features:

Added Course Bundles Gutenberg block (Pro): see ↗

🛠 Fixes:

- Resolved issues with Spanish and Italian translations not functioning correctly in the plugin.
- Fixed SCORM course content not displaying properly on newer versions of the MasterStudy theme.

3.3.18

May 29, 2024

⬆️ Enhancements:

- Added the ability to insert widgets into the sidebar on the course page for better customization and flexibility.

3.3.17

May 28, 2024

🛠 Fixes:

- Optimized MYSQL queries for Elementor widgets to improve performance.
- Fixed issue where static strings were unavailable for translation due to a missing text domain.
- Corrected issue where the number of enrolled students increased when the course page was reloaded.

3.3.16

May 24, 2024

🚀 New features:

- Added seven new styles for Course pages: Timeless, Sleek with Sidebar, Dynamic, Minimalistic, Modern with Curriculum, Dynamic with Short Sidebar, Bold with Full With Cover (Pro): see ↗

⬆️ Enhancements:

- Redesigned the default style for the Course page.

3.3.15

May 20, 2024

🛠 Fixes:

- Small bug fixes.

3.3.14

May 16, 2024

🚀 New features:

- Added an Archive Courses Gutenberg block: see↗
- Added the possibility to manage students via CSV for instructors.

⬆️ Enhancements:

- Optimized course bundles for improved speed (Pro).
- Added the ability to format and move text in the "Fill in the Gap" question.
- Implemented logic for checking installed add-ons and the ability to add filter blocks based on availability.
- Added CSS classes to the MasterStudy Player for improved styling.

🛠 Fixes:

- Fixed issue where Fill-in-the-gap questions were not saved when only the free plugin was used.
- Resolved problem where the Upcoming Course Status addon timer was not displayed on the card.
- Corrected the Members Only badge not appearing for courses available only through Paid Membership Pro.
- Fixed issue where courses purchased through WooCommerce were unavailable.

3.3.13

May 8, 2024

🛠 Fixes:

- Small bug fixes.

3.3.12

May 7, 2024

🛠 Fixes:

- Fixed issue where courses were not available for students added by the admin via the "Manage Students" option.
- Resolved issue with Yoast SEO page title not being applied.

3.3.11

May 6, 2024

⬆️ **Enhancements:**

- Added the ability to redirect to Checkout after adding to Cart when WooCommerce Checkout is enabled.
- Set MasterStudy video player by default for video lessons with HTML and external links.
- Implemented AJAX Loading for Assignments and Certificates pages in LMS (Pro).

🛠 **Fixes:**

- Fixed issue where course access was not removed after a subscription was canceled from the admin panel.
- Resolved YouTube branding display issue when "Use MasterStudy player for YouTube videos" setting is enabled.

3.3.10

May 1, 2024

🚀 **New features:**

Added a new Course Carousel block for Gutenberg: see↗

Added new Basic info, Course requirements and Intended audience blocks for the course in the Course Builder: see↗

3.3.9

April 29, 2024

⬆️ **Enhancements:**

- Optimized the Course Player for better HTTP requests handling, database queries, and asset loading.
- Improved video lessons and quizzes for faster performance.
- Removed outdated Course Builder and Course Player files for a more streamlined experience.

🛠 **Fixes:**

- Fixed an issue where the Add to Quiz button would add double the number of selected questions.
- Resolved a problem where students were unable to finish lessons due to exceeding the maximum lesson ID count.

3.3.8

April 25, 2024

⬆️ **Enhancements:**

- Added a new Course Grid block for Gutenberg: see ↗

🛠 **Fixes:**

Removed linear icons and replaced them with IcoMoon for optimization.

3.3.7

April 18, 2024

🚀**New features:**

- Added a new Featured Teacher block for Gutenberg: see ↗

🛠 **Fixes:**

- Fixed course styles not being applied correctly on the course card and popup in both the page and the editor.

- Resolved issues with modern course styles not displaying properly on single course pages.
- Fixed the explanation feature not working in multi-choice quiz type answers.
- Corrected the issue where clicking Start Course in a SCORM course caused the page to refresh without opening the course.

3.3.6

April 15, 2024

⬆️ Enhancements:

- Added the ability for instructors and admins to preview courses when in draft or pending review status (Pro).
- Updated the logic of URLs in courses (Pro).
- Trimmed extra spaces at the beginning and end of answers in Fill the Gap questions, ensuring answers are marked correctly.

🛠 Fixes:

- Fixed issue where videos with hidden branding from YouTube or Vimeo were cropped when using PHP 8.1+.

3.3.5

April 8, 2024

⬆️ Enhancements:

- Replaced Google+ with LinkedIn in the Social Networks section of the User Account.
- Removed the character limit in the password field during registration.
- Added additional validation when assigning a plan to a user through the admin to prevent errors.

🛠 Fixes:

- Updated the error text for unacceptable characters in login when registering on a multisite network.

- Fixed an issue where the referral link option doesn't work when there are no popups or signup forms on the page (Pro).
- Resolved the issue of the certificate tab not being displayed for students (Pro).
- Small bug fixes.

3.3.4

April 4, 2024

⬆️ **Enhancements:**

- Updated the Guest checkout view for a smoother experience.
- Added settings to display the MasterStudy player for YouTube and Vimeo videos.
- Added a filter for instructor names in the Certificate Builder for admins (Pro).
- Enabled instructors to create certificates (Pro).
- Introduced a dedicated page displaying certificates created by instructors (Pro).
- Added a certificate list in the admin panel, where admins manage all certificates, and instructors can view, edit, or delete only their own (Pro).
- Added a filter for modifying custom fields in the Certificate Builder (Pro).

🛠 **Fixes:**

- Fixed issue with premium memberships for students not working properly.
- Resolved certificate error in Course Player when Query Monitor is enabled.
- Fixed the "Have a Question" form for Enterprise not being submitted.
- Corrected display issues on internal user account pages when using the Yoast SEO plugin.
- Corrected content compression and block breakage caused by containers on pages.

3.3.3

April 1, 2024

🔄 **Updates:**

- Checked for compatibility with Paid Membership Pro 3.0.

⬆️ Enhancements:

- Added an additional filter to prevent unwanted script loading.
- Improved and updated Russian and Ukrainian translations.
- Added functionality to allow students to be added to courses via CSV files.

🛠 Fixes:

- Fixed issue where the "Reset Course Progress" feature reset the course start date and added incorrect time to the database.
- Resolved issue allowing students who have purchased a pre-ordered course to access it through the Curriculum (Pro).

3.3.2

March 27, 2024

⬆️ Enhancements:

- Improved protection for user registration forms.

3.3.1

March 20, 2024

⬆️ Enhancements:

- Added an option to display co-owned courses in the instructor's public profile.
- Updated the display view of quizzes created with the Online Testing addon (Pro).
- Indexed database tables to improve query processing speed.

🛠 Fixes:

- Fixed issue where the new page with the shortcode from the Online Testing addon was not being published.

- Resolved incorrect display of the registration form when a guest tries to enroll in a course twice.
- Fixed the login form opening upon clicking the "Registration" link in the side profile menu.
- Corrected email shortcodes not working in the "Become Instructor" and "Have a Question" forms.
- Fixed issue where student progress was not displayed for the group creator (Pro).
- Resolved issue where student assignment files were visible in the admin's media library (Pro).

Dev:

- File path checks have been added to the Modal Loader for better protection.
- Form Fields additional checks have been added to Authorization Forms for better protection.

3.3.0

March 14, 2024

⬆️ Enhancements:

- Added a new Certificate builder (Pro): see↗
- Added a sidebar to select certificate templates for more flexibility. (Pro)
- Added ability to insert different elements such as course time, description, progress, etc. (Pro)
- Made it possible to assign a certificate separately to an individual course or a category of courses. (Pro)

Dev:

- Added a patch for importing new certificates.
- Capability condition added for Settings Autocomplete Search field.

🛠 Fixes:

- Small bug fixes.

3.2.13

March 9, 2024

⬆️ **Enhancements:**

- Added authorization checks to User Order Requests for improved data protection.

3.2.12

March 6, 2024

🛠 **Fixes:**

- Small bug fixes.

3.2.11

March 5, 2024

⬆️ **Enhancements**:

- Added capability checks to Statistics Requests to enhance data protection.
- Improved performance of the Instructor Statistics page.

🛠 **Fixes:**

- Fixed the issue where the course price did not update in the cart after a price change or when a discount expired.

3.2.10

February 29, 2024

🚀 **New features:**

Added a new Social Login addon (Pro): see ↗

⬆️ **Enhancements:**

- Added a loader to display the audio and video saving progress in percentage (Pro).
- Translated all user account page tabs via WPML.
- Optimized the speed of the loader for improved performance.

🛠 **Fixes:**

- Resolved the issue where the "Add Enrolled Students as Attendees" option was unavailable when creating a Google Meet lesson from the Course Builder (Pro).
- Small bug fixes.

3.2.9

February 29, 2024

🛠 **Fixes:**

- Made minor improvements.

3.2.8

February 23, 2024

⬆️ **Enhancements:**

- Improved performance and speed of Course Player by conducting query optimization.

🛠 **Fixes:**

- Resolved the issue where social network icons were not displaying.
- Fixed the bug where selecting one correct answer in a Multi Choice quiz question would automatically select a second answer.

3.2.7

February 21, 2024

🔄 **Updates:**

- Updated FontAwesome to version 6.4.2.

⬆️ **Enhancements:**

- Added the ability for students to save draft assignments (Pro).
- Enhanced audio/video question playback by stopping previous playback when a user starts a new audio/video (Pro).
- Simplified the activation process for the Question Media addon (Pro).

Dev:

Added an option that resets current_lesson_id, start_time and end_time after resetting or deleting a student.

🛠 **Fixes**:

- Fixed incorrect display of discounted course prices in the Course Bundle (Pro).
- Resolved the undefined key avatar error for Single Course Co-Instructors (Pro).
- Improved the quality of course pictures on the instructor's public page.
- Addressed an issue where profiles with non-English usernames were not registering.
- Corrected quiz answer counting when two spaces are present or when text is enclosed in quotes at the beginning of a line.
- Fixed a minor PHP warning on the Manage Students page.

3.2.6

February 16, 2024

🛠 **Fixes**:

- Added protection for the Instructor Account Statistics page function to prevent unauthorized access to data.

3.2.5

February 14, 2024

🚀 **New features:**

- Added a new Question Media addon (Pro): see↗
- Introduced options to add video, audio and pictures to questions in a quiz (Pro).

Dev:

- Added a new template _core/stm-lms-templates/components/video-media.php.

3.2.4

February 9, 2024

🚀 **New features:**

- Added new Gutenberg blocks: Call to Action, Icon, Button, Testimonial, Iconbox, Adaptive Container, and Text: see↗
- Introduced new blocks in the Customize section for header and footer customization in MasterStudy Starter theme.

⬆️ **Enhancements**:

- MasterStudy tab color in the admin panel now matches the WordPress admin dashboard color settings.
- Added a "Quick Edit" link with Course Builder in the top admin bar when viewing a course.
- LMS shortcodes can now be copied with a single click for easier usage.

🛠 **Fixes**:

- Resolved issue where reviews from students were not displayed after the course was approved by the admin.
- Fixed the issue where the FAQ tab appeared even when it was not enabled in course settings.

- Corrected the problem where quizzes would not open in the Course Builder.
- Ensured that courses and empty fields are filled with default values.

Dev:

- Course Builder Settings warnings fixed for course_certificate, current_students or end_time.

3.2.3

February 1, 2024

🛠 Fixes:

- Resolved an issue where both the lesson and recent blog posts were displayed when entering the lesson.

3.2.2

January 30, 2024

⬆️ **Enhancements**:

- Added the ability for instructors to view unpublished courses.
- Separated Authorization Settings section in Profile Settings for better management.
- Implemented validation for the Become Instructor form.
- Improved validation for the Enterprise form.
- Optimized user experience by hiding popups when clicking outside the form window.
- Introduced shortcodes for both Authorization and Become Instructor forms.
- Added a dedicated Sign Up as Instructor form in the Authorization form.
- Added Elementor widgets for both Authorization and Become Instructor forms.
- Unified the registration form design for a more consistent profile setup.
- Enabled the generation of the instructor registration page via the LMS Wizard.

Dev:

- Changed component templates: _core/stm-lms-templates/components/modals/become-instructor.php, _core/stm-lms-templates/components/modals/enterprise.php
- Changed "apply_for_instructor" function in _core/lms/classes/user.php file.
- Changed "enterprise" function in _core/lms/classes/user.php.

🛠 **Fixes**:

- Fixed an issue where the color of the check mark and inner circle in the Success view after registration did not change.
- Corrected the Translation of minutes in Quiz in Course Player not working.

3.2.1

January 24, 2024

🛠 **Fixes**:

- Fixed an issue where answers in quizzes with special characters were not accepted as correct.
- Corrected The "add student" functionality through the admin panel not working if the plan in Paid Membership Pro is set to the category in which the course is created.
- Resolved an issue where after translating a course via WPML, a link to a translated course in another language displayed a 404 page until the user saved the settings.
- Fixed a problem where points cut after retake functionality incorrectly cut results after the second retake.
- Corrected Audio files in Lesson Materials not playing in Course Player.
- Fixed an issue when downloading a certificate only worked in the courses to which the certificate is linked (Pro).
- Resolved an issue where Page Title was not working correctly in Course Player.

Dev:

- Global $post object set as Lesson in Course Player page.
- Course Player data functions refactored.
- Courses post type made public for Sitemaps.

3.2.0

January 15, 2024

⬆️ **Enhancements**:

- Added a badge for upcoming courses in the admin panel for easier identification. (Pro)
- Enhanced the Manage Course page for upcoming courses to show student subscription dates for better tracking. (Pro)

🛠 **Fixes:**

- Fixed an issue where Save button was unclickable if images in the video lesson or course settings were removed.
- Resolved a bug causing course cards to bounce on hover when using the Elementor course-card widget with a Sale Price.
- Fixed incorrect lesson order when rearranging sections.
- Corrected untranslated words in the Course Builder.
- Removed the explanation to quiz answers after a retake to avoid confusion.
- Fixed an issue where the video poster in video lessons was not removed when deleted.
- Resolved incorrect section unlocking when "Lock lessons in order" was enabled in the Drip Content addon. (Pro)
- Fixed expiration days being calculated incorrectly for upcoming courses in the Access section. (Pro)
- Resolved an issue preventing students from repurchasing a course after it expired. (Pro)
- Corrected untranslated words "Earnings" and "Sales" on the Payouts page. (Pro)

3.1.25

January 10, 2024

🛠 **Fixes**:

- Fixed an issue when after enrolling in a course, students and instructors were sent the Course added and Course added to User emails several times.

3.1.24

January 4, 2024

⬆️ **Enhancements**:

- Cleaned up nonessential classes in the plugin and theme for enhanced optimization.
- Added a dropdown for sections in the Curriculum section to improve navigation.

Dev:

- Changed completely the template _core/stm-lms-templates/course/parts/tabs/curriculum.php

🛠 **Fixes**:

- Fixed course filtering and numerical ratings not working on the Archive page.
- Resolved an issue with incorrect sorting view display on mobile devices.
- Fixed the inability to change the Course Level name in the admin panel.
- Resolved a bug where Guest Checkout did not work during course lesson purchases.
- Fixed the incorrect display of the login button in the header.
- Corrected user account display issues when the BuddyPress plugin is enabled.
- Small bug fixes.

3.1.23

December 22, 2023

⬆️ **Enhancements:**

- Added support for WPML in the Course Player to make it work in multiple languages.

🛠 **Fixes:**

Fixed an issue where Question Bank categories didn’t show up until the quiz was saved.

3.1.22

December 20, 2023

⬆️ **Enhancements**:

- Added a Become Instructor form to the login and registration forms after updating the forms for better onboarding.

🛠 **Fixes**:

- Resolved the "WordPress database error: Table '.wp_posts' doesn't exist..." issue, ensuring stable system performance.

3.1.21

December 18, 2023

🛠 **Fixes:**

- Small bug fixes.

3.1.20

December 15, 2023

🛠 **Fixes:**

- Small bug fixes.

3.1.19

December 14, 2023

🛠 **Fixes**:

- Fixed a problem where Home page didn’t work when reinserting the Course block.

3.1.18

December 7, 2023

🛠 **Fixes**:

- Resolved an issue where the email confirmation link sent from the Profiles section of LMS settings was non-functional.

3.1.17

December 7, 2023

⬆️ **Enhancement**:

- Added a setting to apply custom colors for Course Player pages, Authorization pages and popups for more flexibility.

3.1.16

December 5, 2023

🔄 **Updates**:

- Changed the design of the registration, login, and password reset forms for a polished and modern look.
- Advanced error validation for all form fields.
- Integrated Google reCAPTCHA with the login and registration forms for superior security against bots.
- Enabled the FAQ section in courses to be fully translatable with WPML for a seamless multilingual experience.

🛠 **Fixes:**

- Resolved an issue where reordering sections and lessons resulted in an incorrect sequence.

- Fixed a bug causing a confirmation note to appear while switching tabs or creating a lesson after setting up a quiz, even with no unsaved data.
- Corrected functionality for the Curriculum, FAQ, Announcement, and Review tabs on the Single Course page using the Globalstudy layout for Divi.

3.1.15

November 29, 2023

- **Update**: Redesigned the popup for students with memberships.
- **Update**: Redesigned the popup for the "Become an Instructor" form.
- **Update**: Redesigned the popup for the "Have a question" form.

3.1.14

November 24, 2023

- **Fixed:** Minor bug fixes.

3.1.13

November 23, 2023

- **New**: Added new Upcoming course status addon.
- **Fixed**: Small bug fixes.

3.1.12

November 17, 2023

- **Fixed:** Minor bug fixes.

3.1.11

November 16, 2023

- **Update:** Made the Course Player compatible with WPML
- **Fixed:** Question Bank categories are not displayed until the user saves Quiz

3.1.10

November 13, 2023

- **Fixed**: Small bug fixes

3.1.9

November 8, 2023

- **Fixed:** Now when the course is free, students are automatically enrolled when they visit the course page.
- **Fixed:** The hint field for the question disappears when editing.
- **Fixed:** If the Single Choice quiz type is changed, previously deleted questions are returned to the quiz.
- **Fixed:** Content size changes when opening Question Bank if it is at the end.
- **Fixed:** Fill the gap quiz type finds the correct answer incorrect.

3.1.8

November 3, 2023

- **Fixed:** Small bug fixes.

3.1.7

November 2, 2023

- **Update:** Added a setting to disable Discussions in Course Player.
- **Update:** Added a new template "User added via Manage Students" for Email Manager addon.

- **Update:** Optimized tables in the database of the courses, now the Course Player has become even faster.
- **Update:** Removed settings for course creation, quizzes, lessons, course settings and price settings from the admin dashboard, these are now all set up in Course Builder.
- **Fixed:** The "Load more" button does not appear on the instructor page and not all courses are displayed.
- **Fixed:** Quiz does not end and a popup with results does not show up.
- **Fixed:** The user's answers are shown incorrectly on the second attempt in Show Correct Answers.
- **Fixed:** Unable to send a blank Multichoice answer on the second attempt.
- **Fixed:** The Complete button in Course Player does not become active on mobile view.
- **Fixed:** After resetting progress, if users log into the course again, they continue the course from the same page.
- **Fixed:** Small bug fixes.

3.1.6

October 30, 2023

- **Fixed:** Small bug fixes.

3.1.5

October 20, 2023

- **Update:** Added blocking of the “Complete lesson” button in text lessons until the user scrolls to the end.
- **Fixed:** The currency symbol did not apply in Course Builder.
- **Fixed:** Quiz Style is reset after saving and reloading the page.
- **Fixed:** Small bug fixes.

3.1.4

October 18, 2023

- **Fixed:** In lesson preview content, when a user is not signed in, after clicking on Login, the login window isn't shown correctly.

3.1.3

October 16, 2023

- **Update:** New view for the page before starting Quiz
- **Update:** Added to the interface Empty state of discussions in the course player for students to view.
- **Fixed:** Curriculum icons do not match the course builder icons.
- **Fixed:** Pictures attached to questions in quizzes do not display properly.
- **Fixed:** Quiz content/instructions are displayed after the end of the quiz along with the results.
- **Fixed:** Admin Top Bar is located at the end of the page in the theme.

3.1.2

October 12, 2023

- **Fixed:** The certificate does not download on iOS in Safari.
- **Fixed:** Removed Lesson Style settings from Wizard from the Curriculum section.
- **Fixed:** Quiz questions do not mix when the Randomize Questions setting is enabled.
- **Fixed:** Embedding video lessons does not work in the new course player.
- **Fixed:** The loader of the starter theme in the player interferes with the course player's loader.

3.1.1

October 11, 2023

- **Fixed:** Minor bug fixes

3.1.0

October 10, 2023

- **Update:** New Course Player.
- **Update:** New student view interface.
- **Update:** Switch between Light and Dark Themes.
- **Update:** Enhanced Mobile-first view for students.
- **Update:** New view for Item Match and Image Match.

3.0.29

October 6, 2023

- **Fixed:** The Login snd Register tabs in the authorization/registration popup can not be switched

3.0.28

October 3, 2023

- **Fixed:** When an authorized user clicks on one of the tab links, the first lesson opens with incorrect content.
- **Fixed:** Instructors cannot insert iframes into lessons.

3.0.27

September 18, 2023

- **Update:** Automatic generation of LMS pages when installing the free version of the plugin.
- **Update:** The course information on the course page is centered on the left edge when viewed on mobile.

- **Fixed:** When a user creates a quiz and then immediately creates the next quiz, AutoSave occurs at the time of creation and the current edited question is simply deleted.
- **Fixed:** When deleting a large number of questions, sometimes deleted questions are returned because AutoSave is triggered at a random moment.
- **Fixed:** When clicking on the “Open Settings” button in the “MS Pages are not generated” notice, the button does not open the desired settings if you are on the settings page.
- **Fixed:** Only one-course category is displayed on the Single course page, although several categories and subcategories are specified in the course builder.
- **Fixed:** After deleting the generated pages and reloading the page, errors appear.

3.0.26

September 12, 2023

- **Update:** Libraries were updated to the latest version of the plugin

3.0.25

September 6, 2023

- **Fixed:** Minor bug fixes

3.0.24

September 5, 2023

- **Update**: Course card settings ↗ added to LMS widget settings in WPBakery and Elementor
- **Update**: It is possible to change the height of pictures in course cards on Elementor
- **Update**: Course card settings in the admin panel customize settings for the Archive page ↗
- **Fixed:** The instructor could not reset the rating and review even after using the LMS Course Rating tool

- **Fixed:** The courses widget on Elementor continued to show the discounted price even after the discount date expired

3.0.23

August 25, 2023

- **Fixed:** Minor bug fixes

3.0.22

August 24, 2023

- **Fixed:** Quiz question titles did not display HTML tags as text

3.0.21

August 23, 2023

- **Fixed:** After completing the quiz, the Quiz Complete email should include the result of the quiz
- **Fixed:** The lesson creation page gives an error when refreshing
- **Fixed:** When the user uploads a picture and puts the cursor there, some text appears

3.0.20

August 16, 2023

- **Fixed:** Minor bug fixes

3.0.19

August 14, 2023

- **Fixed:** There was a conflict with the file manager addon and uploader
- **Fixed:** Error fixes with Course Carousel and Course Category

- **Fixed:** End Time is not filled in the database automatically when a student completes a course

3.0.18

August 10, 2023

- **Update**: Compatibility with WordPress 6.3
- **Fixed:** In the Single Course page, the sidebar drops down when there are not enough tabs
- **Fixed:** The wishlist button on the course card does not work after clearing a field in the search
- **Fixed:** "No Courses Found" icon moves off on default themes
- **Fixed:** Icons for Text and Stream Lessons in Manage Students are not displayed on the left
- **Fixed:** When adding students, the number of students is not updated on the course page
- **Fixed:** Corrected compatibility issues with PHP
- **Fixed:** When resetting a password, an email is sent without a clickable link
- **Fixed:** Bug fixes based on WPScan Vulnerability Report

3.0.17

August 10, 2023

- **Fixed:** Minor bug fixes

3.0.16

August 4, 2023

- **Fixed:** An additional scroll appeared on the right if the question was large or if there were too many questions
- **Fixed:** Removed the scroll that is closer to the edge of the screen in lessons

- **Fixed:** Create button did not become Save and the page did not refresh to edit state after creating Google Meet lessons
- **Fixed:** There was a 502 error when creating a large number of tabs with a lot of content

3.0.15

July 19, 2023

- **FIXED:** Notice "This field is required" was not translated in the Course Builder

3.0.14

July 18, 2023

- **Update:** It is possible to duplicate curriculum with Post duplication
- **Update:** Added word "Lesson" when creating a Google Meet lesson via Course Builder
- **Fixed:** Fixed incompatibility with WP Umbrella
- **Fixed:** Some texts are not translated in the new Course Builder
- **Fixed:** The Required field on the quiz title tag is not working
- **Fixed:** Separator goes over words in the instructor's Google Meet tab
- **Fixed:** Fixed PHP Deprecated Bugs
- **Fixed:** Login buttons didn't display full width
- **Fixed:** Embedded errors when creating a Zoom lesson

3.0.13

July 14, 2023

- **FIXED:** The first section did not redirect the student to the second section if the section order has been changed
- **FIXED:** Add new course button in the admin panel did not always work from the first time

3.0.12

July 12, 2023

- **Fixed**: Minor bug fixes

3.0.11

July 12, 2023

- **Fixed**: File size in the empty selector is not working in Course Builder

3.0.10

July 11, 2023

- **Update**: Added new Admin Notifications view
- **Update**: New icons and cursor pointers are now made for all date and time pickers
- **Update**: Moved all Hooks from the old Course Builder to the new one
- **Update**: Added new arguments to hooks
- **Update**: New mechanics for transferring lessons between sections in the curriculum
- **Fixed**: Side Profile Menu gets under Online Header
- **Fixed**: Avatar shrinks when opening Side Profile Menu on lives
- **Fixed**: A label in Quiz was in SVG format
- **Fixed**: Added Custom fields in Course Builder for Grassblade
- **Fixed**: Various bugs in the plugin were fixed
- **Fixed**: There was a warning when visiting the site as Guest
- **Fixed**: Course Builder does not work with Gutenberg plugin
- **Fixed**: Removed Unused Undefined $curriculum_item variable
- **Fixed**: The mobile header on iOS is hitting buttons in Course Player in lessons
- **Fixed**: The created course should be saved as Draft
- **Fixed**: Corrected Notification when navigating from section to section in Google Meet
- **Fixed**: Part of the text not visible in Course Total

- **Fixed**: Lesson Content and Lesson Materials fields for Stream Lesson and Zoom Conference are not working.
- **Fixed**: Browser default notification is shown when closing the page
- **Fixed**: Settings and Q&A tabs set max-width

3.0.9

June 27, 2023

- **Fixed:** Cross-Site Scripting (XSS) vulnerability issue reported by Patchstack.
- **Fixed:** Broken Access Control vulnerability issue.

3.0.8

June 21, 2023

- **Update:** Compatibility Update with the latest version of Elementor Pro.
- **Update:** Compatibility Update with the latest version of Elementor Header & Footer Plugin.
- **Fixed:** Mobile Menu of Elementor Pro was not clickable when MasterStudy LMS was active.
- **Fixed:** Courses search bar did not display on the Courses archive page.
- **Fixed:** Additional attempts were added when Quiz progress was reset by Admin.
- **Fixed:** Previous and Next icons are not displayed in Lesson navigation when the lesson is Locked with Drip Content.

3.0.7

June 8, 2023

- **Fixed:** Emails regarding "Course Pre-moderation" were not sent.
- **Fixed:** After publishing the course with the price, instructors could not make it free.
- **Fixed:** The stream lesson did not save after changing the date and time.

3.0.6

June 5, 2023

- **Update:** Added video poster for External link source type of video lessons.
- **Fixed:** Course builder was loaded blank on the translated version of the website with WPML.
- **Fixed:** While switching between the lessons changes in the content did not apply at once.

3.0.5

June 2, 2023

- **Update:** The questions category will be displayed in the Questions Bank section.
- **Fixed:** Favorite Courses page was available for not logged-in users.
- **Fixed:** After submitting the TRUE and FALSE, questions both options were displayed as FALSE.
- **Fixed:** Course sections and Lessons did not create due to Restricted PUT and DELETE requests on Server-side.
- **Fixed:** A "Validation error" was displayed on the console when the Image match question type was created.

3.0.4

May 30, 2023

- **Fixed:** Minor bug fixes.

3.0.3

May 29, 2023

- **Fixed:** The video in 16:9 format was cut off in the lesson.
- **Fixed:** Users could submit an empty assignment to review.

- **Fixed:** Embed content with "iframe" did not load in the lessons.
- **Fixed:** Default QUiz style settings are not imported with demo quizzes.
- **Fixed:** SCORM Packages did not upload to the course.
- **Fixed:** Validation of Date and Time picker of Zoom Lesson were missed.
- **Fixed:** Minor visual bugs in the Import Course Materials section.

3.0.2

May 18, 2023

- **New:** MS Slider widget added for Elementor to create custom Slides.
- **Update:** Added an "Add Link" button to all Tiny MCE editors in the Course Builder so that links can be inserted.
- **Fixed:** Strip Slashes of MathJax-LaTeX disappeared on lesson content and the formula was not generated in Course Builder.
- **Fixed:** Avatars of Co-Instructors did not display while creating a course with Course Builder.
- **Fixed:** Course Builder stopped loading when the latest comments were deleted from the Q&A session while editing the lesson.
- **Fixed:** The name of the Course in the Prerequisites does not fit into the tab in Course Builder.
- **Fixed:** Multi-choice question type didn't display the correct answer if there was a comma in the answer.
- **Fixed:** The image Match question type was not working when included in Question Bank.
- **Fixed:** The quiz did not load for students when all questions were deleted and replaced with Question Bank
- **Fixed:** Special characters in Course titles such as (-) were displayed as code (–).
- **Fixed:** Video preview did not generate and displayed as a broken file at first seconds after uploading.

3.0.1

May 16, 2023

- **Update:** Horizontal Scroll added for Courses widget sorting options in mobile view.
- **Fixed:** Some course grid items did not appear in the slider view while sorting them.
- **Fixed:** New questions did not add to the quiz by clicking plus icon.

February 25, 2022

- **New:** The notification with options to collect the user's data in our newsletters after activating the plugin

2.7.9

February 15, 2022

We apologize for this awkward situation with the latest MasterStudy Theme update. Hence we have recently released the **hot-fix** with the MasterStudy LMS plugin.

So for now, it is **COMPLETELY SAFE** to update the MasterStudy Theme to the 4.4.4 version. As a tip, we recommend you follow the basic instructions ↗ before updating. Those who have not updated within the first two hours after the update release, feel free to do it now without any problem.

On the contrary, if you have already updated the MasterStudy Theme and **have gotten a fatal error** on your website, please follow the steps below:

1. Download the **masterstudy.zip** archive on your Envato profile page.
2. Unzip the **masterstudy.zip** file which will give a Masterstudy folder. Make sure your unzipping software/tool does not create an extra directory with the same name nested into each other.
3. Retrieve your FTP login information from your hosting admin panel. Login to your FTP account via FTP software (as an example, FileZilla any other one) or File Manager tool in Cpanel to access your website folders.
4. Once you access the FTP account, navigate to the WordPress theme directory ***YOUR_HOSTING_ROOT/YOUR_SUBDIRECTORY/wp-content/themes*** and remove the **masterstudy** folder.
5. Upload the previously unzipped masterstudy folder into ***YOUR_HOSTING_ROOT/YOUR_SUBDIRECTORY/wp-content/themes*** directory.

If you have troubles or obstacles with the provided solution our support gives **a high priority to your cases.** And if your support policy is expired please no worries. We have prepared an express form to collect your data and fix the problem manually. In this case, please fill up all the required fields in this form ↗.

Once again, our deepest apologies for the inconvenience. We assure to take steps to ensure that this kind of situation does not repeat anymore.

- **Fixed:** Redeclare stm_module_styles() error

2.7.8

February 15, 2022

- **Fixed:** Enrolled courses remain in the user's profile after the expiration of the plan
