F-Droid

Motion-UI

A web interface to manage your own NVR with motion.

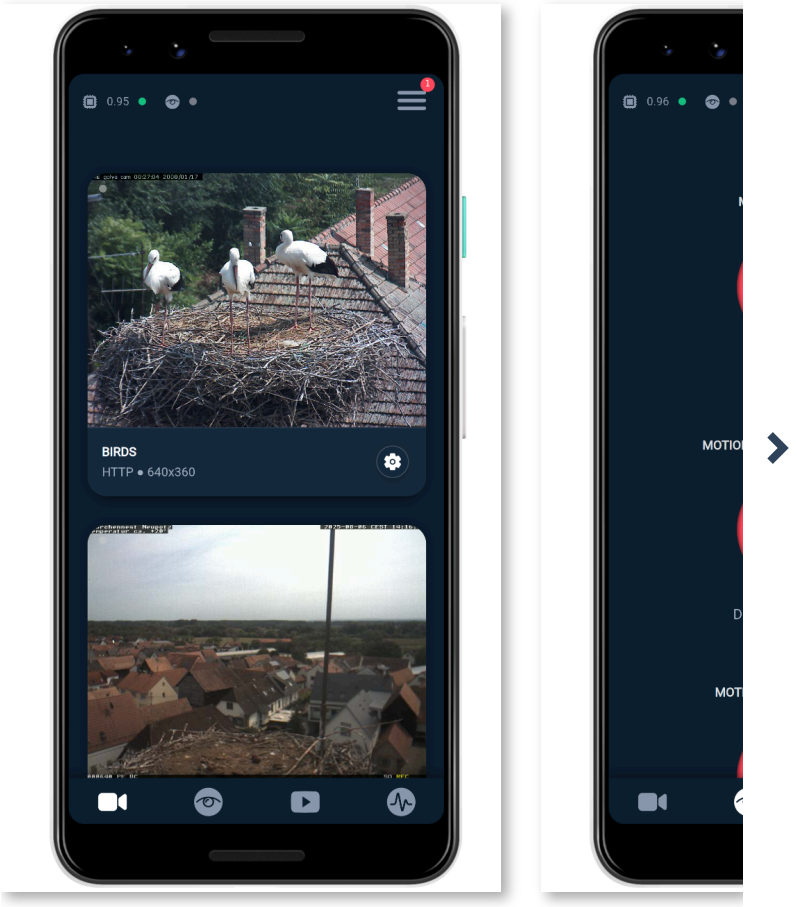

The Android app for Motion-UI, a web interface to manage your own NVR with motion (an open-source motion detection software) and visualize cameras live stream.

Features:

- Visualize cameras stream (sound supported).
- Record motion detection (sound supported).
- Motion detection autostart based on time period.
- Motion detection autostart based on device presence on the local network. If none of the known devices are connected to the local network then motion detection will be automatically started as nobody is at home.
- Email alerts on motion detection.
- Visualize recorded images and videos and download them.
- Create timelapses.

Versions

Although APK downloads are available below to give you the choice, you should be aware that by installing that way you will not receive update notifications and it's a less secure way to download. We recommend that you install the F-Droid client and use that.

DOWNLOAD F-DROID

Version 1.0.1 (101) suggested Added on Jul 21, 2026

This version requires Android 11 or newer.

It is built and signed by the original developer, and guaranteed to correspond to this source tarball.

▼ **Permissions**

- **have full network access**
  Allows the app to create network sockets and use custom network protocols. The browser and other applications provide means to send data to the internet,

so this permission is not required to send data to the internet.

- **show notifications**
  Allows the app to show notifications
- **read the contents of your shared storage**
  Allows the app to read the contents of your shared storage.
- **read audio files from shared storage**
  Allows the app to read audio files from your shared storage.
- **read image files from shared storage**
  Allows the app to read image files from your shared storage.
- **read video files from shared storage**
  Allows the app to read video files from your shared storage.
- **app.motionui.android.DYNAMIC_RECEIVER_NOT_EXPORTED_PERMISSION**
