Versions

Although APK downloads are available below to give you the choice, you should be aware that by installing that way you will not receive update notifications and it's a less secure way to download. We recommend that you install the F-Droid client and use that.

DOWNLOAD F-DROID

Version 35.0.2 (350000290) suggested Added on Oct 31, 2026

`arm64-v8a` `armeabi-v7a` `x86` `x86_64`

This version requires Android 9.0 or newer.

It is built and signed by F-Droid, and guaranteed to correspond to this source tarball.

▼ Permissions

- **read locations from your media collection**
  Allows the app to read locations from your media collection.
- **view network connections**
  Allows the app to view information about network connections such as which networks exist and are connected.
- **android.permission.AUTHENTICATE_ACCOUNTS**
- **take pictures and videos**

This app can take pictures and record videos using the camera while the app is in use.

- **run foreground service**
  Allows the app to make use of foreground services.
- **run foreground service with the type "dataSync"**
  Allows the app to make use of foreground services with the type "dataSync"
- **run foreground service with the type "mediaPlayback"**
  Allows the app to make use of foreground services with the type "mediaPlayback"
- **find accounts on the device**
  Allows the app to get the list of accounts known by the phone. This may include any accounts created by applications you have installed.
- **have full network access**
  Allows the app to create network sockets and use custom network protocols. The browser and other applications provide means to send data to the internet, so this permission is not required to send data to the internet.
- **android.permission.MANAGE_ACCOUNTS**
- **android.permission.MANAGE_EXTERNAL_STORAGE**
- **show notifications**
  Allows the app to show notifications
- **Read calendar events and details**
  This app can read all calendar events stored on your phone and share or save your calendar data.
- **read your contacts**
  Allows the app to read data about your contacts stored on your phone. Apps will also have access to the accounts on your phone that have created contacts. This may include accounts created by apps you have installed. This permission allows apps to save your contact data, and malicious apps may share contact data without your knowledge.
- **read the contents of your shared storage**
  Allows the app to read the contents of your shared storage.
- **read image files from shared storage**
  Allows the app to read image files from your shared storage.
- **read video files from shared storage**
  Allows the app to read video files from your shared storage.

- **read user selected image and video files from shared storage**
  Allows the app to read image and video files that you select from your shared storage.
- **read sync settings**
  Allows the app to read the sync settings for an account. For example, this can determine whether the People app is synced with an account.
- **read sync statistics**
  Allows an app to read the sync stats for an account, including the history of sync events and how much data is synced.
- **run at startup**
  Allows the app to have itself started as soon as the system has finished booting. This can make it take longer to start the phone and allow the app to slow down the overall phone by always running.
- **ask to ignore battery optimizations**
  Allows an app to ask for permission to ignore battery optimizations for that app.
- **request install packages**
  Allows an application to request installation of packages.
- **use biometric hardware**
  Allows the app to use biometric hardware for authentication
- **android.permission.USE_CREDENTIALS**
- **control vibration**
  Allows the app to control the vibrator.
- **prevent phone from sleeping**
  Allows the app to prevent the phone from going to sleep.
- **add or modify calendar events and send email to guests without owners' knowledge**
  This app can add, remove, or change calendar events on your phone. This app can send messages that may appear to come from calendar owners, or change events without notifying their owners.
- **modify your contacts**
  Allows the app to modify the data about your contacts stored on your phone. This permission allows apps to delete contact data.
- **modify or delete the contents of your shared storage**

Allows the app to write the contents of your shared storage.

- **toggle sync on and off**
  Allows an app to modify the sync settings for an account. For example, this can be used to enable sync of the People app with an account.
- **install shortcuts**
  Allows an application to add Homescreen shortcuts without user intervention.
- **com.nextcloud.client.DYNAMIC_RECEIVER_NOT_EXPORTED_PERMISSION**
