

Download DokuWiki!

Here you can download the latest DokuWiki-Version. Either just click "Download" or customize the download to your likings with the options below.

Download

DokuWiki is available free of charge under the [GNU General Public License Version 2](#).

Tip: Our partners offer [hosting with pre-installed DokuWiki](#) – no download needed.

Version

Here you can select which release you'd like to download. The default is usually what you want.

Development Snapshot

be - Беларуская

bg - Български език

bn - বাংলা

br - Brezhoneg

Popular Plugins

DokuWiki can be extended by hundreds of available [plugins](#). You don't need any to get started, but here is a small choice of popular plugins that you might want to include in your download.

CAPTCHA Plugin ([Learn more](#))

Use a CAPTCHA to secure your wiki against spammers. Comes with different accessibility options. Recommended if you intend to run a public wiki.

Upgrade Plugin ([Learn more](#))

The easiest way to upgrade DokuWiki. Downloads and

Looking for an old release?
Check the [Archive](#).

Update

Use this if you want to only download the files that have changed since the old stable version. Check [Upgrade Instructions](#) on how an update is done, regardless if you download a full package or not.

Download changed files only

This setting will be ignored if you download the old stable (2024-02-06b "Kaos") release. Additional downloads like plugins or webserver components will always be included in full.

Include Web-Server

You may optionally include a minimal Webserver with PHP in your download. This is useful for quickly trying DokuWiki or for running it from an USB stick. This is recommended for personal, single-user use only.

MicroApache (Windows 64bit)

Apache 2.4.58, PHP 8.2.13 (bz2, gd, intl, ldap, mbstring, opcache, openssl, pdo_sqlite)

installs the newest stable release with just a few clicks in the admin backend.

Wrap Plugin ([Learn more](#))

Versatile plugin that adds additional syntax for creating various colored boxes, columns or even your own styles.

Translation Plugin ([Learn more](#))

This is the recommended plugin if you'd like to create a multi-lingual wiki.

Video Share Plugin ([Learn more](#))

A plugin that makes it easier to add videos from popular video sharing sites like Youtube or Vimeo to your wiki pages.

Gallery Plugin ([Learn more](#))

Easily embed nice looking image galleries into your pages.
