F-Droid

Open Markdown Notes (OMN)

Notes taken application with Markdown, HTML, CSS and JavaScript support

English

New in version 00.34.00

* Adopt to Android 14 use
* Upgrade source to use actual SDK (34) and Android Studio Koala 2024.1.1 Patch 1
* Use Android/media instead of Android/data for OS > 33 (Android 13)
* Add predefined tags for incoming bookmarks
* Fix 12-24 date format for E-Mail import
* Fix URL format for E-Mail import (<> wrapping)
* Fix JS url parameter with second question mark

This is simple, lightweight and open source application to create and organize everyday notes. Notes are edited and saved in Markdown format and displayed as HTML pages. New html page create if it does not exists or corresponding markdown page has later modification time stamp.

This program use external editor. Suitable almost any editor with SAF support. See Help inside application for details.

Pelican CMS meta information support can be enabled in preferences screen.

The application has JavaScript, HTML and CSS support. Can interact with Android system by Intents (run another application activites). Intent need to be enabled in settings (disabled by default). Interaction vith Termux possible also.

Find Apps

SEARCH

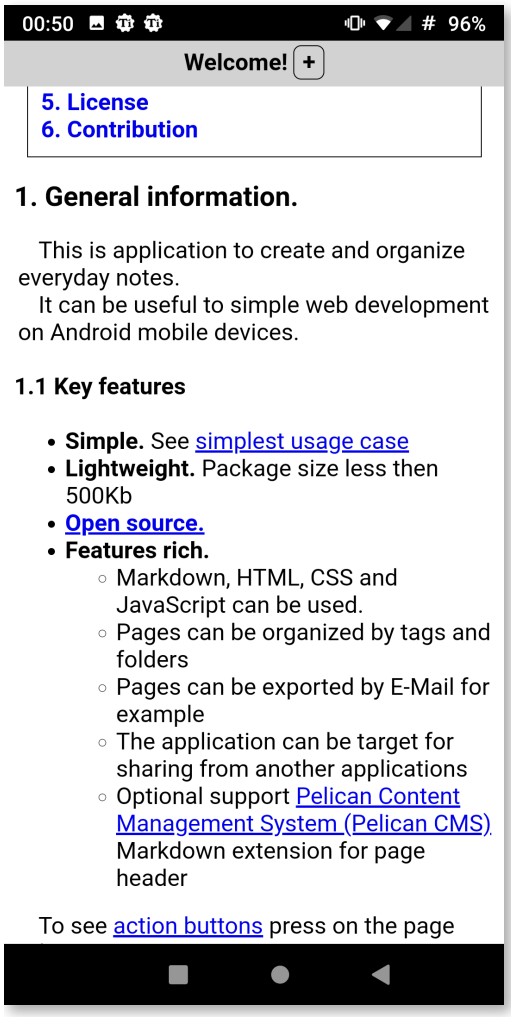

There is also a URL bookmark organizer.

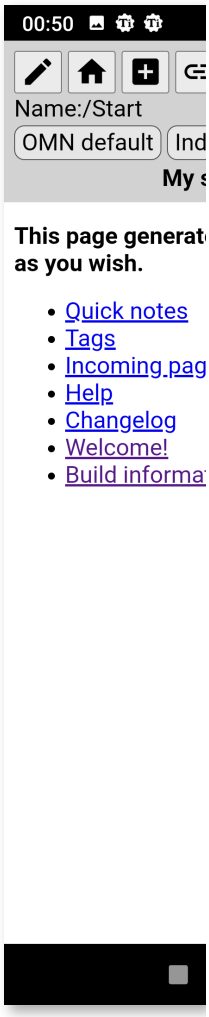

You can enable page search.

I tried to describe as much as possible in the built-in documentation. Please read it.

I design this application to my needs and use it everyday for several years. I will be glad if this application meets anybody needs also.

The Telegram channel created to share news and usage tips for this application https://t.me/OMNNewsAndTips
