

Open Source ERP & CRM for business

 [Test online](#)

An all-in-one suite

• Enable only the features that you need. [See Features](#)

• **No more double entries:** Integration between the features/modules is ready and "in-the-box".

- Upgrade at any time

- **A customisable and extensible application:** The **marketplace** is open to everybody and serves as a central repository for thousand of external add-ons which enhance Dolibarr for specific needs.

A FOSS model

- **A more competitive solution:** Due to our **Free Open Source Software** model, several thousands of developers, testers, translators, and end users work on the Dolibarr project.

- **The easiest ERP and CRM** system in the market: The Open Source model allows developers and users to enhance the user interface due to the constant feedback and contributions of the Dolibarr user community. [See Community section](#)

A multi-distribution model

- Install the Dolibarr application **where ever you want:** as a local application **on premise** or **online** on a dedicated/virtual machine. or use it as a **SaaS application, from anywhere** and on **any device**.

[See Cloud offers](#)

- Available from **different packages for all platforms**.

• A rich ecosystem of partners.
