# F-Droid

## Voki Bot

Android automation tool

### New in version 0.8.0

## 0.8.0 (2026-10-17)

Added Time triggers: run automations at a given time

- ✨ TimeTrigger: new trigger type
- ✨ TimeTrigger: Single shot, daily or weekly recurrence
- ✨ TimeTrigger: Schedule shown in lists (e.g. "Mon, Wed at 08:00", "Never", "expired")
- 🚸 Editor action buttons are now Done instead of Save, consistent across editors
- 🐛 TimeTriggerEditor: did not update when the language changed

Makes your Android device perform actions (commands) whenever something happens (triggers).

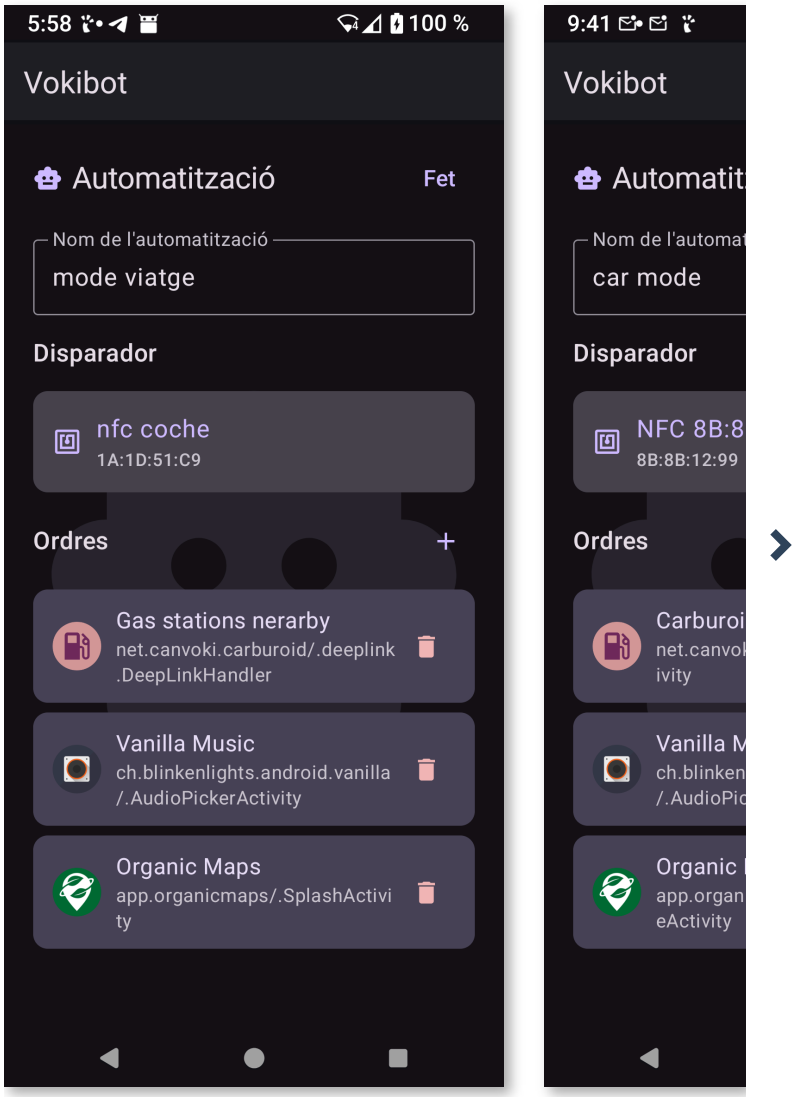

Implemented triggers:

- Time (at a given time or periodic)
- NFC tags (configure by tapping)
- Shortcut (creates a launcher icon)
- Bluetooth device (on connect to it)

Implemented commands:

- Interact with other applications (via Activities, Services or Receivers)

- Change system configuration parameters
- Open system configuration pages or quick panels
- Connect or disconnect Bluetooth devices

## Versions

Although APK downloads are available below to give you the choice, you should be aware that by installing that way you will not receive update notifications and it's a less secure way to download. We recommend that you install the F-Droid client and use that.

DOWNLOAD F-DROID

**Version 0.8.0** (80000) suggested Added on Oct 25, 2026

arm64-v8a armeabi-v7a x86 x86_64

This version requires Android 8.0 or newer.

It is built and signed by the original developer, and guaranteed to correspond to this source tarball.

▼ Permissions

- **pair with Bluetooth devices**
  Allows the app to view the configuration of the Bluetooth on the phone, and to make and accept connections with paired devices.
- **connect to paired Bluetooth devices**
  Allows the app to connect to paired Bluetooth devices
- **expand/collapse status bar**
  Allows the app to expand or collapse the status bar.
- **control Near Field Communication**
  Allows the app to communicate with Near Field Communication (NFC) tags, cards, and readers.
- **query all packages**
  Allows an app to see all installed packages.
- **run at startup**
  Allows the app to have itself started as soon as the system has finished booting. This can make it take longer to start the phone and allow the app to slow down the overall phone by always running.
- **This app can appear on top of other apps**
  This app can appear on top of other apps or other parts of the screen. This may interfere with normal app usage and change the way that other apps appear.
- **android.permission.WRITE_SECURE_SETTINGS**
- **modify system settings**
  Allows the app to modify the system's settings data. Malicious apps may corrupt your system's configuration.
- **net.canvoki.vokibot.DYNAMIC_RECEIVER_NOT_EXPORTED_PERMISSION**
