F-Droid

NoNonsense Notes

A simple notepad and to-do app with an excellent navigation

New in version 7.2.7

NoNonsense Notes v7.2.7

Highlights:
* updated translations using Weblate
* updated build tools and dependencies

Open source notepad and to-do list app using the latest Android technologies.

* Dash clock support (yes, it still works)
* Notifications: set reminders at a certain time, with optional repetition on certain weekdays
* Language selection
* Widget, with lockscreen support, resizeable and configurable
* Password-protect important notes
* Move tasks between different lists
* Drag to reorder tasks
* Integration with Android Agenda widget
* Search
* Use emojis as tags 🏷️
* Light and dark themes
* Back up (import and export) notes to a JSON file
* Sync with an ORG file on the local storage
* note history with all previous versions
* recycle bin for deleted notes

Versions

Although APK downloads are available below to give you the choice, you should be aware that by installing that way you will not receive update notifications and it's a less secure way to download. We recommend that you install the F-Droid client and use that.

DOWNLOAD F-DROID

Version 7.2.7 (72700) suggested Added on Oct 14, 2026

This version requires Android 6.0 or newer.

It is built and signed by F-Droid, and guaranteed to correspond to this source tarball.

▼ Permissions

- **show notifications**
  Allows the app to show notifications
- **read sync settings**
  Allows the app to read the sync settings for an account. For example, this can determine whether the People app is synced with an account.
- **read sync statistics**
  Allows an app to read the sync stats for an account, including the history of sync events and how much data is synced.
- **run at startup**
  Allows the app to have itself started as soon as the system has finished booting. This can make it take longer to start the phone and allow the app to slow down the overall phone by always running.
- **Schedule precisely timed actions**
  This app can schedule work to happen at a desired time in the future. This also means that the app can run when you're not actively using the device.
- **toggle sync on and off**
  Allows an app to modify the sync settings for an account. For example, this can be used to enable sync of the People app with an account.
- **com.nononsenseapps.notepad.DYNAMIC_RECEIVER_NOT_EXPORTED_PERMISSION**
