F-Droid

Pile

Organize your documents with tags. Private, offline, and built for you.

English

New in version 1.2.9

Improved the app performance and fixed errors.

Pile is a simple and powerful document management app designed to help you organize, access, and share your personal files — all in one place.

Built around a flexible tag system called "piles", the app lets you categorize your documents the way you think, not the way folders force you to.

✦ KEY FEATURES

- Centralized document management — keep all your files in one place
- Smart tag system (piles) — organize documents your way
- Full PDF support — view and share documents seamlessly
- Built-in search — find any document in seconds
- Modern Material Design — clean, intuitive interface
- 100% offline — no internet connection required
- Privacy-first — your documents never leave your device

SEARCH

✦ DESIGNED FOR PRIVACY
Pile does not collect any personal data. No analytics. No tracking. No cloud uploads. Everything stays on your device, under your control.

✦ PERFECT FOR

- Students managing notes, assignments, and study materials
- Professionals organizing contracts, invoices, and reports
- Anyone who wants a clean, private way to keep documents organized

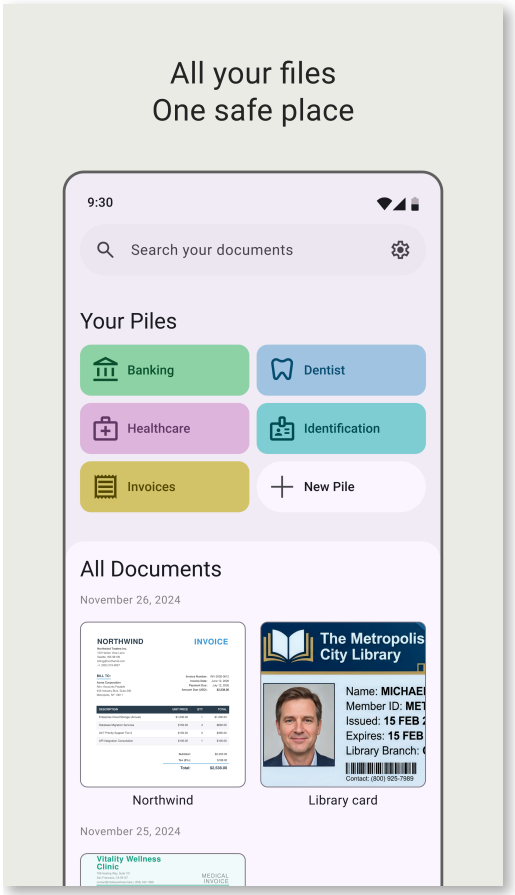

✦ BUILT WITH MODERN TECHNOLOGY
Pile is built using the latest Android development standards, including Jetpack Compose and Material Design, ensuring a smooth and reliable experience.

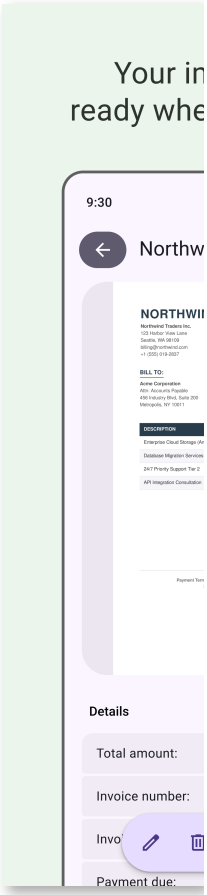

✦ ROADMAP
We're actively working on new features, including:

- Local AI-powered document information extraction
- Backup options
- Improved sharing flows
- Multiplatform support

Have feedback or suggestions? We'd love to hear from you.

Pile — Your documents. Your way. Your device.

Version 1.2.9 (21) suggested Added on Oct 22, 2026

This version requires Android 9.0 or newer.

It is built and signed by the original developer, and guaranteed to correspond to this source tarball.

▼ Permissions

- **view network connections**
  Allows the app to view information about network connections such as which networks exist and are connected.
- **run foreground service**
  Allows the app to make use of foreground services.
- **have full network access**
  Allows the app to create network sockets and use custom network protocols. The browser and other applications provide means to send data to the internet, so this permission is not required to send data to the internet.
- **read the contents of your shared storage**
  Allows the app to read the contents of your shared storage.
- **run at startup**
  Allows the app to have itself started as soon as the system has finished booting. This can make it take longer to start the phone and allow the app to slow down the overall phone by always running.
- **use biometric hardware**
  Allows the app to use biometric hardware for authentication
- **use fingerprint hardware**
  Allows the app to use fingerprint hardware for authentication
- **prevent phone from sleeping**
  Allows the app to prevent the phone from going to sleep.
- **modify or delete the contents of your shared storage**
  Allows the app to write the contents of your shared storage.
- **es.pile.DYNAMIC_RECEIVER_NOT_EXPORTED_PERMISSION**
