RetroArch

Retro games and emulators on your device!

RetroArch is an open-source project that makes use of a powerful development interface called Libretro. Libretro is an interface that allows you to make cross-platform applications that can use rich features such as OpenGL, cross-platform camera support, location support, and more in the future.

It comes with its own built-in collection of applications to provide you with a 'one-stop-shop' for entertainment.

Libretro and RetroArch are perfectly suited for creating games, emulators and multimedia programs. If you want to learn more, go to our website (listed below).
