[Full description](#)[Reviews \(39\)](#)[Other extensions \(11\)](#)

★ Main Features:

- **3 Template packages** The templates are fully responsive, displaying well on all devices. Each template has its own style to make it easy for you to choose.
- **Multi-Factor rating** In addition to simply an overall rating, JLex Review also supports individual factor ratings.
- **Google Data Structures** Rating & Review snippets by Google, Bind... to display average rating of item to the search result page.
- **Multi-media uploads** Attaching photos or files helps make reviews better. Photos from reviews will also be collected and displayed at the top of the page.
- **Custom Field** Not stopping at simple form, you can redesign the form to your liking with various supporting fields: Text, Checkbox, Select and TextBox
- **Advanced search and filtering** Within a reviewed item, you can filter reviews by rating score, keyword, or preset filters.
- **Easy to manage and moderate** New reviews and comments may be moderated until you (admin) approve it. Additionally, you can also highlight reviews that you consider to be of quality.

- **Anti Spam** JLex Review supports 3 solutions to block spam: Reporting system, Blacklist (user or IP address), Captcha plugins.
- **Social Login** In addition to Joomla's registration and login methods, users can use their social media accounts (Facebook, X, Google and VK) to log in faster. Their avatars will be automatically integrated into the system.
- **User Profile** User pages to display their rankings, reviews, comments. You can also synchronize user profile pages with popular extensions like EasySocial, CB or JomSocial.
- Notification system Show notifications when someone interacts with them. These interactions are related to their reviews and comments.
- **Ranking** The page displays a user ranking. The ranking is based on the total score they receive, including points from writing reviews and comments.
- **Import / Migration** Import reviews from a CSV file or you can migrate reviews from available extensions including Hikashop, VirtueMart, Komento and JComment.
- **Embed** Embed an item's overall rating or reviews into another web page.
- **Location Attachment** Use Google Map to share location and attach it to review.

★ 3rd Party Extension Integrations:

- Virtuemart / JoomShopping / HikaShop
- EasySocia / JomSocial / Community Builder
- EasyBlog / DJ-Classifieds
- Zoo / FLEXIcontent / Cobalt / SobiPro
- AdsManager / K2 / Joomla Content
- ... and ANY component
