- ◉ Rendering facet blocks in the WordPress editor.
- ◉ Support for indexing with HTTP authentication.
- ◉ Facets can be indexed from the facet overview table.
- ◉ Facet source now combines all data sources in a single field.
- ◉ Preserve imported identifiers wherever possible.
- ◉ Reduce the size of frontend JS scripts by around 20%.
- ◉ Google Fonts library.

Listing, facet, and counter are now styled independently for each facet.

- ☐ Remove shortcode menu button for styles in admin table.
- ☐ Full-width layout for admin tables and control panels.
- ☐ PHP 8.0 is recommended and compatible up to version 7.x.
- ☐ WordPress 6.0 or higher is required.
- ☐ CSS conflict between facet toggle and range slider.
- ☐ Card editor layout issues with WP 6.0.
- ☐ Incorrect aria-label in plugin menu.
- ☐ Typo error in aria-label of pagination facet.
- ☐ PHP 8.3 deprecation notices.
- ☐ Incorrect redirection from WordPress navigation menu.
- ☐ Minor responsive CSS issue in the admin interface.
- ☐ Issue with the layout of group block in the card editor.
- ☐ Issue with certain style settings not correctly saved.
- ☐ Duplicate CSS color declarations in dynamic stylesheets.
- ☐ Overflow issue with facet style preview iframe.
- ☐ Vertical layout issue with the buttons facet when the list is expanded.
- ☐ Prevents inserting empty metadata tags in cards.

v1.9.0

Release date: April 2, 2024

- ☐ Compatibility with WordPress 6.5.
- ☐ Backward compatibility with V2.

v1.8.2

Release date: February 7, 2024

- Issue with user role block in cards.
- Issue with term slug block in cards.

v1.8.1

Release date: December 6, 2023

- Twitter/X social icon.
- Error with template and is_main_query argument outside archive pages.
- Issue with output buffering when filtering custom queries.

v1.8.0

Release date: November 2, 2023

- Compatibility with WordPress 6.4.
- Support for Youtube Short videos.
- JavaScript libraries and facets assets.
- Issue with product variation prices.

v1.7.9

Release date: September 1, 2023

- Removal of fallback for the old way of declaring templates (deprecated since v1.4.0).

v1.7.8

Release date: August 22, 2023

- Ajax endpoint Url from relative to absolute.
- Issue with select control in WordPress editor.

v1.7.7

Release date: June 29, 2023

- Overflow issue with grid carousel layout.
- Issue when focusing interactive elements in a carousel.

v1.7.6

Release date: May 25, 2023

- Support for value "0" in facets for ACF checkbox, radio and select field.
- Render of "0" numeric value in card custom field block.
- Filesystem to generate assets (grid and facet stylesheets).
- License activation/deactivation status code.

- Facet color options support choice name as choice value
- Issue with card builder and latest version of Google Chrome.
- JavaScript warnings in the admin interface.

v1.7.4

Release date: March 20, 2023

- ACF shortcodes rendering in cards during filtering.
- Indexer hook priorities to ensure correct indexing.
- Issue with webp format and background image in cards.

v1.7.3

Release date: February 12, 2023

- Issue with the installation and updates of add-ons.

v1.7.2

Release date: February 6, 2023

- Compatibility with PHP 8.2.
- Issue with facet toggle button with several instances of the same grid.
- [hidden] CSS fallback rule to avoid conflicts with third-party plugins.
- Missing CRON indexing fallback in some contexts.

- Strips style/script content from the excerpt when fully displayed.
- Issue with Google Fonts and regular/400 weight in the card builder.
- Issue with text position in Dropdown facet in Firefox.

v1.7.0

Release date: October 12, 2022

- Number facet to filter by min and/or max values.
- Gutenberg classname attribute support in template block.
- Conflict with pagename argument in main index query.
- Rendering issue of card block with empty custom fields.
- JavaScript race condition issue when refreshing facets.
- Notification message when paging and loading more content.
- Issue with WooCommerce and custom order with grids.
- Issue with indexer's progression calculation.

v1.6.9

Release date: September 5, 2022

- Support for query string in Apply facet redirect URL.
- Total number of results found in the facet refresh response.
- Notification message (aria) when results are updated.
- Issue with the main query in author archive pages.

- Support for Facet, Grid and Template blocks in FSE editor.
- Archive Template option for Grid block in FSE editor.
- Possibility to create option prefixed by “wpgb-content” in Facet block.
- Detection of Query Loop block using the filter custom queries method.
- Issue rendering select block control in the FSE editor.

v1.6.7

Release date: June 9, 2022

- Detection of custom Ajax endpoints.
- Issue with prefiltered grids and Apply facet.
- PHP 8.1 deprecation notices.

v1.6.6

Release date: May 2, 2022

- Flatpickr library used for date picker facet.
- Relevanssi search limit in WordPress search template.
- Issue with reset facet and dynamic query string on render.
- Issue with range slider rounding values with large numbers.
- Issue with facet term order and WooCommerce custom taxonomy.
- Issue with lightbox button and Elementor page transitions.
- Issue with default date in facet date picker on open.

- ☒ Support for the translation of custom url in the card builder.
- ☐ Flatpickr library used for date picker facet
- ☐ Issue with Relevanssi highlighting and nested queries from grid shortcodes.
- ☐ Issue with range values not properly formatted in selection facet.
- ☐ Issue with HTML entities in autocomplete results.
- ☐ Issue with date picker JS script and IE11.

v1.6.4

Release date: February 11, 2022

- ☐ PHP filter wp_grid_builder/indexer/term_query_args to better translate facets.
- ☐ Issue with term query arguments when indexing taxonomy facets.
- ☐ Issue with the indexing progression in the facet settings.
- ☐ Issue with duplicates in the WooCommerce sale price card block.
- ☐ Issue with WooCommerce prices without tax in facets.
- ☐ Issue with shortcode editor button not available in some contexts.
- ☐ Display issue with select field (multiple) in the card builder.

v1.6.3

Release date: January 14, 2022

- ☐ JavaScript libraries and facets assets.
- ☐ Prevent throwing exceptions with history state when origin is not the same.

v1.6.2

Release date: December 6, 2021

- ☐ Conflict with the terms highlighted by Relevanssi in the cards.
- ☐ Conflict with SearchWP and custom WP_Query.
- ☐ Restore default post status of grids.

v1.6.1

Release date: November 24, 2021

- ☐ Issue with carousel buttons not being correctly sized if too small.
- ☐ Carousel dragging issue with Safari on IOS 15.
- ☐ Missing term order option for the sort facet.
- ☐ Wrong slug for Meta Box add-on.

v1.6.0

Release date: October 5, 2021

- ☒ Support for upper source with Range Slider and Date Picker facets.
- ☒ Support for compare type with Range Slider and Date Picker facets.
- ☐ PHP notices from WordPress 5.8 when rendering grids/facets in Gutenberg.
- ☐ Issue with WP All Import and WooCommerce products when indexing.
- ☐ Prevent items from being added to the cart when filtering.

v1.5.9

Release date: July 27, 2021

- ☒ Support for WooCommerce taxonomy term order for facet choices.
- ☐ Support for inline CSS styles for preview and fallback mode.
- ☐ Issue with ACF time picker field format used in facet choices.
- ☐ Issue with First Media Content option and mp3 format.

v1.5.8

Release date: May 24, 2021

- ☒ Support for Relevanssi search based on users.
- ☐ Issue with query orderby clause on WooCommerce archive pages.
- ☐ Issue with onchange event and range slider facet.
- ☐ Issue with user email block converting email address to url.

v1.5.7

Release date: April 28, 2021

- ☒ Default date in facet date picker on open (selected/current/max date).
- ☒ Active/full price blocks display the price suffix set in WooCommerce.
- ☐ Issue with media player and flexible card media with Masonry layout.
- ☐ Issue with SearchWP and the media library in grid view when searching.

Issue with selection facet not taking into account all selected choices.

- Issue with hierarchical facets and included/excluded taxonomy terms.
- Issue with Relevanssi when filtering custom queries.
- Issue with WooCommerce order on archive pages.
- Issue with excluded facets from Apply facet.
- Conflict with Elementor lightbox script.

v1.5.6

Release date: March 15, 2021

- Conflict with search query when no post type is defined.
- Issue with choice count always displayed with autocomplete and asynchronous combobox.
- Issue with Geolocation and Map facets showing selected values in selection facet.

v1.5.5

Release date: March 10, 2021

- Oxygen add-on in add-ons list (plugin dashboard).
- Issue with WooCommerce price order and the sort facet.
- Issue with the main query on index blog page.

v1.5.4

Release date: March 1, 2021

- Behavior of facet choices in disabled state.
- JSON detection in response when filtering custom content.
- WhatsApp social sharing button now contains the post link.
- Issue with SearchWP and facet choices in search template.
- Issue with Google Map marker icons not clickable in some cases.
- Issue with Query Monitor plugin when filtering custom queries.
- Regression where facet IDs were incorrectly typed.

v1.5.3

Release date: February 9, 2021

- Error handling (JSON response) when filtering custom or archive content.
- Automatically expand children in checkbox treeview from query string.
- Preload dynamic assets (CSS/JS) of facets when necessary.
- Conflict with color picker input and AMP for WP plugin.
- Non-composited animations of the range facet skeleton loader.
- Issue with Range Slider facet when min/max values are equal.
- Issue with WooCommerce variable prices and Range Slider facet.
- Issue with querySelector and HTML attribute value from buttons.
- Issue with WP filesystem when using non direct method.
- Issue with Selection facet and integers used as facet value.

v1.5.2

- ☒ Scroll to top option (with offset) for pagination facet.
- ☒ Keywords highlight when using SearchWP as facet search engine.
- ☒ Display a JS error when facets are placed inside custom content.
- ☐ Flatpickr library used for date picker facet.
- ☐ Issue when sorting WooCommerce products by average rating.
- ☐ Issue with plugin/add-ons and WordPress auto-update feature.
- ☐ Issue with Per Page facet allowing to pass excessive values.
- ☐ Issue with Date Facet when single date selection is cleared on close.
- ☐ Issue with Date Facet when selected dates are outside min/max date range.

v1.5.1

Release date: December 15, 2020

- ☒ Option to easily filter archive pages and custom queries with facets having as grid name "wpgb-content".
- ☒ HTML caching of facets when they are present on different archive templates.
- ☐ Issue with asynchronous combobox when passing lang parameter from Polylang or WPML.
- ☐ Issue when importing .json file generated by the plugin (text/plain mime type issue).
- ☐ Issue with French translation and the number of activated licenses (plugin dashboard).
- ☐ Conflict with CSSTidy library and PHP constants.

- ☐ Color Picker facet to visually filter by colors/images.
- ☐ A-Z Index facet to filter by starting letter or number.
- ☐ Rest API routes (for developers) to fetch and search facet choices.
- ☐ Compatibility with PHP 8.0.0 and WordPress 5.6.
- ☐ Issue with instant Search facet and trailing whitespaces.
- ☐ Issue when grid images have missing width and/or height.
- ☐ Issue with default combobox label not correctly translated.
- ☐ Issue when rounding image aspect ratio in grids.
- ☐ Issue with range slider and right-to-left layout.
- ☐ Issue with several selection facets with different slugs.
- ☐ Issue with rating facet and PHP 5.6.

v1.4.3

Release date: October 19, 2020

- ☐ Issue when installing add-ons from plugin dashboard.
- ☐ Wrong French translation when installing add-ons.

v1.4.2

Release date: October 19, 2020

- ☐ Added taxonomy key for duplicated names in taxonomies list (props Marie Comet).
- ☐ Range slider behaviour when hidden from view (tab, toggle, accordion, etc.).

- ☒ wpgb-dots-page class for pagination facet.
- ☐ HTML markup of range slider thumbs (thumbs are now wrapped).
- ☐ CSS rules of several facets (checkbox, radio, dropdown, buttons, inputs, range).
- ☐ Hook priority to enqueue grid and facets assets on the frontend.
- ☐ Google Fonts available in the card builder.
- ☐ CSS transition issue when updating facet content.
- ☐ z-index issue with Dropdown and Autocomplete facets.
- ☐ Missing aria-hidden attribute on rating stars SVG icon.
- ☐ Issue with multiple select field control in the card builder.
- ☐ Issue with grid JS instance and unique identifier (on destroy).
- ☐ Issue with fixed height set on card with Masonry layout when hidden from view.
- ☐ Issue with 0 numeric value in card custom field.
- ☐ Race conditions with instant Search facet and asynchronous requests.

v1.4.1

Release date: September 11, 2020

- ☐ Issue with reset facet demo content.
- ☐ Issue with included facets to reset.
- ☐ Issue with main query and offset parameter.

v1.4.0

Release date: August 31, 2020

Apply facet action to filter a grid on click or to redirect to a filtered page.

- Shortcode, widget and Gutenberg block to render templates from an ID.
- PHP filter `wp_grid_builder/templates` to register templates from an ID.
- PHP filter `wp_grid_builder/facet/title_tag` to globally change facet title tag name.
- Performance for asynchronous requests of dropdown (async) and autocomplete facets.
- Disabled state for reset facet button and range slider clear button.
- Automatically expand children in treeview of selected items.
- Automatically uncheck parent when a child is selected in hierarchical checkboxes.
- Remove non existing facet choices (query string) from selection facet.
- Indexing of post metadata keys when a post is not directly updated.
- Flatpickr library used for date picker facet.
- Missing aria labels (min and max values) in thumbs of the range slider facet.
- Missing style of autocomplete and treeview navigation in facet stylesheet (if no grid in page).
- Issue with Child Terms option not correctly including children (grid settings).
- Issue when several templates (JavaScript instances) are present in a page.
- Issue with responsive fonts in cards with several occurrences of the same grid in a page.
- Issue with indexer when "Adjust IDs for multilingual functionality" option is enabled in WPML.
- Issue when programmatically focusing on load more button (JS preventScroll).
- Conflict with Elementor lightbox when a lightbox is set in WP Grid Builder settings.

- ☐ Lazy load support for gravatar in cards.
- ☐ Integration with Jetpack lazy load module.
- ☐ Integration with WP Rocket lazy load feature.
- ☐ Issue with WP_Query and Relevanssi PHP filter fallback.
- ☐ Issue with Safari browser and the card builder.
- ☐ Issue with CSS non valid background shorthands.
- ☐ Issue with CSS minification and properties in upper case.
- ☐ Issue with badly-formed markup of search facet button.
- ☐ Issue with localization of color picker strings (WP 5.5).

v1.3.0

Release date: June 16, 2020

- ☐ New autocomplete facet to show suggestions asynchronously while typing.
- ☐ Clear X button for search facet to easily clear field.
- ☐ Accessible navigation treeview for checkboxes facet.
- ☐ Automatically expand lists on refresh if there are selected choices.
- ☐ Keep facet (checkboxes, radio, buttons) toggle state while filtering.
- ☐ Indeterminate (partially checked) state for hierarchical checkboxes.
- ☐ CSSTidy PHP library to compress and minify stylesheets.
- ☐ Deprecated PHP warnings with PHP 7.4.x.
- ☐ Ajax issue with Relevanssi when using facets with search template.
- ☐ Issue when prefiltering (PHP) with several grids/templates in a page.

- Issue with single date facet appearance on mobile devices.
- Missing french translation for clear button label of combobox.

v1.2.3

Release date: May 14, 2020

- New orderby option in grid settings to order by term taxonomy count.
- Added version number in query string of SVG sprite (admin).
- Wrong french translation in rating facet (& up => & plus).
- Dragger JS helper logic (carousel) to detect dragging from angle and vector thresholds.
- Issue with WooCommerce grouped product prices.
- Missing taxonomy term settings (term colors) on certain taxonomy (e.g.: WooCommerce attributes).
- CSS issue in card builder with equal absolute positions (top, right, bottom, left) in Firefox.
- Issue with do_shortcode in Raw Content block of the card builder.
- Issue with wp_grid_builder/grid/query_args filter arguments for term and user queries.
- Issue with home SVG icons set not rendered on frontend (missing id attribute in SVG tag).
- Prevent to pre-filter main query in admin if no grids/templates are specified (wp_grid_builder/facet/query_string).
- Prevent password fields in admin settings to be autofilled by browser (Chrome).
- Minor markup issue in admin setting panels of the plugin.

v1.2.2

Release date: April 14, 2020

- French translation of backend and frontend.
- Minor changes to admin settings panels.
- Minor changes to admin labels and descriptions.
- Flatpickr library used for date picker facet.
- Prevent issue with multiple inlined custom JS codes.
- Issue with WPML Media plugin and attachment queries.
- Issue with Visual Composer column shortcodes in excerpt.

v1.2.1

Release date: March 25, 2020

- Split styles and scripts to only load necessary assets on the frontend.
- Facets scripts (date, range, select) are now loaded asynchronously on the frontend.
- Render facets endpoint (onload) only queries content and fetches facet arguments.
- Date and Range facet options are now handled asynchronously instead of being localized.
- Range facet displays a skeleton placeholder while loading before initialization.
- Use of font-variant-numeric for fluid content change in range facet.
- Custom blocks are only rendered if they hold content.
- Option to load/unload polyfills to support Internet Explorer 11 and older browsers.

- ☐ SVG calendar icon of the date facet input.
- ☐ Issue with Gutenberg Fullscreen mode in WordPress 5.4 when resizing a grid.
- ☐ Issue with Gutenberg align class name when editing a grid rendered on load in the editor.
- ☐ Issue with read more link in card post content and excerpt.
- ☐ Issue with Gutenberg and Google Fonts loaded from cards.
- ☐ Issue with formatting input numbers in plugin settings.
- ☐ Issue with select, date, range and search facets JS instantiation when conditionally hidden (with PHP filter).
- ☐ Issue with "wp-" prefix in plugin assets folder name (to prevent issue on some servers).

v1.2.0

Release date: February 10, 2020

- ☐ Accessibility with carousel keyboard navigation.
- ☐ Exclude language taxonomy from taxonomy terms block of the card builder.
- ☐ Support for strings translation with Polylang and WPML thanks to Multilingual add-on.
- ☐ Support for [number] shortcode in toggle button label to display the number of hidden items (checkbox, radio, button, and hierarchy).
- ☐ Support for [number] shortcode in load more button to display number of remaining items.
- ☐ CSS issue with Gutenberg blocks and select/button components.
- ☐ Issue with do_shortcode in card post content.

- Issue with carousel keyboard navigation.
- Issue when indexing taxonomy terms with WPML.

v1.1.9

Release date: January 20, 2020

- Dynamic stylesheets principle to decrease numbers of generated files.
- Support date and number formats for ACF repeater fields and array values in card builder.
- Prevent to scroll to carousel viewport when buttons or pagination dots are focused.
- Missing dependency from main plugin stylesheet in `wp_enqueue_style()` used by `wpgb_render_template()`.
- Issue with non numeric attachment ID when changing object attachment with `wp_grid_builder/grid/the_object` PHP filter.
- Issue with missing CSS transitions in card builder from preview mode.
- Issue with default accent color in facets if unset.
- Issue with search facet and post status.

v1.1.8

Release date: January 8, 2019

- Render blocks and shortcodes in card post content
- Preserve `scrollRestoration` on first load to scroll to anchor.
- Preserve hash location in query string when filtering with history.

Issues when indexing taxonomy terms from attachment post type.

- Issue with encoding facet values and special characters.
- Issue with attachment post type and custom post formats from plugin settings.
- Issue when assigning card to custom post formats.
- Added fallback to default post ID in grid settings if missing ID from `pll_get_post()` function.
- Missing datetime attribute in time HTML tag.
- Width issue with select combobox search holder.
- Corrected invalid CSS property values (W3C non-compliant).
- CSS transition flicker issue while loading cards stylesheet.

v1.1.7

Release date: December 2, 2019

- Unset default touch action on range slider to prevent dragging issue on touch devices.
- Missing carousel dots and navigation buttons (prev/next) in Grid Composer.
- Missing icons for 3rd party add-ons in dashboard importer of the plugin.
- CSS conflicts with facet unordered/ordered list style.

v1.1.6

Release date: November 18, 2019

- WP Media modal keep selected media when adding new ones (does not require to hold ctrl/cmd key).

- New hook `wp_glb_render_facet_order` to change facet query ORDER BY clause.
- Rare query issue with term taxonomy ids used in meta_query.
- PHP warnings when missing custom fields in facet settings and card builder.
- JS issue when destroying range slider instance if facet is empty.
- CSS conflict with admin notices if post options if enabled.

v1.1.5

Release date: November 4, 2019

- Plugin license and updater refactor to easily register add-ons.
- Preserve search relevance if no order is set.
- 'noresults_callback' of `wpgb_render_template()` set to false prevents showing no results message.
- New admin submenu to download and activate add-ons.
- Support for the defer and async script attributes.
- Option to reveal WooCommerce first gallery image when hovering thumbnail.
- Support to sort by ACF meta key (repeaters are not supported).
- Flatpickr.js library to v4.6.3.
- Facets not rendered in preview mode if grid not saved.

v1.1.1

Release date: September 12, 2019

- Allow multiple facets selection in settings to reset facet(s).

catching break preview examples in break mode.

- PHP warning if missing user data when indexing.
- PHP error when saving custom field attachment.
- PHP issue with post permalink date structures.

v1.1.0

Release date: September 1, 2019

- Settings API to allow plugins/add-ons to extend settings.
- Increase limit for card spacings up to 999 in grid settings.
- Allow multiple names (whitespace separated) in class attribute of `wpgb_render_template()` argument.
- PHP filter name for hierarchy facet.
- Missing default Google Fonts weight (variant 400).
- Facet not been centered when placed alone in grid composer area.
- Issue with include parameter of `WP_Term_Query` set to `[ 0 ]` (WP Core bug).
- JS conflict with card preview iframe in overview page.
- JS conflict with WordPress iris script from color picker.
- JS issue with Internet Explorer 11.
- CSS issue with post per page select facet.
- PHP issue when splitting string by whitespaces for CSS classes.
- PHP typo with orderby field name for term and user sources.

- ☐ wp_grid_builder/card/id PHP hook to change the card ID used for a post.
- ☐ Possibility to include or exclude term(s) for queried posts (grid settings).
- ☐ Possibility to set is_main_query in shortcode attribute.
- ☐ Notice message in card builder for blocks that natively have an action (media button, social share, etc.).
- ☐ JS issue with load more on scroll on facet refresh.
- ☐ Card media thumbnail action which happens on click.
- ☐ Card layer link issue when there isn't any overlay/content.
- ☐ Rendering raw content in card overview panel.
- ☐ Wrong default SVG play icon in cards.

v1.0.2
