Tailscale

Mesh VPN based on WireGuard

Tailscale is a mesh VPN alternative that makes it easy to connect your devices, wherever they are. No more fighting configuration or firewall ports. Built on WireGuard®, Tailscale enables an incremental shift to zero-trust networking by implementing “always-on” remote access. This guarantees a consistent, portable, and secure experience independent of physical location.

WireGuard is a registered trademark of Jason A. Donenfeld.

▼ Permissions

- **view network connections**
  Allows the app to view information about network connections such as which networks exist and are connected.
- **view Wi-Fi connections**
  Allows the app to view information about Wi-Fi networking, such as whether Wi-Fi is enabled and name of connected Wi-Fi devices.
- **change network connectivity**
  Allows the app to change the state of network connectivity.
- **run foreground service**
  Allows the app to make use of foreground services.
- **run foreground service with the type "systemExempted"**
  Allows the app to make use of foreground services with the type "systemExempted"
- **have full network access**
  Allows the app to create network sockets and use custom network protocols. The browser and other applications provide means to send data to the internet, so this permission is not required to send data to the internet.
- **show notifications**
  Allows the app to show notifications
- **query all packages**
  Allows an app to see all installed packages.
- **read the contents of your shared storage**
  Allows the app to read the contents of your shared storage.
- **run at startup**
  Allows the app to have itself started as soon as the system has finished booting. This can make it take longer to start the phone and allow the app to slow down the overall phone by always running.
- **prevent phone from sleeping**
  Allows the app to prevent the phone from going to sleep.
- **modify or delete the contents of your shared storage**
  Allows the app to write the contents of your shared storage.
