YubiClip XOR

Present static passwords over NFC securely from your NFC enabled Yubikey.

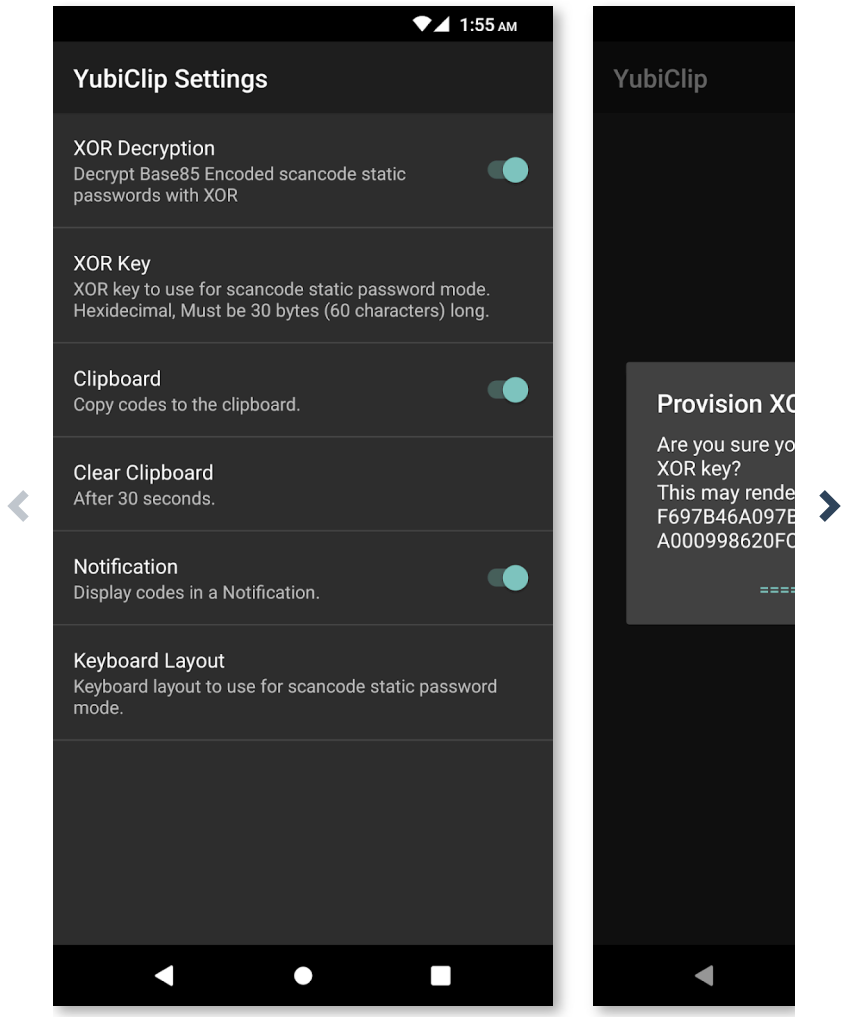

YubiClip XOR is a fork of the Yubico YubiClip app. With YubiClip XOR you can apply XOR encryption to keep static passwords safe from Drive-by NFC reading attacks.

You will need to setup your Yubikey before the XOR function can be used in this app. For setup instructions, and to view the source code of this app, go to https://github.com/craftxbox/yubiclip-xor#readme

Versions

Although APK downloads are available below to give you the choice, you should be aware that by installing that way you will not receive update notifications and it's a less secure way to download. We recommend that you install the F-Droid client and use that.
