Versions

Although APK downloads are available below to give you the choice, you should be aware that by installing that way you will not receive update notifications and it's a less secure way to download. We recommend that you install the F-Droid client and use that.

DOWNLOAD F-DROID

Version 10.12.2 (241) suggested Added on May 29, 2026

This version requires Android 6.0 or newer.

It is built and signed by F-Droid, and guaranteed to correspond to this source tarball.

▼ Permissions

- **run foreground service**
  Allows the app to make use of foreground services.
- **run foreground service with the type "mediaPlayback"**
  Allows the app to make use of foreground services with the type "mediaPlayback"
- **have full network access**
  Allows the app to create network sockets and use custom network protocols. The browser and other applications provide means to send data to the internet, so this permission is not required to send data to the internet.
- **show notifications**
  Allows the app to show notifications
- **read the contents of your shared storage**

Allows the app to read the contents of your shared storage.

- **run at startup**
  Allows the app to have itself started as soon as the system has finished booting. This can make it take longer to start the phone and allow the app to slow down the overall phone by always running.
- **record audio**
  This app can record audio using the microphone while the app is in use.
- **modify or delete the contents of your shared storage**
  Allows the app to write the contents of your shared storage.
- **org.liberty.android.fantastischmemo.DYNAMIC_RECEIVER_NOT_EXPORTED_PERMISSION**
