F-Droid

neutriNote CE

A hub of written thoughts in fast searchable plain text

English

New in version 4.6.8

v4.6.8
- Fixed toolbar in popup view.

neutriNote in a nutshell: all-in-one preservation of written thoughts, be those text, math (LaTeX), rich markdown, drawings, etc., in fully searchable plain text (universal UTF-8).

* **Uncluttered UI:** Fine-tuned user interface elements to reduce app switching. Accessible search filters for precise navigation to your note contents with minimum taps.
* **Customization:** Your workflow can be further automated by Tasker, Barcode Scanner, ColorDict, and other add-ons, or by connecting neutriNote's repository to web-based services. Options available to deep configure your note taking process.
* **Backup:** Multiple ways to backup your notes. Freedom to pick a cloud backend that works for you: open source P2P Syncthing, Dropbox, or third party Google Drive, Box, OneDrive components.
* **Cost:** Totally free. No hidden permission (see below). Optional add-ons can be purchased to support its development.

App Permissions Explained:

* Location access for location based search, location stamps, etc.
* Camera access for built-in barcode scanner.
* Storage access for core functions.

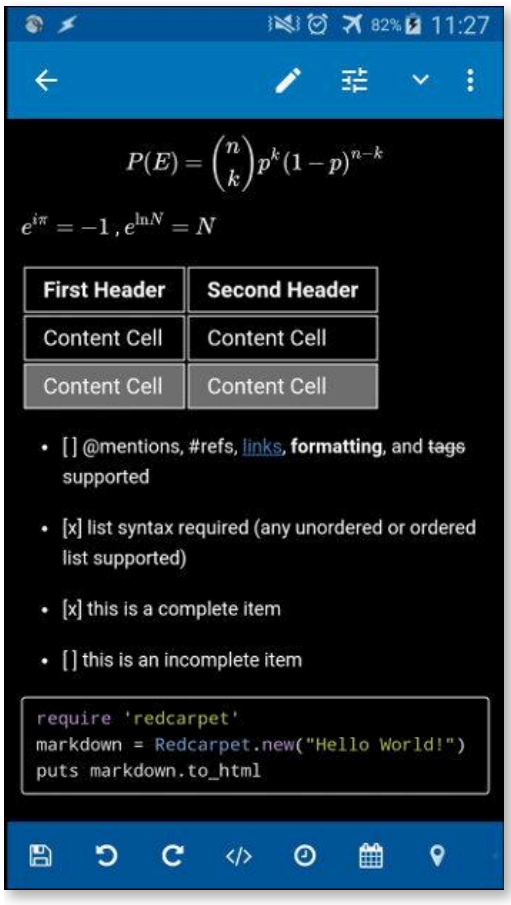

* Permission required by Sony devices to avoid crashes on certain models
* Permission to access network as MathJax is used for math rendering. MathJax will be cached for offline rendering later.
* Permission to receive boot completion for Tasker to schedule backup requests on legacy devices (pre-Android 8.0). It has no effect on devices running later versions of Android.

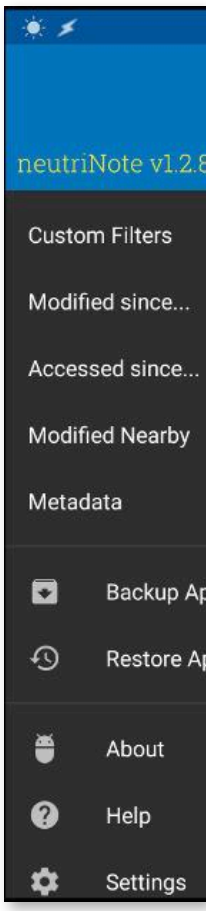

1. and 2. can be denied/revoked as needed either from Settings or via Marshmallow's runtime permissions.

Versions

Although APK downloads are available below to give you the choice, you should be aware that by installing that way you will not receive update notifications and it's a less secure way to download. We recommend that you install the F-Droid client and use that.

DOWNLOAD F-DROID

Version 4.6.8 (1388) suggested Added on Sep 12, 2026

This version requires Android 8.0 or newer.

It is built and signed by F-Droid, and guaranteed to correspond to this source tarball.

▼ Permissions

- **access approximate location only in the foreground**
  This app can get your approximate location from location services while the app is in use. Location services for your device must be turned on for the app to get location.
- **access precise location only in the foreground**
  This app can get your precise location from location services while the app is in use. Location services for your device must be turned on for the app to get location. This may increase battery usage.
- **view network connections**
  Allows the app to view information about network connections such as which networks exist and are connected.
- **take pictures and videos**
  This app can take pictures and record videos using the camera while the app is in use.
- **run foreground service**
  Allows the app to make use of foreground services.

- **have full network access**
  Allows the app to create network sockets and use custom network protocols. The browser and other applications provide means to send data to the internet, so this permission is not required to send data to the internet.
- **show notifications**
  Allows the app to show notifications
- **read the contents of your shared storage**
  Allows the app to read the contents of your shared storage.
- **run at startup**
  Allows the app to have itself started as soon as the system has finished booting. This can make it take longer to start the phone and allow the app to slow down the overall phone by always running.
- **modify or delete the contents of your shared storage**
  Allows the app to write the contents of your shared storage.
- **com.appmindlab.nano.DYNAMIC_RECEIVER_NOT_EXPORTED_PERMISSION**
- **com.sonymobile.permission.SYSTEM_UI_VISIBILITY_EXTENSIONS**
